# 1. Summary

Resale homes · 31 sales · November 24, 2025 – November 23, 2026

This study looks at the **31 resale homes** sold in Bee Cave in the **365 days** to November 23, 2026. A full year is used because only 14 resale homes sold in the last 180 days. New construction is left out and shown on its own in section 7. The homes are compared four ways: **by price**, **by living area**, **by year built** and **with or without a view**. The first three are split into four equal groups (quartiles), each named by its range.

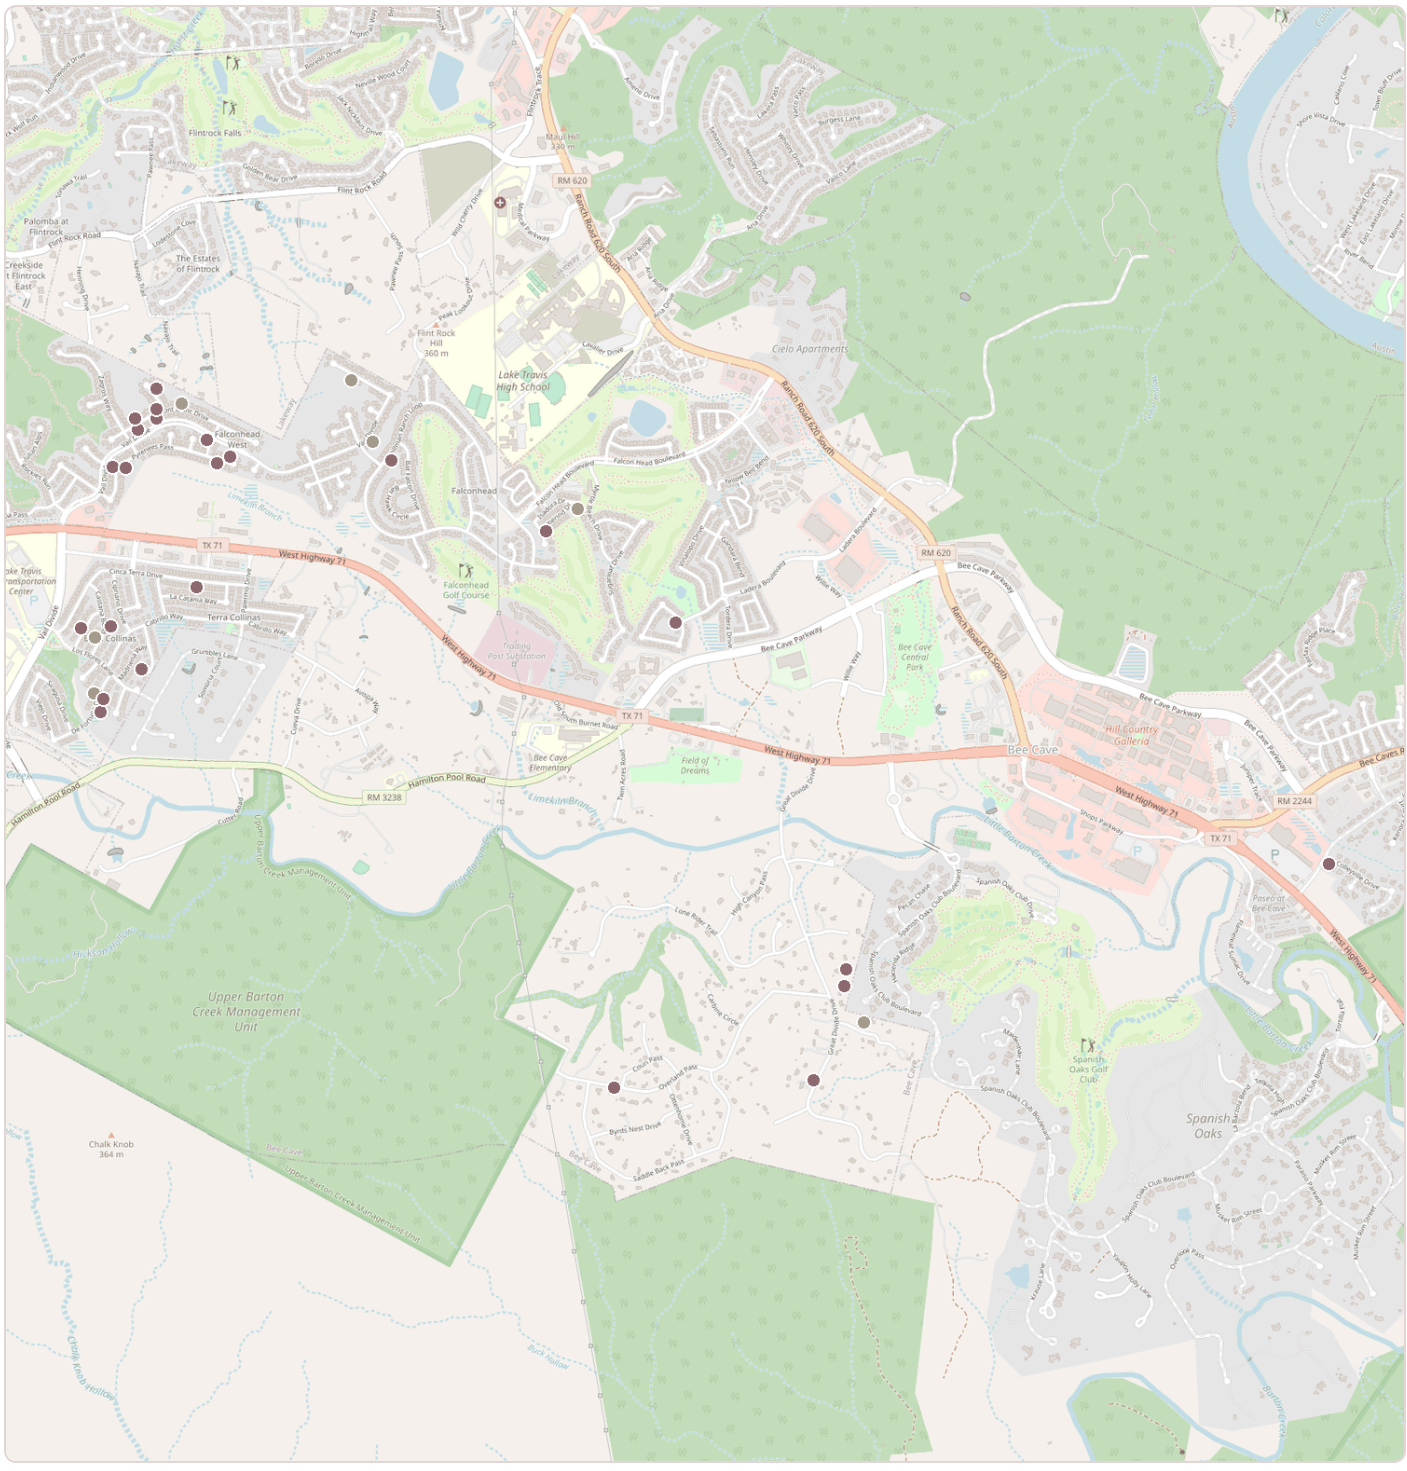

Each comparison has its own section (3–6) with everything about it in one place: the key differences, a table of every measure at a glance, the charts and the numbers.

# 2. Where the resale homes sold

31 resale homes · colored by price range

