# 1. Summary

Resale homes · 93 sales · May 26, 2026 – November 21, 2026

This study looks at the **93 resale homes** sold in Caldwell County in the **180 days** to November 21, 2026. New construction is left out and shown on its own in section 7. The homes are compared four ways: **by price**, **by living area**, **by year built** and **with or without a view**. The first three are split into four equal groups (quartiles), each named by its range.

Each comparison has its own section (3–6) with everything about it in one place: the key differences, a table of every measure at a glance, the charts and the numbers.

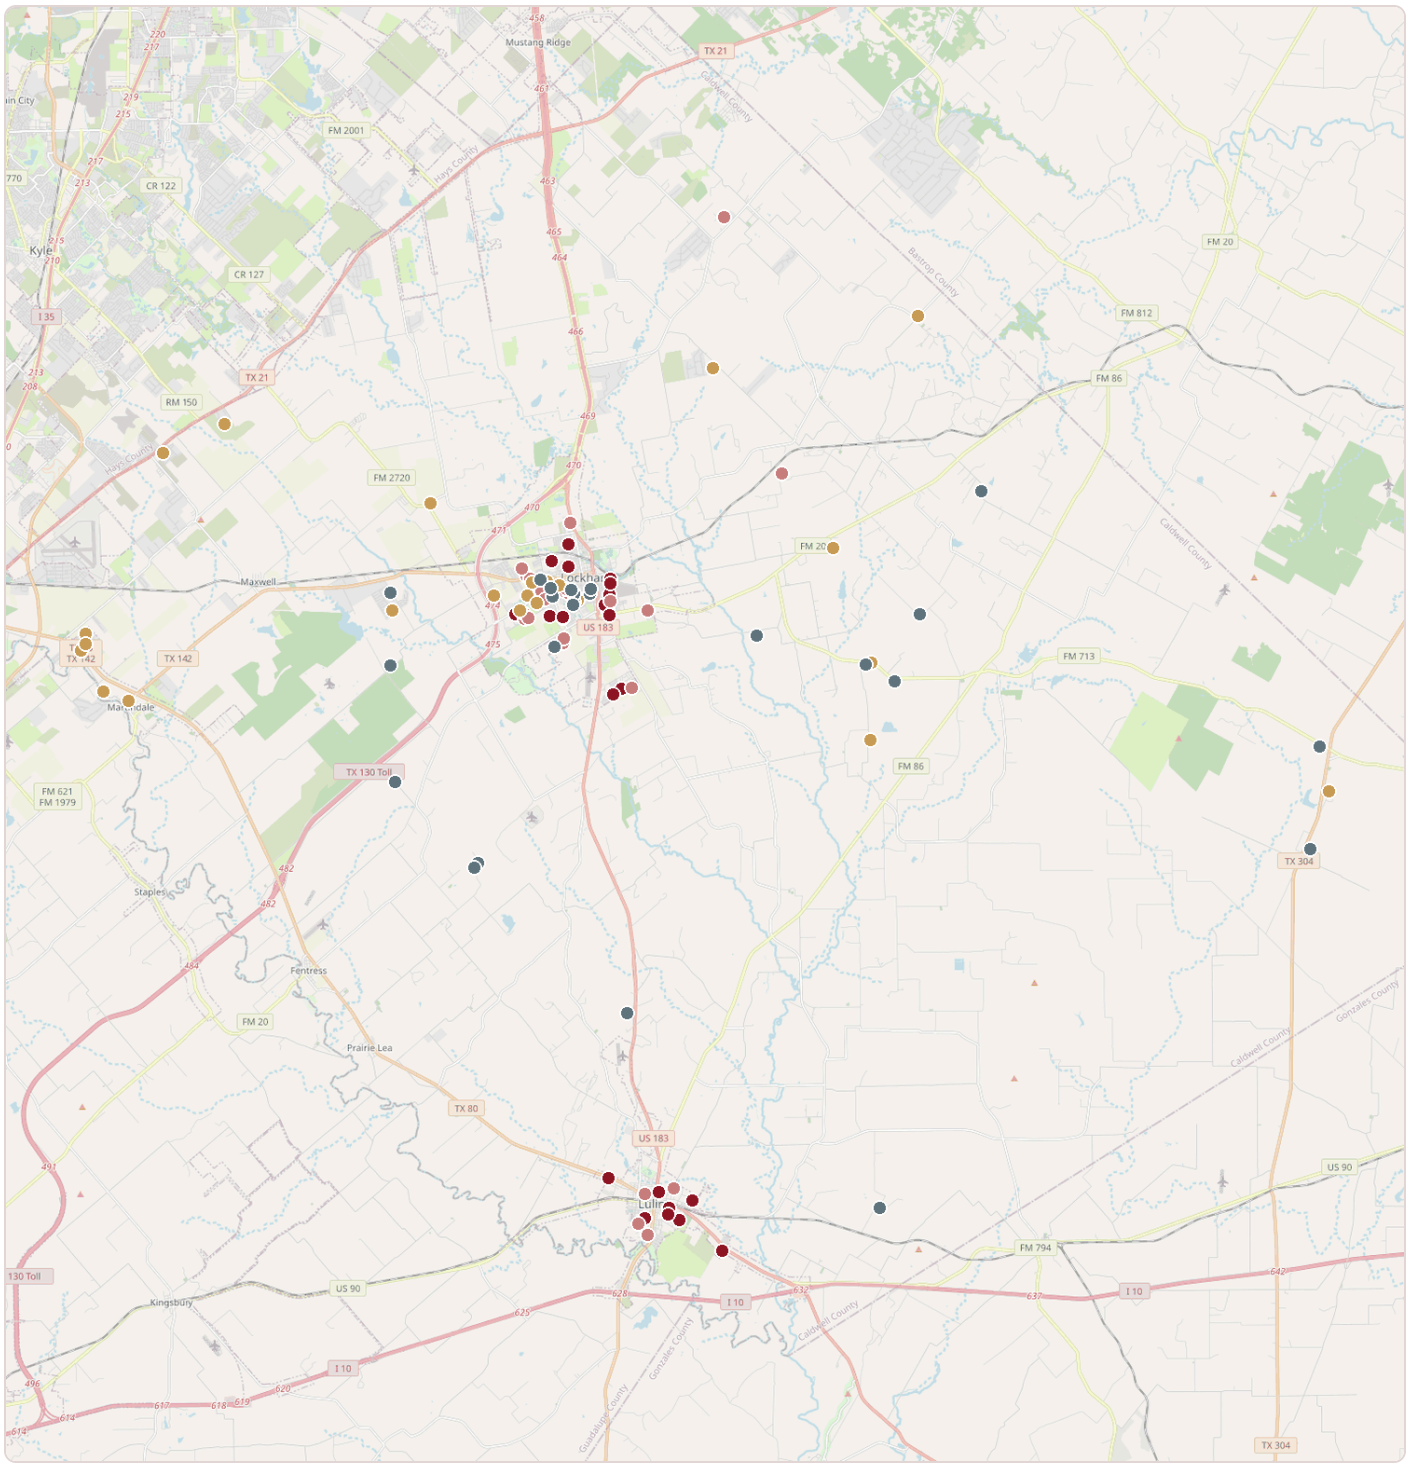
# 2. Where the resale homes sold

93 resale homes · colored by price range

Each dot is one resale home, colored by its price range.



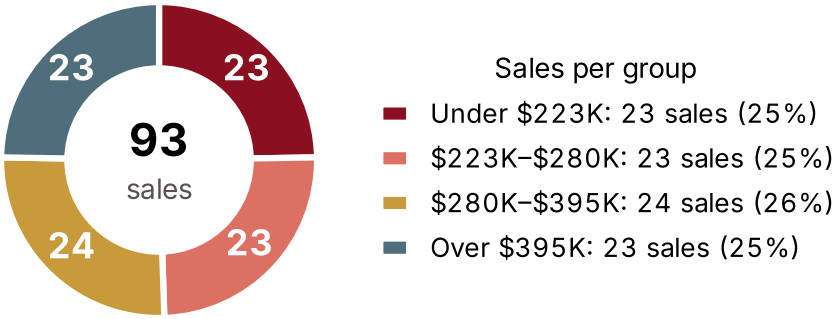
● Under $223K · 23 sales ● $223K–$280K · 23 sales ● $280K–$395K · 24 sales ● Over $395K · 23 sales

© 2026 Alexander Tiffany Southwest, LLC

# 3. Quartiles by net sale price

Resale homes · 93 sales · May 26, 2026 – November 21, 2026

Sales ranked by net sale price and cut into four equal groups. This is the usual way to read a market by price.



**Bottom line**

- Homes over $395K sell for about $153 per SF (114%) more than homes under $223K.
- Homes over $395K are about 860 SF (69%) larger than homes under $223K.

## 3.1 Key differences

The top group against the bottom group. Only real differences are listed. Section 8 explains each measure.

Under $223K $223K–$280K $280K–$395K Over $395K

**Higher-priced homes** Over $395K

- Sell for more per square foot.
- Are much larger.

**Lower-priced homes** Under $223K

- Sell for less per square foot.
- Are much smaller.

