1. Summary

Resale homes · 23 sales · November 9, 2025 – November 8, 2026

This study looks at the **23 resale homes** sold in Rim Rock in the **365 days** to November 8, 2026. A full year is used because only 12 resale homes sold in the last 180 days. New construction is left out and shown on its own in section 7. The homes are compared four ways: **by price**, **by living area**, **by year built** and **with or without a view**. The first three are split into four equal groups (quartiles), each named by its range.

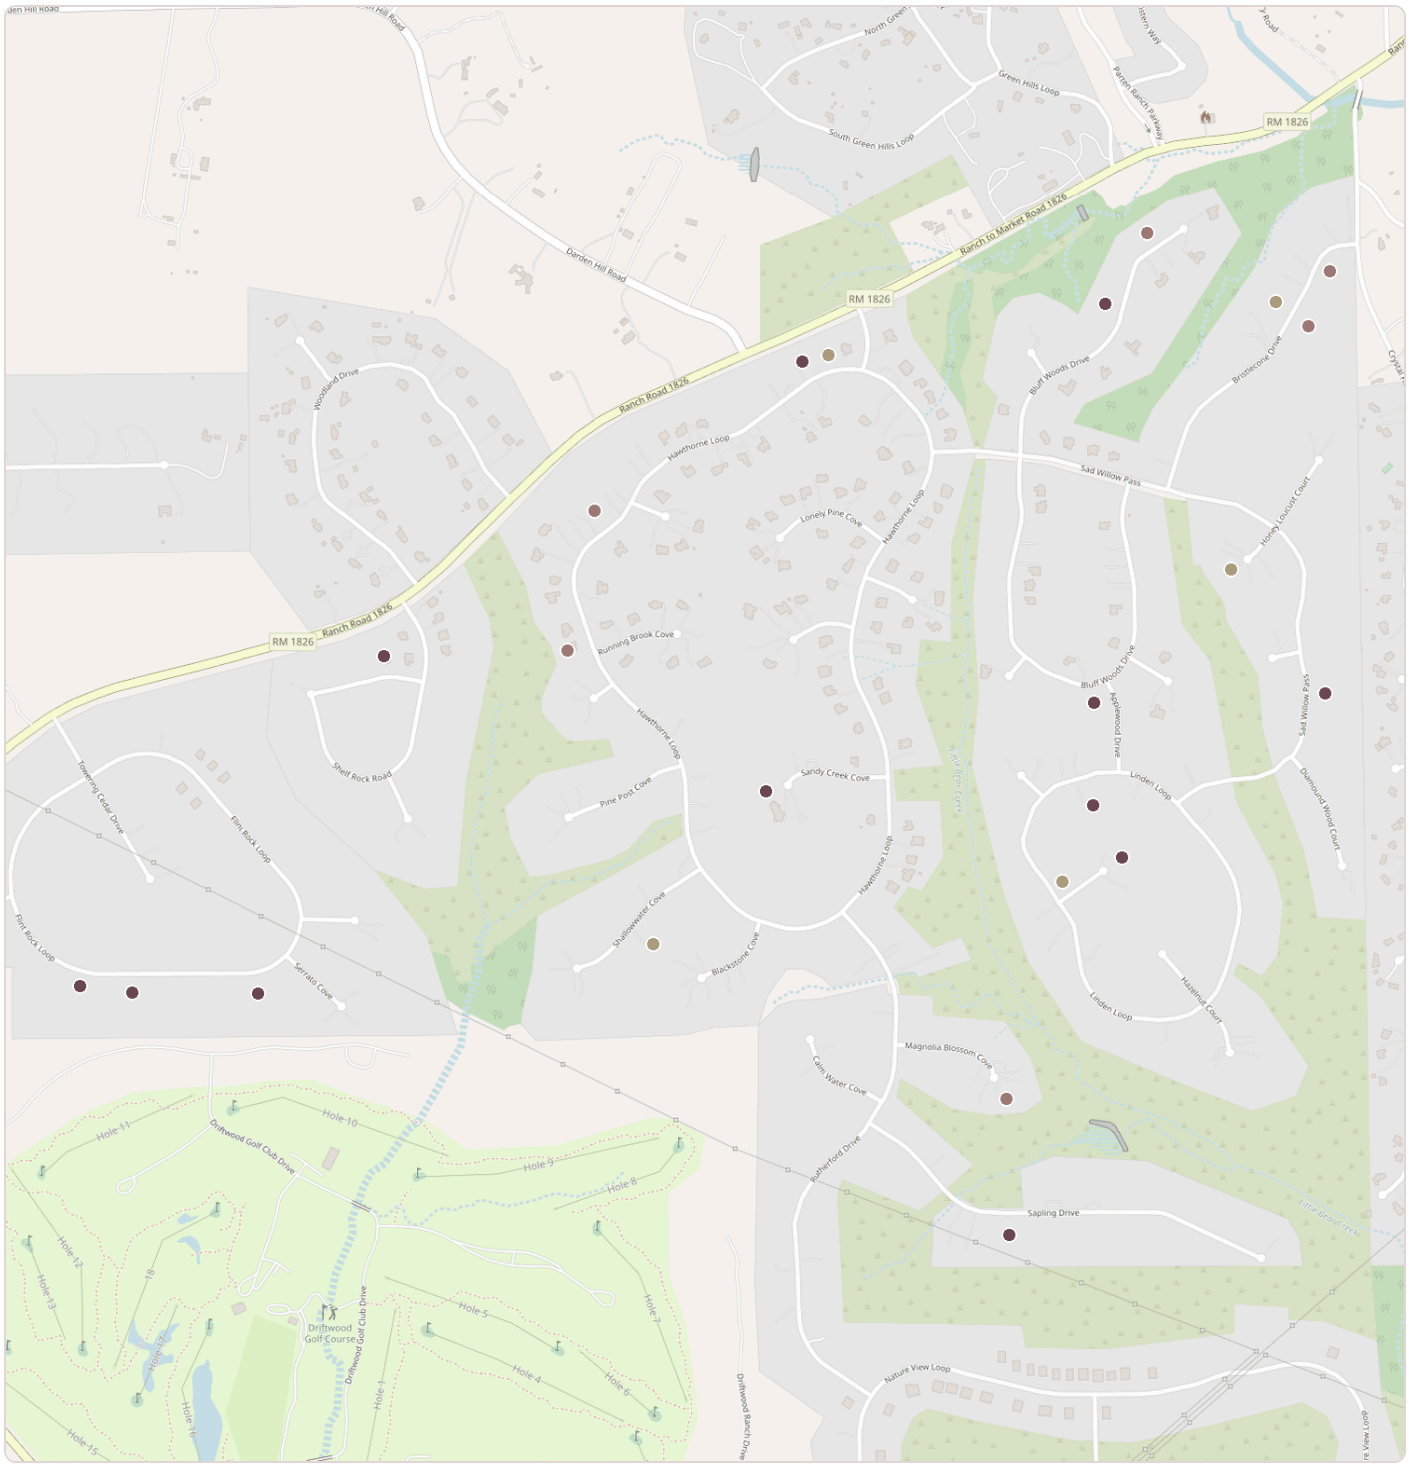

Each comparison has its own section (3–6) with everything about it in one place: the key differences, a table of every measure at a glance, the charts and the numbers.

© 2026 Alexander Tiffany Southwest, LLC

2. Where the resale homes sold

23 resale homes · colored by price range

Each dot is one resale home, colored by its price range.

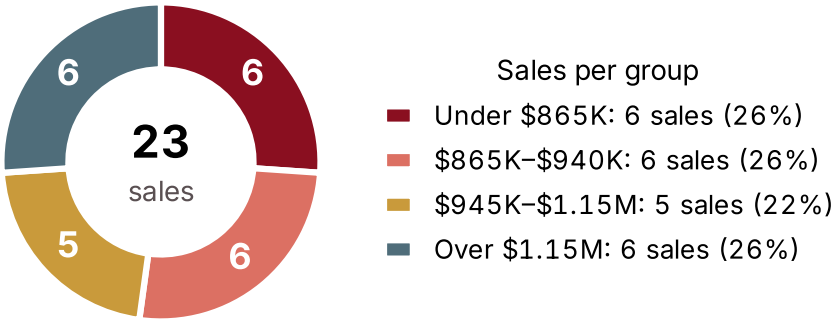