Each dot is one resale home, colored by its price range.

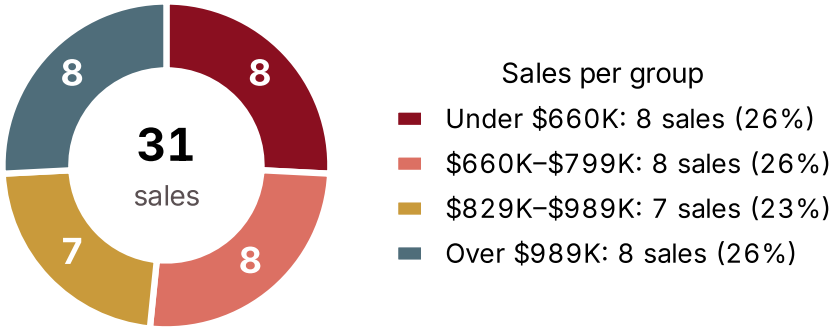

● Under $660K · 8 sales ● $660K–$799K · 8 sales ● $829K–$989K · 7 sales ● Over $989K · 8 sales

© 2026 Alexander Tiffany Southwest, LLC

# 3. Quartiles by net sale price

Resale homes · 31 sales · November 24, 2025 – November 23, 2026

Sales ranked by net sale price and cut into four equal groups. This is the usual way to read a market by price.

**Bottom line**

- Homes over $989K are about 1,570 SF (67%) larger than homes under $660K.

## 3.1 Key differences

The top group against the bottom group. Only real differences are listed. Section 8 explains each measure.

Under $660K $660K–$799K $829K–$989K Over $989K

**Higher-priced homes** Over $989K

- Are much larger.