## 3.2 At a glance

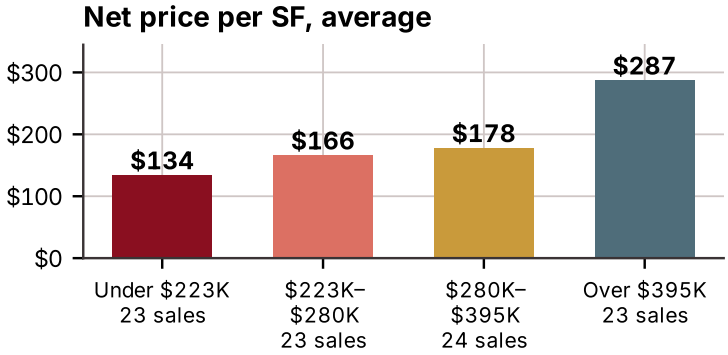
Shaded rows are real differences; the darkest cell is the highest. Gray rows show no clear difference. Prices are averages; days on market and year built are medians.

| | Under $223K | $223K–$280K | $280K–$395K | Over $395K | Real difference? |
|---|---|---|---|---|---|
| **Net price per SF** | $134 per SF **Lowest** | $166 per SF | $178 per SF | $287 per SF **Highest** | ✓ large |
| **Living area** | 1,257 SF **Smallest** | 1,537 SF | 1,948 SF | 2,118 SF **Largest** | ✓ large |
| Year built | 1969 | 1994 | 2002 | 1995 | unclear |
| Days on market | 80 days | 62 days | 66 days | 41 days | unclear |
| Discount from original list | 19.0% | 11.5% | 10.1% | 9.3% | unclear |
| Price cut before sale | 70% | 57% | 54% | 39% | unclear |
| Seller paid closing costs or repairs | 48% | 57% | 79% | 61% | unclear |
| Has a view | 13% | 35% | 50% | 57% | unclear |

**How to read this section.** Each heading gives the finding. The gold box says whether the gap is real (✓, with its size) or could be chance (–). The section ends with its numbers; the tests are in section 8.3.

---

## 3.3 Homes over $395K sell for about $153 per SF (114%) more than homes under $223K

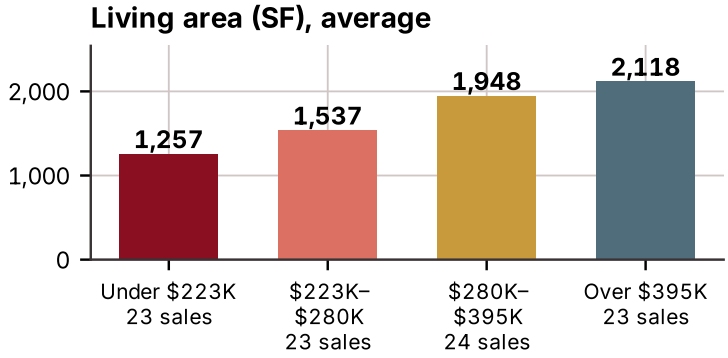


The average is **$287 per SF** for homes over $395K and **$134 per SF** for homes under $223K. It rises step by step from the lowest range to the highest. Defined in 8.1.2.

✓ **Real difference** · large

 © 2026 Alexander Tiffany Southwest, LLC

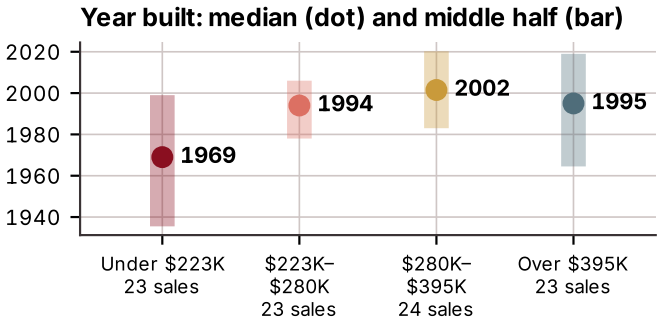
## 3.4 Homes over $395K are about 860 SF (69%) larger than homes under $223K



The average is **2,118 SF** for homes over $395K and **1,257 SF** for homes under $223K. It rises step by step from the lowest range to the highest. Defined in 8.1.3.

✓ **Real difference** · large

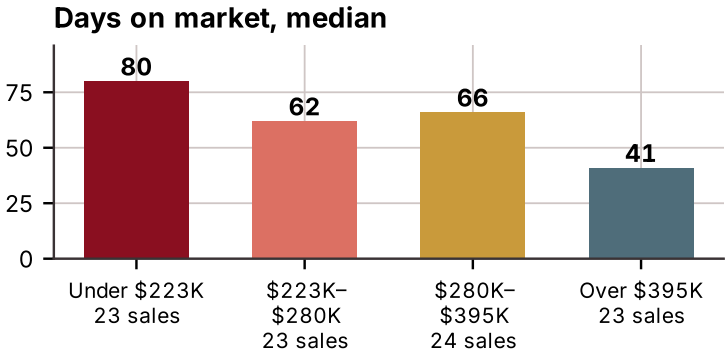
## 3.5 Year built: no clear difference



The median is **1995** for homes over $395K and **1969** for homes under $223K. It does not move in a straight line; homes $280K–$395K are highest. Defined in 8.1.4.