● Under $865K · 6 sales ● $865K–$940K · 6 sales ● $945K–$1.15M · 5 sales ● Over $1.15M · 6 sales

 © 2026 Alexander Tiffany Southwest, LLC

3. Quartiles by net sale price

Resale homes · 23 sales · November 9, 2025 – November 8, 2026

Sales ranked by net sale price and cut into four equal groups. This is the usual way to read a market by price.

Bottom line

- Homes over $1.15M sell for about $136 per SF (57%) more than homes under $865K.

3.1 Key differences

The top group against the bottom group. Only real differences are listed. Section 8 explains each measure.

Under $865K $865K–$940K $945K–$1.15M Over $1.15M

Higher-priced homes Over $1.15M

- Sell for more per square foot.

Lower-priced homes Under $865K

- Sell for less per square foot.

 © 2026 Alexander Tiffany Southwest, LLC

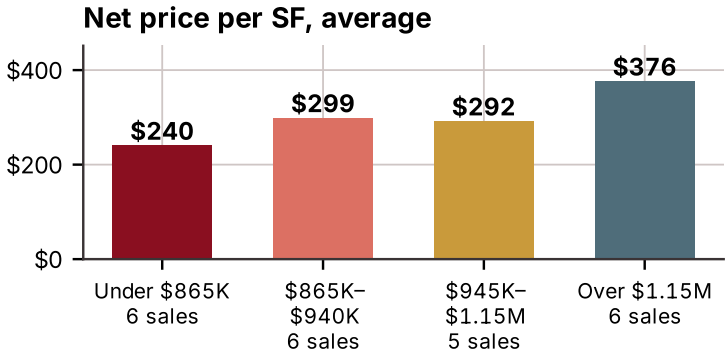

3.2 At a glance

Shaded rows are real differences; the darkest cell is the highest. Gray rows show no clear difference. Prices are averages; days on market and year built are medians.