**Lower-priced homes** Under $660K

- Are much smaller.

## 3.2 At a glance

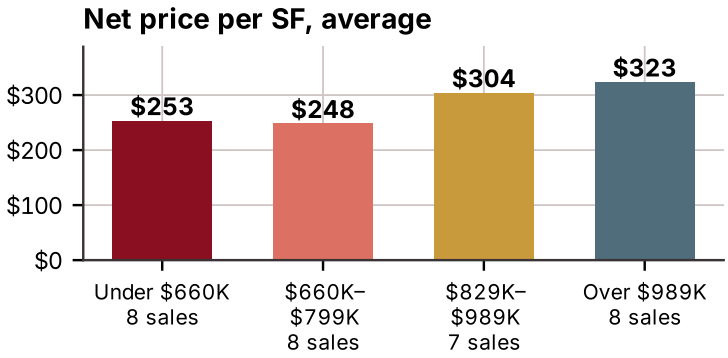

Shaded rows are real differences; the darkest cell is the highest. Gray rows show no clear difference. Prices are averages; days on market and year built are medians.

| | Under $660K | $660K–$799K | $829K–$989K | Over $989K | Real difference? |
|---|---|---|---|---|---|
| Net price per SF | $253 per SF | $248 per SF | $304 per SF | $323 per SF | unclear |
| **Living area** | 2,360 SF **Smallest** | 3,092 SF | 3,158 SF | 3,931 SF **Largest** | ✓ large |
| Year built | 2010 | 2012 | 2009 | 2003 | unclear |
| Days on market | 43 days | 53 days | 21 days | 89 days | unclear |
| Discount from original list | 6.6% | 5.2% | 5.2% | 9.6% | unclear |
| Price cut before sale | 50% | 50% | 71% | 25% | unclear |
| Seller paid closing costs or repairs | 75% | 62% | 71% | 62% | unclear |
| Has a view | 25% | 50% | 86% | 50% | unclear |

**How to read this section.** Each heading gives the finding. The gold box says whether the gap is real (✓, with its size) or could be chance (–). The section ends with its numbers; the tests are in section 8.3.

---

## 3.3 Net price per SF: no clear difference

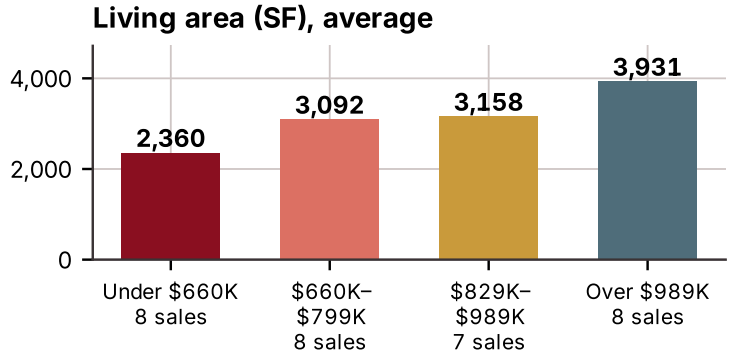

The average is **$323 per SF** for homes over $989K and **$253 per SF** for homes under $660K. It does not move in a straight line; homes over $989K are highest. Defined in 8.1.2.

**– No clear difference** · could be chance

 © 2026 Alexander Tiffany Southwest, LLC

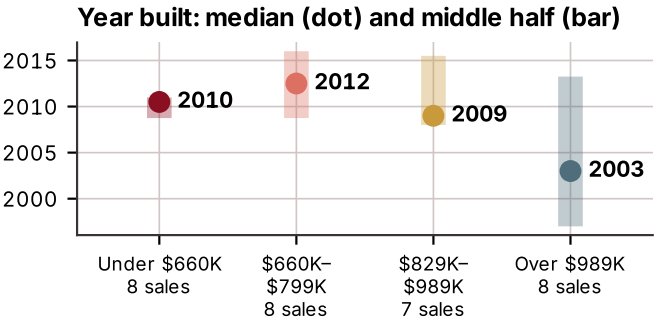

## 3.4 Homes over $989K are about 1,570 SF (67%) larger than homes under $660K

The average is **3,931 SF** for homes over $989K and **2,360 SF** for homes under $660K. It rises step by step from the lowest range to the highest. Defined in 8.1.3.