– **No clear difference** · could be chance

## 3.6 Days on market: no clear difference

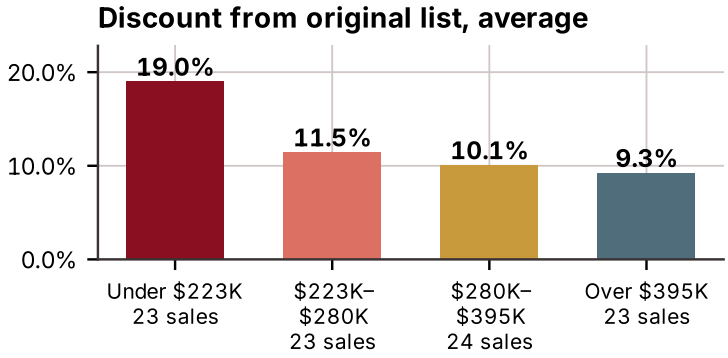


The median is **41 days** for homes over $395K and **80 days** for homes under $223K. It does not move in a straight line; homes under $223K are highest. Defined in 8.1.5.

– **No clear difference** · could be chance

 © 2026 Alexander Tiffany Southwest, LLC

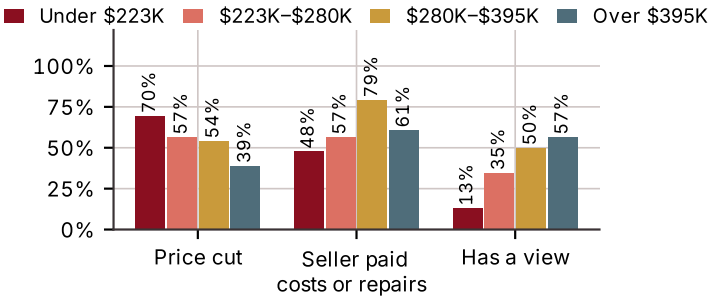
## 3.7 Discount from original list: no clear difference



The average is **9.3%** for homes over $395K and **19.0%** for homes under $223K. It falls step by step from the lowest range to the highest.
Defined in 8.1.6.

**– No clear difference** · could be chance

## 3.8 How often: price cut before sale, seller paid closing costs or repairs, has a view



Each bar is the share of homes in the group, in percent.

- 39% of homes over $395K had a price cut before sale, against 70% of homes under $223K. Defined in 8.1.7.
- 61% of homes over $395K had the seller pay closing costs or repairs, against 48% of homes under $223K. Defined in 8.1.8.
- 57% of homes over $395K have a view, against 13% of homes under $223K. Defined in 8.1.9.

Price cut before sale: **– No clear difference** · could be chance
Seller paid closing costs or repairs: **– No clear difference** · could be chance
Has a view: **– No clear difference** · could be chance

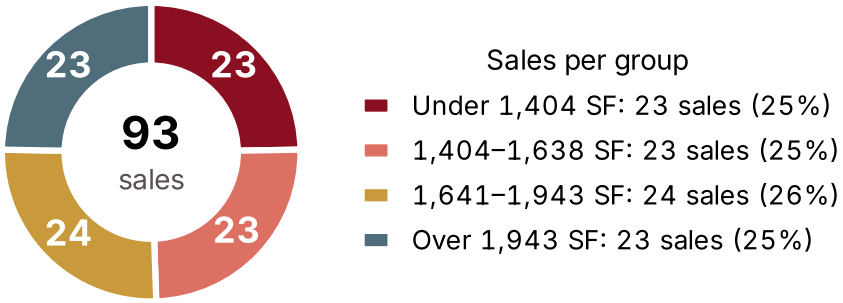
# 4. Quartiles by living area

Resale homes · 93 sales · May 26, 2026 – November 21, 2026

Sales ranked by living area and cut into four equal groups, from the smallest homes to the largest.



**Bottom line**

- Homes over 1,943 SF sell for about $293K (146%) more than homes under 1,404 SF.
- Homes over 1,943 SF are about 38 years newer than homes under 1,404 SF.

## 4.1 Key differences

The top group against the bottom group. Only real differences are listed. Section 8 explains each measure.

Under 1,404 SF · 1,404–1,638 SF · 1,641–1,943 SF · Over 1,943 SF

**Larger homes** Over 1,943 SF

- Sell for much more.
- Tend to be newer.

**Smaller homes** Under 1,404 SF

- Sell for much less.
- Tend to be older.

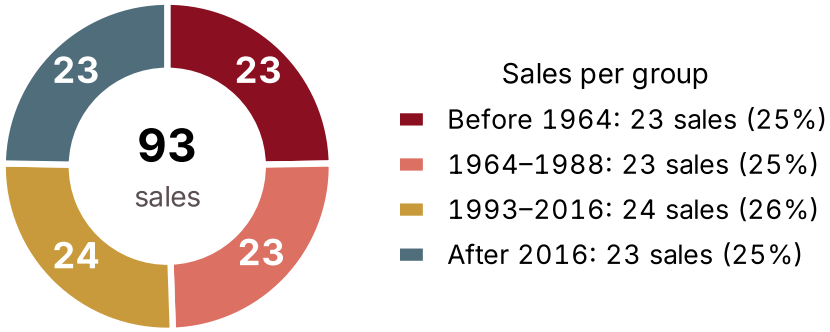
# 5. Quartiles by year built

Resale homes · 93 sales · May 26, 2026 – November 21, 2026

Sales ranked by year built and cut into four groups, from the oldest to the newest. Homes built in the same year always stay in the same group, so group sizes can differ a little.