	Under $865K	$865K–$940K	$945K–$1.15M	Over $1.15M	Real difference?
Net price per SF	$240 per SF **Lowest**	$299 per SF	$292 per SF	$376 per SF **Highest**	✓ large
Living area	3,460 SF	3,072 SF	3,510 SF	3,495 SF	unclear
Year built	2014	2017	2014	2016	unclear
Days on market	78 days	9 days	51 days	31 days	unclear
Discount from original list	7.0%	1.9%	7.5%	7.0%	unclear
Price cut before sale	67%	33%	60%	50%	unclear
Seller paid closing costs or repairs	100%	50%	40%	33%	unclear
Has a view	83%	100%	80%	67%	unclear

How to read this section. Each heading gives the finding. The gold box says whether the gap is real (✓, with its size) or could be chance (–). The section ends with its numbers; the tests are in section 8.3.

3.3 Homes over $1.15M sell for about $136 per SF (57%) more than homes under $865K

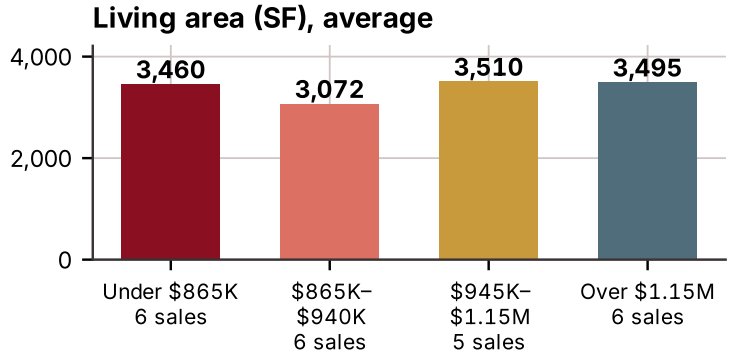

The average is **$376 per SF** for homes over $1.15M and **$240 per SF** for homes under $865K. It does not move in a straight line; homes over $1.15M are highest. Defined in 8.1.2.

✓ **Real difference** · large

 © 2026 Alexander Tiffany Southwest, LLC

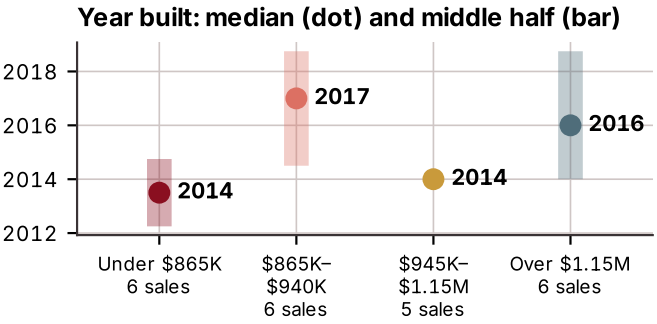

3.4 Living area: no clear difference

The average is **3,495 SF** for homes over $1.15M and **3,460 SF** for homes under $865K. It does not move in a straight line; homes $945K–$1.15M are highest. Defined in 8.1.3.

– No clear difference · could be chance

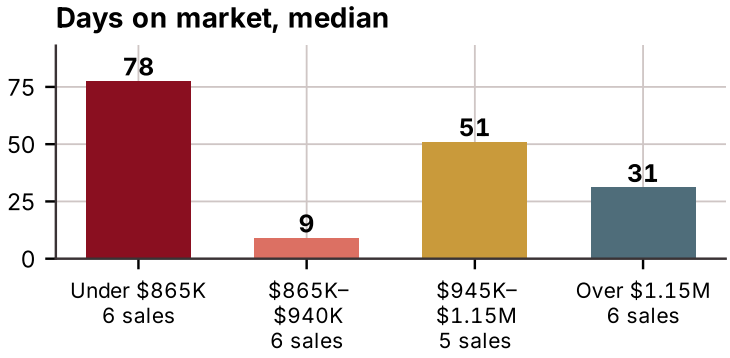

3.5 Year built: no clear difference

The median is **2016** for homes over $1.15M and **2014** for homes under $865K. It does not move in a straight line; homes $865K–$940K are highest. Defined in 8.1.4.

– No clear difference · could be chance

3.6 Days on market: no clear difference

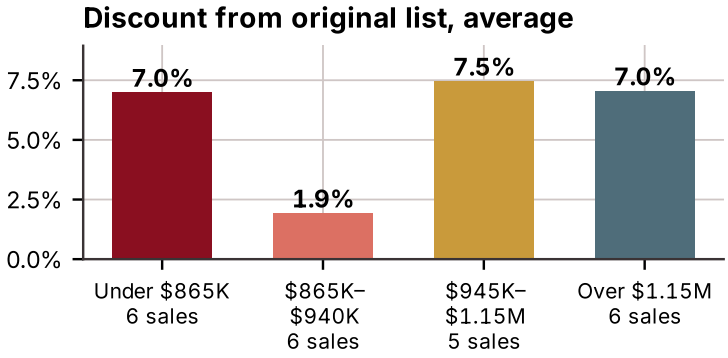

The median is **31 days** for homes over $1.15M and **78 days** for homes under $865K. It does not move in a straight line; homes under $865K are highest. Defined in 8.1.5.