✓ **Real difference** · large

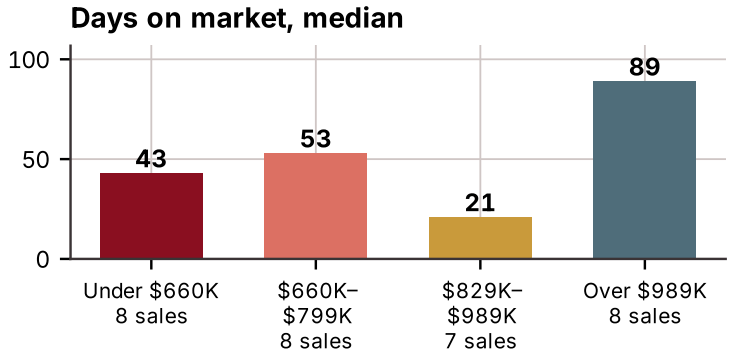

## 3.5 Year built: no clear difference

The median is **2003** for homes over $989K and **2010** for homes under $660K. It does not move in a straight line; homes $660K–$799K are highest. Defined in 8.1.4.

– **No clear difference** · could be chance

## 3.6 Days on market: no clear difference

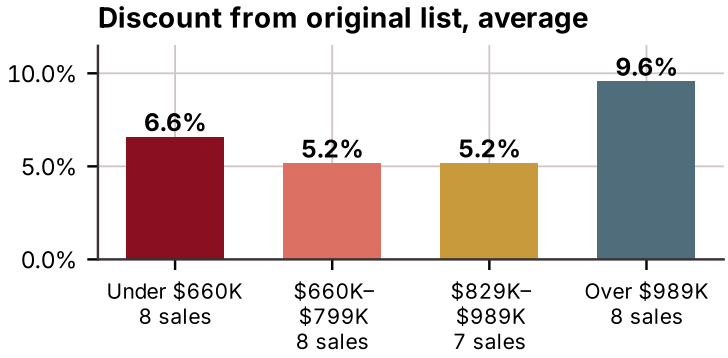

The median is **89 days** for homes over $989K and **43 days** for homes under $660K. It does not move in a straight line; homes over $989K are highest. Defined in 8.1.5.

– **No clear difference** · could be chance

 © 2026 Alexander Tiffany Southwest, LLC

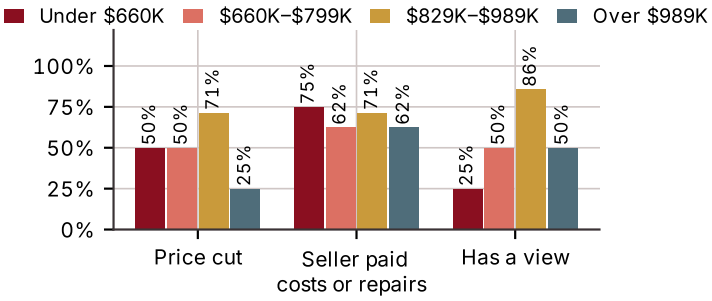

## 3.7 Discount from original list: no clear difference

The average is **9.6%** for homes over $989K and **6.6%** for homes under $660K. It does not move in a straight line; homes over $989K are highest.
Defined in 8.1.6.

**– No clear difference** · could be chance

## 3.8 How often: price cut before sale, seller paid closing costs or repairs, has a view

Each bar is the share of homes in the group, in percent.

- 25% of homes over $989K had a price cut before sale, against 50% of homes under $660K. Defined in 8.1.7.
- 62% of homes over $989K had the seller pay closing costs or repairs, against 75% of homes under $660K. Defined in 8.1.8.
- 50% of homes over $989K have a view, against 25% of homes under $660K. Defined in 8.1.9.

Price cut before sale: **– No clear difference** · could be chance
Seller paid closing costs or repairs: **– No clear difference** · could be chance
Has a view: **– No clear difference** · could be chance

# 4. Quartiles by living area

Resale homes · 31 sales · November 24, 2025 – November 23, 2026

Sales ranked by living area and cut into four equal groups, from the smallest homes to the largest.

Sales per group

- Under 2,463 SF: 8 sales (26%)
- 2,463–3,191 SF: 8 sales (26%)
- 3,208–3,590 SF: 7 sales (23%)
- Over 3,590 SF: 8 sales (26%)

**Bottom line**

- Homes over 3,590 SF sell for about $401K (58%) more than homes under 2,463 SF.

## 4.1 Key differences

The top group against the bottom group. Only real differences are listed. Section 8 explains each measure.

Under 2,463 SF · 2,463–3,191 SF · 3,208–3,590 SF · Over 3,590 SF

**Larger homes** Over 3,590 SF

- Sell for much more.

**Smaller homes** Under 2,463 SF

- Sell for much less.