**Bottom line**: no measure differs enough between the groups to rule out chance.

## 5.1 Key differences

The top group against the bottom group: no measure differs enough to rule out chance.

## 5.2 At a glance

Shaded rows are real differences; the darkest cell is the highest. Gray rows show no clear difference. Prices are averages; days on market and year built are medians.

| | Before 1964 | 1964–1988 | 1993–2016 | After 2016 | Real difference? |

# 7. New construction

Basic statistics · 140 sales · May 26, 2026 – November 21, 2026

Homes sold new by the builder in the same 180 days. They are left out of every other section and shown here as basic figures only: 140 sales, no groups, no tests.

> **Note**: these are only the new-construction sales reported in ABOR MLS. Builders often sell homes without listing them in the MLS, so these figures do not necessarily represent all new-construction sales in Caldwell County.

| Measure | Average | Median |
|---|---|---|
| Sales | | 140 |
| Net sale price | **$276,263** | $224,490 |
| Net price per SF | **$146** | $138 |
| Living area (SF) | **1,868** | 1,732 |
| Days on market | **72** | 51 |
| Discount from original list | **10.5%** | 10.7% |
| Price cut before sale | | 66% of sales |
| Seller paid closing costs or repairs | | 90% of sales |
| Year built | | 2023–2026 |

Same definitions as the rest of the study (section 8). New construction = NewConstructionYN true, or PropertyCondition “New Construction” or “Under Construction”.

# 8. Appendix

Measures, methods and tests

Each measure and method three ways: in plain words, as statistics, and with the data from this study.

## 8.1 Measures

### 8.1.1 Net sale price

**In simple terms** What the seller actually kept: the closing price, less money the seller gave back to the buyer for closing costs or repairs. It is the truest price for comparing homes.

**Statistically** Net = ClosePrice − ACTRIS_BuyersClsgCostPdbySell − ACTRIS_RepairsAmount (a blank counts as $0). Summarized by the arithmetic mean in the slices.

**The data** 93 resale sales. Average $327,912; median $280,500; standard deviation $183,318; middle half (25th–75th percentile) $223,000–$395,000; lowest $55,000, highest $1,050,000. 57 sales had a seller payment; their median payment was $8,700.

### 8.1.2 Net price per SF

**In simple terms** Net sale price divided by the heated and cooled square feet. It puts homes of different sizes on the same footing: did buyers pay more for each square foot, not just for more square feet?

**Statistically** psf = Net ÷ LivingArea, per sale; summarized by the mean of the per-sale ratios.

**The data** 93 resale sales. Average $191; median $170; standard deviation $82; middle half (25th–75th percentile) $139–$234; lowest $49, highest $517.

### 8.1.3 Living area

**In simple terms** The heated and cooled space, as listed in the MLS. Garages and porches are not counted.

**Statistically** RESO LivingArea, in square feet. Sales under 400 SF are treated as entry errors and left out.

**The data** 93 resale sales. Average 1,717; median 1,641; standard deviation 593; middle half (25th–75th percentile) 1,404–1,943; lowest 583, highest 4,157.

### 8.1.4 Year built

**In simple terms** The year the home was finished, as listed in the MLS. It shows whether a group leans to older or newer parts of the area.

**Statistically** RESO YearBuilt; summarized by the median, with the 25th–75th percentile (middle half) on the charts.

**The data** 93 resale sales. Average 1986; median 1993; standard deviation 32; middle half (25th–75th percentile) 1964–2016; lowest 1910, highest 2025.

© 2026 Alexander Tiffany Southwest, LLC

### 8.1.5 Days on market

**In simple terms** How many days the home was on the market before the buyer's offer was accepted, counting any earlier listing periods (relists). This is the days on market agents and clients quote.

**Statistically** CDOM = max(CumulativeDaysOnMarket, DaysOnMarket, PurchaseContractDate − ListingContractDate). The MLS counter can freeze at a price change, so the contract-date gap is a floor. Summarized by the median, because a few homes that sat for months pull an average up.

**The data** 93 resale sales. Average 87; median 61; standard deviation 84; middle half (25th–75th percentile) 22–116; lowest 0, highest 366. 1 sales went under contract on their listing date (0 days).

### 8.1.6 Discount from original list

**In simple terms** How far below the first asking price the home sold, after seller payments. It measures how much negotiating room sellers gave up. A negative figure means the home sold above its first asking price.