– No clear difference · could be chance

 © 2026 Alexander Tiffany Southwest, LLC

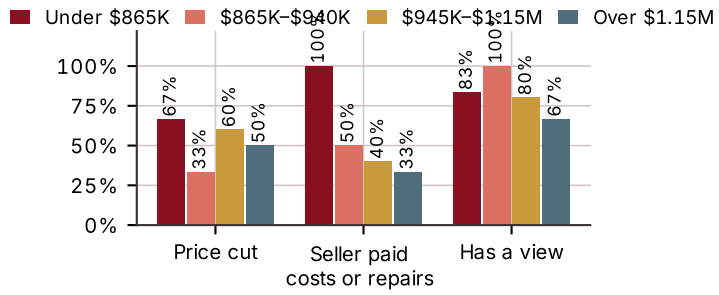

3.7 Discount from original list: no clear difference

The average is **7.0%** for homes over $1.15M and **7.0%** for homes under $865K. It does not move in a straight line; homes $945K–$1.15M are highest. Defined in 8.1.6.

– No clear difference · could be chance

3.8 How often: price cut before sale, seller paid closing costs or repairs, has a view

Each bar is the share of homes in the group, in percent.

- 50% of homes over $1.15M had a price cut before sale, against 67% of homes under $865K. Defined in 8.1.7.
- 33% of homes over $1.15M had the seller pay closing costs or repairs, against 100% of homes under $865K. Defined in 8.1.8.
- 67% of homes over $1.15M have a view, against 83% of homes under $865K. Defined in 8.1.9.

Price cut before sale: **– No clear difference** · could be chance
Seller paid closing costs or repairs: **– No clear difference** · could be chance
Has a view: **– No clear difference** · could be chance

3.9 The numbers: price and size

5. Quartiles by year built

Resale homes · 23 sales · November 9, 2025 – November 8, 2026

Sales ranked by year built and cut into four groups, from the oldest to the newest. Homes built in the same year always stay in the same group, so group sizes can differ a little.

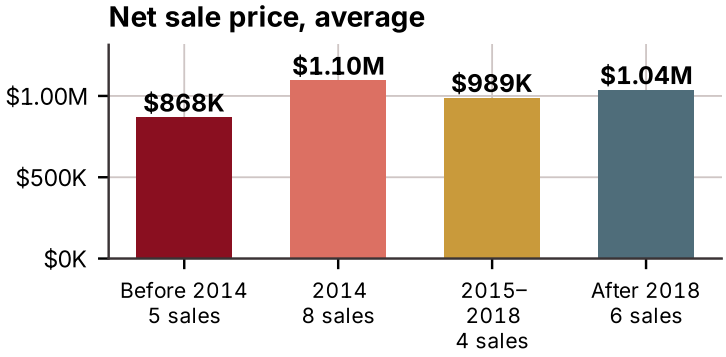

Sales per group
- Before 2014: 5 sales (22%)
- 2014: 8 sales (35%)
- 2015–2018: 4 sales (17%)
- After 2018: 6 sales (26%)

Bottom line: too few sales to test.

5.1 Key differences

The top group against the bottom group: no measure differs enough to rule out chance.

5.3 Net sale price: described, not tested

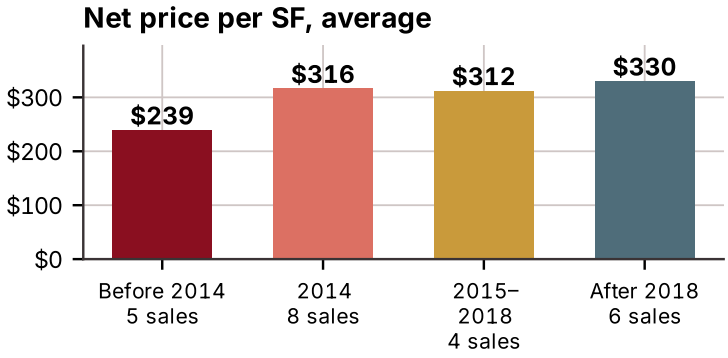

The average is **$1.04M** for homes built after 2018 and **$868K** for homes built before 2014. It does not move in a straight line; homes built 2014 are highest. Defined in 8.1.1.

Not tested: too few sales.