# 5. Quartiles by year built

Resale homes · 31 sales · November 24, 2025 – November 23, 2026

Sales ranked by year built and cut into four groups, from the oldest to the newest. Homes built in the same year always stay in the same group, so group sizes can differ a little.

Sales per group

- Before 2008: 7 sales (23%)
- 2008–2010: 9 sales (29%)
- 2011–2014: 8 sales (26%)
- After 2014: 7 sales (23%)

**Bottom line**

- Homes built after 2014 sell for about $117 per SF (30%) less than homes built before 2008.

## 5.1 Key differences

The top group against the bottom group. Only real differences are listed. Section 8 explains each measure.

Before 2008 2008–2010 2011–2014 After 2014

**Newer homes** After 2014

- Sell for less per square foot.

**Older homes** Before 2008

- Sell for more per square foot.

# 7. New construction

Basic statistics · 0 sales · November 24, 2025 – November 23, 2026

Homes sold new by the builder in the same 365 days. They are left out of every other section and shown here as basic figures only: 0 sales, no groups, no tests.

> **Note**: these are only the new-construction sales reported in ABOR MLS. Builders often sell homes without listing them in the MLS, so these figures do not necessarily represent all new-construction sales in Bee Cave.

No new-construction sales were reported in ABOR MLS in this window.

Same definitions as the rest of the study (section 8). New construction = NewConstructionYN true, or PropertyCondition “New Construction” or “Under Construction”.

# 8. Appendix

Measures, methods and tests

Each measure and method three ways: in plain words, as statistics, and with the data from this study.

## 8.1 Measures

### 8.1.1 Net sale price

**In simple terms** What the seller actually kept: the closing price, less money the seller gave back to the buyer for closing costs or repairs. It is the truest price for comparing homes.

**Statistically** Net = ClosePrice − ACTRIS_BuyersClsgCostPdbySell − ACTRIS_RepairsAmount (a blank counts as $0). Summarized by the arithmetic mean in the slices.

**The data** 31 resale sales. Average $864,991; median $799,000; standard deviation $273,810; middle half (25th–75th percentile) $656,500–$989,692; lowest $535,000, highest $1,700,000. 21 sales had a seller payment; their median payment was $3,700.

### 8.1.2 Net price per SF

**In simple terms** Net sale price divided by the heated and cooled square feet. It puts homes of different sizes on the same footing: did buyers pay more for each square foot, not just for more square feet?

**Statistically** psf = Net ÷ LivingArea, per sale; summarized by the mean of the per-sale ratios.

**The data** 31 resale sales. Average $281; median $250; standard deviation $76; middle half (25th–75th percentile) $227–$316; lowest $199, highest $482.

### 8.1.3 Living area

**In simple terms** The heated and cooled space, as listed in the MLS. Garages and porches are not counted.

**Statistically** RESO LivingArea, in square feet. Sales under 400 SF are treated as entry errors and left out.

**The data** 31 resale sales. Average 3,135; median 3,191; standard deviation 805; middle half (25th–75th percentile) 2,428–3,664; lowest 1,876, highest 5,434.

### 8.1.4 Year built

**In simple terms** The year the home was finished, as listed in the MLS. It shows whether a group leans to older or newer parts of the area.

**Statistically** RESO YearBuilt; summarized by the median, with the 25th–75th percentile (middle half) on the charts.

**The data** 31 resale sales. Average 2008; median 2010; standard deviation 10; middle half (25th–75th percentile) 2008–2014; lowest 1978, highest 2020.

© 2026 Alexander Tiffany Southwest, LLC

### 8.1.5 Days on market

**In simple terms** How many days the home was on the market before the buyer's offer was accepted, counting any earlier listing periods (relists). This is the days on market agents and clients quote.

**Statistically** CDOM = max(CumulativeDaysOnMarket, DaysOnMarket, PurchaseContractDate − ListingContractDate). The MLS counter can freeze at a price change, so the contract-date gap is a floor. Summarized by the median, because a few homes that sat for months pull an average up.

**The data** 31 resale sales. Average 76; median 54; standard deviation 76; middle half (25th–75th percentile) 16–120; lowest 0, highest 266. 1 sales went under contract on their listing date (0 days).

### 8.1.6 Discount from original list

**In simple terms** How far below the first asking price the home sold, after seller payments. It measures how much negotiating room sellers gave up. A negative figure means the home sold above its first asking price.