**Statistically** Discount % = (OriginalListPrice − Net) ÷ OriginalListPrice × 100, per sale; summarized by the mean.

**The data** 93 resale sales. Average 12.4%; median 9.6%; standard deviation 10.3%; middle half (25th–75th percentile) 4.7%–17.4%; lowest −5.2%, highest 42.4%. 2 sales closed above their first asking price.

### 8.1.7 Price cut before sale

**In simple terms** The asking price was lowered at least once before the home went under contract.

**Statistically** Indicator: ListPrice at close < OriginalListPrice. Reported as the share of sales (%).

**The data** 51 of 93 resale sales (54.8%).

### 8.1.8 Seller paid closing costs or repairs

**In simple terms** The seller paid some of the buyer's closing costs or repairs.

**Statistically** Indicator: ACTRIS_BuyersClsgCostPdbySell + ACTRIS_RepairsAmount > 0. Reported as the share of sales (%).

**The data** 57 of 93 resale sales (61.3%).

### 8.1.9 Has a view

**In simple terms** The MLS says the home looks over something: a greenbelt or park, trees, golf course, hill country, water and similar.

**Statistically** View = the View field holds any entry other than “None”, “Neighborhood” or “See Remarks”. No view = only “None” and/or “Neighborhood”. A record whose only entry is “See Remarks” cannot be classified and is left out of the view slice.

**The data** 36 sales with a view, 55 without, 2 unclassified. Most common View entries: Neighborhood 32, None 28, Pasture 15, Trees/Woods 15, Rural 10, Hill Country 4, Panoramic 4, City 3.

# 8.2 Methods

## 8.2.1 Data source

**In simple terms** Every figure comes from the Austin Board of REALTORS® MLS, read live by ALEX. No figure is estimated or typed in.

**Statistically** ABOR MLS via secure APIs, read from ALEX's copy of the MLS (refreshed every 15 minutes; this pull as of 2026-11-22 12:30 UTC), every field. Filter: StandardStatus = Closed, PropertyType = Residential, CountyOrParish = Caldwell.

**The data** Pulled November 22, 2026: 513 closed Caldwell County records over the prior year. Cities: Lockhart (280); Maxwell (129); Luling (42); Dale (36); Martindale (10); Kyle (7); and 5 more. ZIP codes: 10, the most sales in 78644, 78656, 78648, 78616, 78655, 78640.

## 8.2.2 Study window

**In simple terms** The most recent 180 days of closed sales: recent enough to describe today's market, long enough to give each group plenty of sales.

**Statistically** CloseDate from May 26, 2026 to November 21, 2026 inclusive.

**The data** 233 single-family sales in the window: 93 resale, 140 new construction.

## 8.2.3 Resale and new construction

**In simple terms** A resale home was previously owned. New construction is sold by the builder and behaves differently, so it is kept out of every analysis and reported once on its own.

**Statistically** New construction = NewConstructionYN true, or PropertyCondition contains “New Construction” or “Under Construction”. Everything else is resale.

**The data** 93 resale; 140 new construction.

## 8.2.4 Sales left out

**In simple terms** A few records cannot be used as entered and are left out before any analysis.

**Statistically** Excluded: PropertySubType other than Single Family Residence; no OriginalListPrice; LivingArea under 400 SF; seller payments above 10% of ClosePrice (treated as entry errors).

**The data** 34 sale(s) other than single-family homes (condo, townhome and similar); 3 sale(s) with concessions above 10% of price; 1 sale(s) with no usable living area

 © 2026 Alexander Tiffany Southwest, LLC

### 8.2.5 Quartiles and groups

**In simple terms** Sales lined up from lowest to highest and cut into four groups of about equal size. Each group is named by its range, for example “Under $223K”.

**Statistically** Sort by the slicing variable; cut k sits at round(nk/4), k = 1…3. A cut that would split tied values moves to the nearer edge of the tie. A group under 3 sales merges into its smaller neighbor. Range names use the next group's lowest value (“Under”) and the previous group's highest value (“Over”/“After”).

**The data** **Quartiles by net sale price:** Under $223K: $55,000–$212,930 (23 sales); $223K–$280K: $223,000–$280,000 (23 sales); $280K–$395K: $280,500–$395,000 (24 sales); Over $395K: $405,000–$1,050,000 (23 sales)
**Quartiles by living area:** Under 1,404 SF: 583–1,399 SF (23 sales); 1,404–1,638 SF: 1,404–1,638 SF (23 sales); 1,641–1,943 SF: 1,641–1,943 SF (24 sales); Over 1,943 SF: 1,976–4,157 SF (23 sales)
**Quartiles by year built:** Before 1964: 1910–1962 (23 sales); 1964–1988: 1964–1988 (23 sales); 1993–2016: 1993–2016 (24 sales); After 2016: 2017–2025 (23 sales)
**View and no view:** View: MLS lists a view (36 sales); No view: None or Neighborhood (55 sales)

### 8.2.6 Average and median

**In simple terms** The average adds the values and divides by how many; one very expensive home can pull it up. The median is the middle value, with half above and half below.