 © 2026 Alexander Tiffany Southwest, LLC

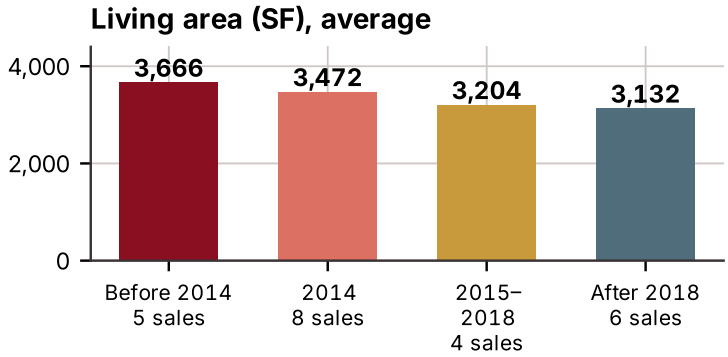

5.4 Net price per SF: described, not tested

The average is **$330 per SF** for homes built after 2018 and **$239 per SF** for homes built before 2014. It does not move in a straight line; homes built after 2018 are highest. Defined in 8.1.2.

Not tested: too few sales.

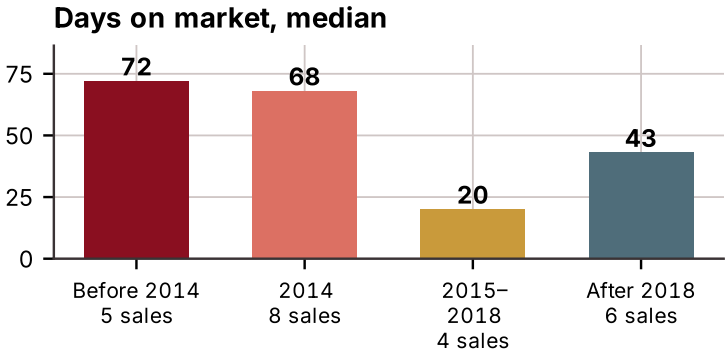

5.5 Living area: described, not tested

The average is **3,132 SF** for homes built after 2018 and **3,666 SF** for homes built before 2014. It falls step by step from the lowest range to the highest. Defined in 8.1.3.

Not tested: too few sales.

5.6 Days on market: described, not tested

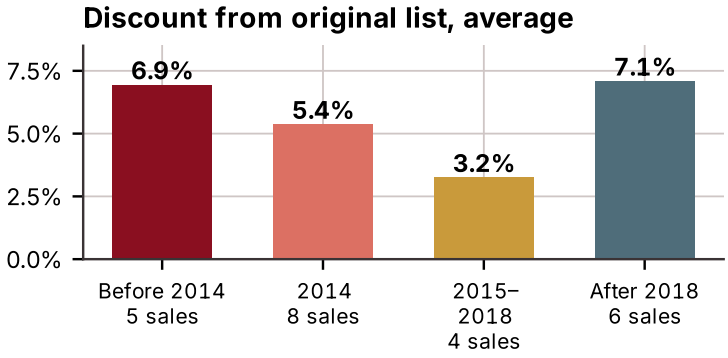

The median is **43 days** for homes built after 2018 and **72 days** for homes built before 2014. It does not move in a straight line; homes built before 2014 are highest. Defined in 8.1.5.

Not tested: too few sales.

 © 2026 Alexander Tiffany Southwest, LLC

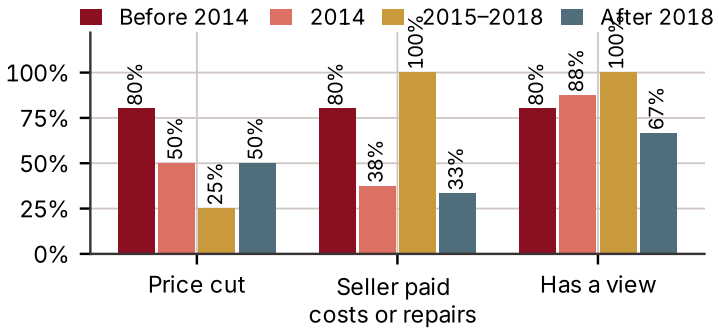

5.7 Discount from original list: described, not tested

The average is **7.1%** for homes built after 2018 and **6.9%** for homes built before 2014. It does not move in a straight line; homes built after 2018 are highest. Defined in 8.1.6.

Not tested: too few sales.

5.8 How often: price cut before sale, seller paid closing costs or repairs, has a view

Each bar is the share of homes in the group, in percent.

- 50% of homes built after 2018 had a price cut before sale, against 80% of homes built before 2014. Defined in 8.1.7.
- 33% of homes built after 2018 had the seller pay closing costs or repairs, against 80% of homes built before 2014. Defined in 8.1.8.
- 67% of homes built after 2018 have a view, against 80% of homes built before 2014. Defined in 8.1.9.

Price cut before sale: Not tested: too few sales.
Seller paid closing costs or repairs: Not tested: too few sales.
Has a view: Not tested: too few sales.

5.9 The numbers: price and size

	Before 2014 5 sales	2014 8 sales	2015–2018 4 sales	After 2018 6 sales	All 23 sales
Net sale price average	$868,484	$1,095,294	$988,888	$1,037,333	$1,012,362

7. New construction

Basic statistics · 0 sales · November 9, 2025 – November 8, 2026

Homes sold new by the builder in the same 365 days. They are left out of every other section and shown here as basic figures only: 0 sales, no groups, no tests.