**Statistically** Discount % = (OriginalListPrice − Net) ÷ OriginalListPrice × 100, per sale; summarized by the mean.

**The data** 31 resale sales. Average 6.7%; median 6.0%; standard deviation 4.6%; middle half (25th–75th percentile) 3.8%–10.0%; lowest 0.0%, highest 17.1%. 0 sales closed above their first asking price.

### 8.1.7 Price cut before sale

**In simple terms** The asking price was lowered at least once before the home went under contract.

**Statistically** Indicator: ListPrice at close < OriginalListPrice. Reported as the share of sales (%).

**The data** 15 of 31 resale sales (48.4%).

### 8.1.8 Seller paid closing costs or repairs

**In simple terms** The seller paid some of the buyer's closing costs or repairs.

**Statistically** Indicator: ACTRIS_BuyersCIsgCostPdbySell + ACTRIS_RepairsAmount > 0. Reported as the share of sales (%).

**The data** 21 of 31 resale sales (67.7%).

### 8.1.9 Has a view

**In simple terms** The MLS says the home looks over something: a greenbelt or park, trees, golf course, hill country, water and similar.

**Statistically** View = the View field holds any entry other than “None”, “Neighborhood” or “See Remarks”. No view = only “None” and/or “Neighborhood”. A record whose only entry is “See Remarks” cannot be classified and is left out of the view slice.

**The data** 16 sales with a view, 14 without, 1 unclassified. Most common View entries: None 12, Hill Country 7, Park/Greenbelt 7, Trees/Woods 7, Neighborhood 6, See Remarks 3, Pool 1, Rural 1.

# 8.2 Methods

## 8.2.1 Data source

**In simple terms** Every figure comes from the Austin Board of REALTORS® MLS, read live by ALEX. No figure is estimated or typed in.

**Statistically** ABOR MLS via secure APIs, read from ALEX's copy of the MLS (refreshed every 15 minutes; this pull as of 2026-11-24 13:15 UTC), every field. Filter: StandardStatus = Closed, PropertyType = Residential, City = Bee Cave.

**The data** Pulled November 24, 2026: 32 closed Bee Cave records over the prior year. ZIP codes: 1, the most sales in 78738.

## 8.2.2 Study window

**In simple terms** The most recent 365 days of closed sales: recent enough to describe today's market, long enough to give each group plenty of sales. The usual window is 180 days; it holds only 14 resale sales here (under 80), so the full year is used.

**Statistically** CloseDate from November 24, 2025 to November 23, 2026 inclusive.

**The data** 31 single-family sales in the window: 31 resale, 0 new construction.

## 8.2.3 Resale and new construction

**In simple terms** A resale home was previously owned. New construction is sold by the builder and behaves differently, so it is kept out of every analysis and reported once on its own.

**Statistically** New construction = NewConstructionYN true, or PropertyCondition contains “New Construction” or “Under Construction”. Everything else is resale.

**The data** 31 resale; 0 new construction.

## 8.2.4 Sales left out

**In simple terms** A few records cannot be used as entered and are left out before any analysis.

**Statistically** Excluded: PropertySubType other than Single Family Residence; no OriginalListPrice; LivingArea under 400 SF; seller payments above 10% of ClosePrice (treated as entry errors).

**The data** 1 sale(s) other than single-family homes (condo, townhome and similar)

## 8.2.5 Quartiles and groups

**In simple terms** Sales lined up from lowest to highest and cut into four groups of about equal size. Each group is named by its range, for example “Under $660K”.

**Statistically** Sort by the slicing variable; cut k sits at round(nk/4), k = 1…3. A cut that would split tied values moves to the nearer edge of the tie. A group under 3 sales merges into its smaller neighbor. Range names use the next group's lowest value (“Under”) and the previous group's highest value (“Over”/“After”).

**The data**
**Quartiles by net sale price:** Under $660K: $535,000–$653,000 (8 sales); $660K–$799K: $660,000–$799,000 (8 sales); $829K–$989K: $828,717–$989,383 (7 sales); Over $989K: $990,000–$1,700,000 (8 sales)
**Quartiles by living area:** Under 2,463 SF: 1,876–2,392 SF (8 sales); 2,463–3,191 SF: 2,463–3,191 SF (8 sales); 3,208–3,590 SF: 3,208–3,590 SF (7 sales); Over 3,590 SF: 3,739–5,434 SF (8 sales)
**Quartiles by year built:** Before 2008: 1978–2006 (7 sales); 2008–2010: 2008–2010 (9 sales); 2011–2014: 2011–2014 (8 sales); After 2014: 2015–2020 (7 sales)
**View and no view:** View: MLS lists a view (16 sales); No view: None or Neighborhood (14 sales)

 © 2026 Alexander Tiffany Southwest, LLC

### 8.2.6 Average and median

**In simple terms** The average adds the values and divides by how many; one very expensive home can pull it up. The median is the middle value, with half above and half below.