**Statistically** Mean $\bar{x} = (1/n)\ \Sigma\ x_i$; median = 50th percentile. Price, price per SF, living area and discount use the mean; days on market and year built use the median (skewed or whole-year values).

**The data** Net sale price: average $327,912, median $280,500. Days on market: average 87, median 61: the average is pulled up by a few long listings.

### 8.2.7 Kruskal–Wallis test

**In simple terms** Checks whether a measure really differs across the four groups of a slice. It uses each sale's rank, not its value, so a few extreme sales cannot drive the answer.

**Statistically** $H = [12/(n(n+1))]\ \Sigma\ R_j^2/n_j - 3(n+1)$, compared with $\chi^2$ on k − 1 degrees of freedom (Kruskal & Wallis, 1952). Effect size $\varepsilon^2 = H/(n-1)$: ≥ .01 small, ≥ .06 medium, ≥ .14 large (Tomczak & Tomczak, 2014). A slice is tested only when every group has at least 5 sales; smaller groups are described, not tested.

**The data** Run on every measure in sections 3–5; each result is in 8.3.

### 8.2.8 Mann–Whitney U test

**In simple terms** The same check when there are only two groups: view against no view.

**Statistically** Two-sided U test (Mann & Whitney, 1947). Effect size = rank-biserial correlation $\left|1 - 2U/(n_1 n_2)\right|$: ≥ .10 small, ≥ .30 medium, ≥ .50 large (Kerby, 2014; Cohen, 1988).

**The data** Run on every measure in section 6; results in 8.3.

### 8.2.9 Chi-square test

**In simple terms** Checks whether a yes/no share (price cut, seller payment, view) differs between groups more than chance would.

**Statistically** Pearson $\chi^2$ on the 2 × k table of counts, no continuity correction (Pearson, 1900). Effect size Cramér's $V = \sqrt{(\chi^2/n)}$: ≥ .10 small, ≥ .30 medium, ≥ .50 large (Cramér, 1946).

**The data** Run on the three shares in every slice; results in 8.3.

 © 2026 Alexander Tiffany Southwest, LLC

### 8.2.10 Real difference (significance)

**In simple terms** "Real difference" means a gap this large would be very unlikely if the groups were really alike. Because many measures are checked in each slice, the bar is set higher than usual.

**Statistically** Significant when $p < 0.05 \div m$, where m is the number of measures tested in that slice (Bonferroni; Dunn, 1961). The slicing variable itself differs by design and is not tested.

**The data** Quartiles by net sale price: m = 8, threshold $p < 0.0063$; Quartiles by living area: m = 8, threshold $p < 0.0063$; Quartiles by year built: m = 8, threshold $p < 0.0063$; View and no view: m = 8, threshold $p < 0.0063$

### 8.2.11 Size of a difference

**In simple terms** A difference can be real but small. The size word (small, medium, large) says how much the groups pull apart.

**Statistically** $\varepsilon^2$ for Kruskal–Wallis, rank-biserial r for Mann–Whitney, Cramér's V for chi-square, with the thresholds above; below the small threshold the size is "negligible".

**The data** 6 real differences across the four slices; sizes are listed in 8.3.

### 8.2.12 Rounding in the text

**In simple terms** Headings and sentences round figures so they read easily; the tables at the end of each section give them in full.

**Statistically** Prices in headings round to the nearest $1K; price per SF and days on market to the nearest whole number; living area to the nearest 10 SF; shares and percentage gaps to whole percents.

**The data** Days on market is always shown in days.

## 8.3 Test results

Every test behind every gold box. Statistic, degrees of freedom (df), p-value, the threshold it must beat, and the size of the difference.

© 2026 Alexander Tiffany Southwest, LLC

## 8.3.1 Quartiles by net sale price

| Measure | Test | Statistic | df | p-value | Threshold | Real difference? | Effect size | Size |
|---|---|---|---|---|---|---|---|---|
| Net price per SF | Kruskal–Wallis | H = 46.40 | 3 | < 0.0001 | p < 0.0063 | **Yes** | $\varepsilon^2 = 0.504$ | large |
| Living area | Kruskal–Wallis | H = 36.74 | 3 | < 0.0001 | p < 0.0063 | **Yes** | $\varepsilon^2 = 0.399$ | large |
| Year built | Kruskal–Wallis | H = 8.66 | 3 | 0.0341 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.094$ | medium |
| Days on market | Kruskal–Wallis | H = 1.90 | 3 | 0.5940 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.021$ | small |
| Discount from original list | Kruskal–Wallis | H = 9.20 | 3 | 0.0268 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.100$ | medium |
| Price cut before sale | Chi-square | $\chi^2 = 4.34$ | 3 | 0.2274 | p < 0.0063 | **Unclear** | Cramér's V = 0.216 | small |
| Seller paid closing costs or repairs | Chi-square | $\chi^2 = 5.21$ | 3 | 0.1569 | p < 0.0063 | **Unclear** | Cramér's V = 0.237 | small |
| Has a view | Chi-square | $\chi^2 = 10.90$ | 3 | 0.0123 | p < 0.0063 | **Unclear** | Cramér's V = 0.342 | medium |