> **Note**: these are only the new-construction sales reported in ABOR MLS. Builders often sell homes without listing them in the MLS, so these figures do not necessarily represent all new-construction sales in Rim Rock.

No new-construction sales were reported in ABOR MLS in this window.

Same definitions as the rest of the study (section 8). New construction = NewConstructionYN true, or PropertyCondition “New Construction” or “Under Construction”.

© 2026 Alexander Tiffany Southwest, LLC

8. Appendix

Measures, methods and tests

Each measure and method three ways: in plain words, as statistics, and with the data from this study.

8.1 Measures

8.1.1 Net sale price

In simple terms What the seller actually kept: the closing price, less money the seller gave back to the buyer for closing costs or repairs. It is the truest price for comparing homes.

Statistically Net = ClosePrice − ACTRIS_BuyersClsgCostPdbySell − ACTRIS_RepairsAmount (a blank counts as $0). Summarized by the arithmetic mean in the slices.

The data 23 resale sales. Average $1,012,362; median $940,000; standard deviation $207,137; middle half (25th–75th percentile) $857,376–$1,183,500; lowest $722,500, highest $1,449,000. 13 sales had a seller payment; their median payment was $3,000.

8.1.2 Net price per SF

In simple terms Net sale price divided by the heated and cooled square feet. It puts homes of different sizes on the same footing: did buyers pay more for each square foot, not just for more square feet?

Statistically psf = Net ÷ LivingArea, per sale; summarized by the mean of the per-sale ratios.

The data 23 resale sales. Average $302; median $294; standard deviation $60; middle half (25th–75th percentile) $252–$340; lowest $206, highest $413.

8.1.3 Living area

In simple terms The heated and cooled space, as listed in the MLS. Garages and porches are not counted.

Statistically RESO LivingArea, in square feet. Sales under 400 SF are treated as entry errors and left out.

The data 23 resale sales. Average 3,379; median 3,462; standard deviation 427; middle half (25th–75th percentile) 3,234–3,705; lowest 2,368, highest 4,037.

8.1.4 Year built

In simple terms The year the home was finished, as listed in the MLS. It shows whether a group leans to older or newer phases of the community.

Statistically RESO YearBuilt; summarized by the median, with the 25th–75th percentile (middle half) on the charts.

The data 23 resale sales. Average 2015; median 2014; standard deviation 3; middle half (25th–75th percentile) 2014–2018; lowest 2009, highest 2024.

© 2026 Alexander Tiffany Southwest, LLC

8.1.5 Days on market

In simple terms How many days the home was on the market before the buyer's offer was accepted, counting any earlier listing periods (relists). This is the days on market agents and clients quote.

Statistically CDOM = max(CumulativeDaysOnMarket, DaysOnMarket, PurchaseContractDate − ListingContractDate). The MLS counter can freeze at a price change, so the contract-date gap is a floor. Summarized by the median, because a few homes that sat for months pull an average up.

The data 23 resale sales. Average 62; median 51; standard deviation 61; middle half (25th–75th percentile) 7–94; lowest 1, highest 217. 0 sales went under contract on their listing date (0 days).

8.1.6 Discount from original list

In simple terms How far below the first asking price the home sold, after seller payments. It measures how much negotiating room sellers gave up. A negative figure means the home sold above its first asking price.

Statistically Discount % = (OriginalListPrice − Net) ÷ OriginalListPrice × 100, per sale; summarized by the mean.

The data 23 resale sales. Average 5.8%; median 5.5%; standard deviation 5.2%; middle half (25th–75th percentile) 1.8%–9.6%; lowest −2.9%, highest 18.3%. 2 sales closed above their first asking price.

8.1.7 Price cut before sale

In simple terms The asking price was lowered at least once before the home went under contract.

Statistically Indicator: ListPrice at close < OriginalListPrice. Reported as the share of sales (%).

The data 12 of 23 resale sales (52.2%).

8.1.8 Seller paid closing costs or repairs

In simple terms The seller paid some of the buyer's closing costs or repairs.

Statistically Indicator: ACTRIS_BuyersCIsgCostPdbySell + ACTRIS_RepairsAmount > 0. Reported as the share of sales (%).

The data 13 of 23 resale sales (56.5%).

8.1.9 Has a view

In simple terms The MLS says the home looks over something: a greenbelt or park, trees, golf course, hill country, water and similar.

Statistically View = the View field holds any entry other than “None”, “Neighborhood” or “See Remarks”. No view = only “None” and/or “Neighborhood”. A record whose only entry is “See Remarks” cannot be classified and is left out of the view slice.

The data 19 sales with a view, 4 without, 0 unclassified. Most common View entries: Hill Country 14, Trees/Woods 12, Neighborhood 5, Park/Greenbelt 5, Panoramic 4, None 2, Pool 2, Pond 1.

 © 2026 Alexander Tiffany Southwest, LLC

8.2 Methods

8.2.1 Data source

In simple terms Every figure comes from the Austin Board of REALTORS® MLS, read live by ALEX. No figure is estimated or typed in.