**Statistically** Mean $\bar{x} = (1/n)\ \Sigma\ x_i$; median = 50th percentile. Price, price per SF, living area and discount use the mean; days on market and year built use the median (skewed or whole-year values).

**The data** Net sale price: average $864,991, median $799,000. Days on market: average 76, median 54: the average is pulled up by a few long listings.

### 8.2.7 Kruskal–Wallis test

**In simple terms** Checks whether a measure really differs across the four groups of a slice. It uses each sale's rank, not its value, so a few extreme sales cannot drive the answer.

**Statistically** $H = [12/(n(n+1))]\ \Sigma\ R_j^2/n_j - 3(n+1)$, compared with $\chi^2$ on $k - 1$ degrees of freedom (Kruskal & Wallis, 1952). Effect size $\varepsilon^2 = H/(n - 1)$: ≥ .01 small, ≥ .06 medium, ≥ .14 large (Tomczak & Tomczak, 2014). A slice is tested only when every group has at least 5 sales; smaller groups are described, not tested.

**The data** Run on every measure in sections 3–5; each result is in 8.3.

### 8.2.8 Mann–Whitney U test

**In simple terms** The same check when there are only two groups: view against no view.

**Statistically** Two-sided U test (Mann & Whitney, 1947). Effect size = rank-biserial correlation $\left|1 - 2U/(n_1 n_2)\right|$: ≥ .10 small, ≥ .30 medium, ≥ .50 large (Kerby, 2014; Cohen, 1988).

**The data** Run on every measure in section 6; results in 8.3.

### 8.2.9 Chi-square test

**In simple terms** Checks whether a yes/no share (price cut, seller payment, view) differs between groups more than chance would.

**Statistically** Pearson $\chi^2$ on the 2 × k table of counts, no continuity correction (Pearson, 1900). Effect size Cramér's V = $\sqrt{(\chi^2/n)}$: ≥ .10 small, ≥ .30 medium, ≥ .50 large (Cramér, 1946).

**The data** Run on the three shares in every slice; results in 8.3.

### 8.2.10 Real difference (significance)

**In simple terms** “Real difference” means a gap this large would be very unlikely if the groups were really alike. Because many measures are checked in each slice, the bar is set higher than usual.

**Statistically** Significant when $p < 0.05 \div m$, where m is the number of measures tested in that slice (Bonferroni; Dunn, 1961). The slicing variable itself differs by design and is not tested.

**The data** Quartiles by net sale price: m = 8, threshold $p < 0.0063$; Quartiles by living area: m = 8, threshold $p < 0.0063$; Quartiles by year built: m = 8, threshold $p < 0.0063$; View and no view: m = 8, threshold $p < 0.0063$

### 8.2.11 Size of a difference

**In simple terms** A difference can be real but small. The size word (small, medium, large) says how much the groups pull apart.

**Statistically** $\varepsilon^2$ for Kruskal–Wallis, rank-biserial r for Mann–Whitney, Cramér's V for chi-square, with the thresholds above; below the small threshold the size is “negligible”.

**The data** 3 real differences across the four slices; sizes are listed in 8.3.

 © 2026 Alexander Tiffany Southwest, LLC

### 8.2.12 Rounding in the text

**In simple terms** Headings and sentences round figures so they read easily; the tables at the end of each section give them in full.

**Statistically** Prices in headings round to the nearest $1K; price per SF and days on market to the nearest whole number; living area to the nearest 10 SF; shares and percentage gaps to whole percents.

**The data** Days on market is always shown in days.

## 8.3 Test results

Every test behind every gold box. Statistic, degrees of freedom (df), p-value, the threshold it must beat, and the size of the difference.