## 8.3.2 Quartiles by living area

| Measure | Test | Statistic | df | p-value | Threshold | Real difference? | Effect size | Size |
|---|---|---|---|---|---|---|---|---|
| Net sale price | Kruskal–Wallis | H = 33.23 | 3 | < 0.0001 | p < 0.0063 | **Yes** | $\varepsilon^2 = 0.361$ | large |
| Net price per SF | Kruskal–Wallis | H = 0.58 | 3 | 0.9021 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.006$ | negligible |
| Year built | Kruskal–Wallis | H = 14.70 | 3 | 0.0021 | p < 0.0063 | **Yes** | $\varepsilon^2 = 0.160$ | large |
| Days on market | Kruskal–Wallis | H = 1.73 | 3 | 0.6298 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.019$ | small |
| Discount from original list | Kruskal–Wallis | H = 1.27 | 3 | 0.7360 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.014$ | small |
| Price cut before sale | Chi-square | $\chi^2 = 0.83$ | 3 | 0.8434 | p < 0.0063 | **Unclear** | Cramér's V = 0.094 | negligible |
| Seller paid closing costs or repairs | Chi-square | $\chi^2 = 7.60$ | 3 | 0.0550 | p < 0.0063 | **Unclear** | Cramér's V = 0.286 | small |
| Has a view | Chi-square | $\chi^2 = 6.98$ | 3 | 0.0724 | p < 0.0063 | **Unclear** | Cramér's V = 0.274 | small |

© 2026 Alexander Tiffany Southwest, LLC

## 8.3.3 Quartiles by year built

| Measure | Test | Statistic | df | p-value | Threshold | Real difference? | Effect size | Size |
|---|---|---|---|---|---|---|---|---|
| Net sale price | Kruskal–Wallis | H = 5.37 | 3 | 0.1469 | p < 0.0063 | Unclear | $\varepsilon^2$ = 0.058 | small |
| Net price per SF | Kruskal–Wallis | H = 2.48 | 3 | 0.4786 | p < 0.0063 | Unclear | $\varepsilon^2$ = 0.027 | small |
| Living area | Kruskal–Wallis | H = 8.86 | 3 | 0.0312 | p < 0.0063 | Unclear | $\varepsilon^2$ = 0.096 | medium |
| Days on market | Kruskal–Wallis | H = 5.77 | 3 | 0.1233 | p < 0.0063 | Unclear | $\varepsilon^2$ = 0.063 | medium |
| Discount from original list | Kruskal–Wallis | H = 4.05 | 3 | 0.2565 | p < 0.0063 | Unclear | $\varepsilon^2$ = 0.044 | small |
| Price cut before sale | Chi-square | $\chi^2$ = 1.53 | 3 | 0.6760 | p < 0.0063 | Unclear | Cramér's V = 0.128 | small |
| Seller paid closing costs or repairs | Chi-square | $\chi^2$ = 4.11 | 3 | 0.2495 | p < 0.0063 | Unclear | Cramér's V = 0.210 | small |
| Has a view | Chi-square | $\chi^2$ = 4.11 | 3 | 0.2495 | p < 0.0063 | Unclear | Cramér's V = 0.210 | small |

## 8.3.4 View and no view

| Measure | Test | Statistic | df | p-value | Threshold | Real difference? | Effect size | Size |
|---|---|---|---|---|---|---|---|---|
| Net sale price | Mann–Whitney U | U = 1,437.00 | — | 0.0003 | p < 0.0063 | Yes | rank-biserial r = 0.452 | medium |
| Net price per SF | Mann–Whitney U | U = 1,334.00 | — | 0.0053 | p < 0.0063 | Yes | rank-biserial r = 0.347 | medium |
| Living area | Mann–Whitney U | U = 1,240.00 | — | 0.0429 | p < 0.0063 | Unclear | rank-biserial r = 0.253 | small |
| Year built | Mann–Whitney U | U = 1,230.50 | — | 0.0513 | p < 0.0063 | Unclear | rank-biserial r = 0.243 | small |
| Days on market | Mann–Whitney U | U = 1,184.00 | — | 0.1162 | p < 0.0063 | Unclear | rank-biserial r = 0.196 | small |
| Discount from original list | Mann–Whitney U | U = 1,142.50 | — | 0.2173 | p < 0.0063 | Unclear | rank-biserial r = 0.154 | small |
| Price cut before sale | Chi-square | $\chi^2$ = 0.48 | 1 | 0.4873 | p < 0.0063 | Unclear | Cramér's V = 0.073 | negligible |
| Seller paid closing costs or repairs | Chi-square | $\chi^2$ = 0.97 | 1 | 0.3257 | p < 0.0063 | Unclear | Cramér's V = 0.103 | small |