Statistically ABOR MLS via secure APIs, read from ALEX's copy of the MLS (refreshed every 15 minutes; this pull as of 2026-11-09 11:15 UTC), every field. Filter: StandardStatus = Closed, PropertyType = Residential, City = Driftwood, SubdivisionName contains any of “rim rock” (case-insensitive). A record is kept when its subdivision name belongs to the Rim Rock family, the same rule comparable sales use.

The data Pulled November 9, 2026: 23 closed Rim Rock records over the prior year, in ZIP 78619. 10 subdivision spellings kept: Rim Rock Ph Two Sec Four (5); Rim Rock Ph 1 Sec 1 (3); Rim Rock (3); Rim Rock Ph Three Sec Three (3); Rim Rock Ph Two Sec Three (3); Rim Rock Ph Two Sec Two (2); Rim Rock Ph 01 Sec 03 (1); Rim Rock Ph Two Sec Five (1); Rim Rock Ph One Sec Five (1); Rim Rock Ph One Sec Four (1). Names found by the search but not part of Rim Rock, left out: Rim Rock Ranch Ph 1 Sec 3 (1).

8.2.2 Study window

In simple terms The most recent 365 days of closed sales: recent enough to describe today's market, long enough to give each group plenty of sales. The usual window is 180 days; it holds only 12 resale sales here (under 80), so the full year is used.

Statistically CloseDate from November 9, 2025 to November 8, 2026 inclusive.

The data 23 single-family sales in the window: 23 resale, 0 new construction.

8.2.3 Resale and new construction

In simple terms A resale home was previously owned. New construction is sold by the builder and behaves differently, so it is kept out of every analysis and reported once on its own.

Statistically New construction = NewConstructionYN true, or PropertyCondition contains “New Construction” or “Under Construction”. Everything else is resale.

The data 23 resale; 0 new construction.

8.2.4 Sales left out

In simple terms A few records cannot be used as entered and are left out before any analysis.

Statistically Excluded: PropertySubType other than Single Family Residence; no OriginalListPrice; LivingArea under 400 SF; seller payments above 10% of ClosePrice (treated as entry errors).

The data None in this window.

8.2.5 Quartiles and groups

In simple terms Sales lined up from lowest to highest and cut into four groups of about equal size. Each group is named by its range, for example “Under $865K”.

Statistically Sort by the slicing variable; cut k sits at round(nk/4), k = 1…3. A cut that would split tied values moves to the nearer edge of the tie. A group under 3 sales merges into its smaller neighbor. Range names use the next group's lowest value (“Under”) and the previous group's highest value (“Over”/“After”).

The data **Quartiles by net sale price:** Under $865K: $722,500–$850,000 (6 sales); $865K–$940K: $864,752–$940,000 (6 sales); $945K–$1.15M: $945,000–$1,147,500 (5 sales); Over $1.15M: $1,219,500–$1,449,000 (6 sales)
Quartiles by living area: Under 3,253 SF: 2,368–3,216 SF (6 sales); 3,253–3,462 SF: 3,253–3,462 SF (6 sales); 3,473–3,691 SF: 3,473–3,691 SF (5 sales); Over 3,691 SF: 3,719–4,037 SF (6 sales)
Quartiles by year built: Before 2014: 2009–2013 (5 sales); 2014: 2014–2014 (8 sales); 2015–2018: 2015–2018 (4 sales); After 2018: 2019–2024 (6 sales)
View and no view: View: MLS lists a view (19 sales); No view: None or Neighborhood (4 sales)

8.2.6 Average and median

In simple terms The average adds the values and divides by how many; one very expensive home can pull it up. The median is the middle value, with half above and half below.

Statistically Mean $\bar{x} = (1/n)\ \Sigma\ x_i$; median = 50th percentile. Price, price per SF, living area and discount use the mean; days on market and year built use the median (skewed or whole-year values).

The data Net sale price: average $1,012,362, median $940,000. Days on market: average 62, median 51: the average is pulled up by a few long listings.

8.2.7 Kruskal–Wallis test

In simple terms Checks whether a measure really differs across the four groups of a slice. It uses each sale's rank, not its value, so a few extreme sales cannot drive the answer.

Statistically $H = [12/(n(n+1))]\ \Sigma\ R_j^2/n_j - 3(n+1)$, compared with χ^2 on k − 1 degrees of freedom (Kruskal & Wallis, 1952). Effect size $\varepsilon^2 = H/(n-1)$: ≥ .01 small, ≥ .06 medium, ≥ .14 large (Tomczak & Tomczak, 2014). A slice is tested only when every group has at least 5 sales; smaller groups are described, not tested.

The data Run on every measure in sections 3–5; each result is in 8.3.

8.2.8 Mann–Whitney U test

In simple terms The same check when there are only two groups: view against no view.

Statistically Two-sided U test (Mann & Whitney, 1947). Effect size = rank-biserial correlation $|1 - 2U/(n_1 n_2)|$: ≥ .10 small, ≥ .30 medium, ≥ .50 large (Kerby, 2014; Cohen, 1988).

The data Run on every measure in section 6; results in 8.3.

8.2.9 Chi-square test

In simple terms Checks whether a yes/no share (price cut, seller payment, view) differs between groups more than chance would.

Statistically Pearson χ^2 on the 2 × k table of counts, no continuity correction (Pearson, 1900). Effect size Cramér's V = $\sqrt{(\chi^2/n)}$: ≥ .10 small, ≥ .30 medium, ≥ .50 large (Cramér, 1946).

The data Run on the three shares in every slice; results in 8.3.

8.2.10 Real difference (significance)

In simple terms "Real difference" means a gap this large would be very unlikely if the groups were really alike. Because many measures are checked in each slice, the bar is set higher than usual.

Statistically Significant when $p < 0.05 \div m$, where m is the number of measures tested in that slice (Bonferroni; Dunn, 1961). The slicing variable itself differs by design and is not tested.

The data Quartiles by net sale price: m = 8, threshold $p < 0.0063$; Quartiles by living area: m = 8, threshold $p < 0.0063$

8.2.11 Size of a difference

In simple terms A difference can be real but small. The size word (small, medium, large) says how much the groups pull apart.

Statistically ε^2 for Kruskal–Wallis, rank-biserial r for Mann–Whitney, Cramér's V for chi-square, with the thresholds above; below the small threshold the size is "negligible".

The data 1 real differences across the four slices; sizes are listed in 8.3.

8.2.12 Rounding in the text

In simple terms Headings and sentences round figures so they read easily; the tables at the end of each section give them in full.

Statistically Prices in headings round to the nearest $1K; price per SF and days on market to the nearest whole number; living area to the nearest 10 SF; shares and percentage gaps to whole percents.

The data Days on market is always shown in days.

8.3 Test results

Every test behind every gold box. Statistic, degrees of freedom (df), p-value, the threshold it must beat, and the size of the difference.

8.3.1 Quartiles by net sale price

Measure	Test	Statistic	df	p-value	Threshold	Real difference?	Effect size	Size
Net price per SF	Kruskal–Wallis	$H = 15.47$	3	0.0015	$p < 0.0063$	**Yes**	$\varepsilon^2 = 0.703$	large
Living area	Kruskal–Wallis	$H = 3.34$	3	0.3424	$p < 0.0063$	**Unclear**	$\varepsilon^2 = 0.152$	large
Year built	Kruskal–Wallis	$H = 3.37$	3	0.3379	$p < 0.0063$	**Unclear**	$\varepsilon^2 = 0.153$	large
Days on market	Kruskal–Wallis	$H = 3.68$	3	0.2978	$p < 0.0063$	**Unclear**	$\varepsilon^2 = 0.167$	large
Discount from original list	Kruskal–Wallis	$H = 4.04$	3	0.2575	$p < 0.0063$	**Unclear**	$\varepsilon^2 = 0.183$	large
Price cut before sale	Chi-square	$\chi^2 = 1.49$	3	0.6840	$p < 0.0063$	**Unclear**	Cramér's V = 0.255	small
Seller paid closing costs or repairs	Chi-square	$\chi^2 = 6.59$	3	0.0863	$p < 0.0063$	**Unclear**	Cramér's V = 0.535	large
Has a view	Chi-square	$\chi^2 = 2.35$	3	0.5029	$p < 0.0063$	**Unclear**	Cramér's V = 0.320	medium

8.3.2 Quartiles by living area

Measure	Test	Statistic	df	p-value	Threshold	Real difference?	Effect size	Size
Net sale price	Kruskal–Wallis	H = 2.17	3	0.5387	p < 0.0063	**Unclear**	$\varepsilon^2 = 0.098$	medium
Net price per SF	Kruskal–Wallis	H = 4.86	3	0.1822	p < 0.0063	**Unclear**	$\varepsilon^2 = 0.221$	large
Year built	Kruskal–Wallis	H = 3.29	3	0.3485	p < 0.0063	**Unclear**	$\varepsilon^2 = 0.150$	large
Days on market	Kruskal–Wallis	H = 3.78	3	0.2863	p < 0.0063	**Unclear**	$\varepsilon^2 = 0.172$	large
Discount from original list	Kruskal–Wallis	H = 5.81	3	0.1211	p < 0.0063	**Unclear**	$\varepsilon^2 = 0.264$	large
Price cut before sale	Chi-square	$\chi^2 = 4.16$	3	0.2443	p < 0.0063	**Unclear**	Cramér's V = 0.426	medium
Seller paid closing costs or repairs	Chi-square	$\chi^2 = 1.16$	3	0.7622	p < 0.0063	**Unclear**	Cramér's V = 0.225	small
Has a view	Chi-square	$\chi^2 = 2.35$	3	0.5029	p < 0.0063	**Unclear**	Cramér's V = 0.320	medium

8.3.3 Quartiles by year built

Too few sales in a group to test.

8.3.4 View and no view

Too few sales in a group to test.

8.4 Data notes

Left out of the analysis: 0 new-construction sales (basic statistics only, section 7); nothing else. Statistics: Python, NumPy 2.5.3, SciPy 1.18.1.