### 8.3.1 Quartiles by net sale price

| Measure | Test | Statistic | df | p-value | Threshold | Real difference? | Effect size | Size |
|---|---|---|---|---|---|---|---|---|
| Net price per SF | Kruskal–Wallis | H = 4.75 | 3 | 0.1908 | p < 0.0063 | **Unclear** | $\varepsilon^2$ = 0.158 | large |
| Living area | Kruskal–Wallis | H = 15.30 | 3 | 0.0016 | p < 0.0063 | **Yes** | $\varepsilon^2$ = 0.510 | large |
| Year built | Kruskal–Wallis | H = 3.64 | 3 | 0.3034 | p < 0.0063 | **Unclear** | $\varepsilon^2$ = 0.121 | medium |
| Days on market | Kruskal–Wallis | H = 2.41 | 3 | 0.4925 | p < 0.0063 | **Unclear** | $\varepsilon^2$ = 0.080 | medium |
| Discount from original list | Kruskal–Wallis | H = 4.89 | 3 | 0.1798 | p < 0.0063 | **Unclear** | $\varepsilon^2$ = 0.163 | large |
| Price cut before sale | Chi-square | $\chi^2$ = 3.26 | 3 | 0.3537 | p < 0.0063 | **Unclear** | Cramér's V = 0.324 | medium |
| Seller paid closing costs or repairs | Chi-square | $\chi^2$ = 0.44 | 3 | 0.9324 | p < 0.0063 | **Unclear** | Cramér's V = 0.119 | small |
| Has a view | Chi-square | $\chi^2$ = 5.54 | 3 | 0.1360 | p < 0.0063 | **Unclear** | Cramér's V = 0.423 | medium |

© 2026 Alexander Tiffany Southwest, LLC

## 8.3.2 Quartiles by living area

| Measure | Test | Statistic | df | p-value | Threshold | Real difference? | Effect size | Size |
|---|---|---|---|---|---|---|---|---|
| Net sale price | Kruskal–Wallis | H = 14.95 | 3 | 0.0019 | p < 0.0063 | **Yes** | $\varepsilon^2 = 0.498$ | large |
| Net price per SF | Kruskal–Wallis | H = 3.66 | 3 | 0.3004 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.122$ | medium |
| Year built | Kruskal–Wallis | H = 4.18 | 3 | 0.2431 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.139$ | medium |
| Days on market | Kruskal–Wallis | H = 2.12 | 3 | 0.5471 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.071$ | medium |
| Discount from original list | Kruskal–Wallis | H = 2.41 | 3 | 0.4912 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.080$ | medium |
| Price cut before sale | Chi-square | $\chi^2 = 1.11$ | 3 | 0.7742 | p < 0.0063 | **Unclear** | Cramér's V = 0.189 | small |
| Seller paid closing costs or repairs | Chi-square | $\chi^2 = 5.91$ | 3 | 0.1159 | p < 0.0063 | **Unclear** | Cramér's V = 0.437 | medium |
| Has a view | Chi-square | $\chi^2 = 1.76$ | 3 | 0.6247 | p < 0.0063 | **Unclear** | Cramér's V = 0.238 | small |

## 8.3.3 Quartiles by year built

| Measure | Test | Statistic | df | p-value | Threshold | Real difference? | Effect size | Size |
|---|---|---|---|---|---|---|---|---|
| Net sale price | Kruskal–Wallis | H = 8.09 | 3 | 0.0441 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.270$ | large |
| Net price per SF | Kruskal–Wallis | H = 13.83 | 3 | 0.0031 | p < 0.0063 | **Yes** | $\varepsilon^2 = 0.461$ | large |
| Living area | Kruskal–Wallis | H = 1.10 | 3 | 0.7761 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.037$ | small |
| Days on market | Kruskal–Wallis | H = 4.29 | 3 | 0.2314 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.143$ | large |
| Discount from original list | Kruskal–Wallis | H = 7.97 | 3 | 0.0466 | p < 0.0063 | **Unclear** | $\varepsilon^2 = 0.266$ | large |
| Price cut before sale | Chi-square | $\chi^2 = 0.36$ | 3 | 0.9474 | p < 0.0063 | **Unclear** | Cramér's V = 0.109 | small |
| Seller paid closing costs or repairs | Chi-square | $\chi^2 = 1.50$ | 3 | 0.6823 | p < 0.0063 | **Unclear** | Cramér's V = 0.220 | small |
| Has a view | Chi-square | $\chi^2 = 2.01$ | 3 | 0.5704 | p < 0.0063 | **Unclear** | Cramér's V = 0.255 | small |

 © 2026 Alexander Tiffany Southwest, LLC

### 8.3.4 View and no view

| Measure | Test | Statistic | df | p-value | Threshold | Real difference? | Effect size | Size |
|---|---|---|---|---|---|---|---|---|
| Net sale price | Mann–Whitney U | U = 161.00 | — | 0.0438 | p < 0.0063 | **Unclear** | rank-biserial r = 0.438 | medium |
| Net price per SF | Mann–Whitney U | U = 151.00 | — | 0.1095 | p < 0.0063 | **Unclear** | rank-biserial r = 0.348 | medium |
| Living area | Mann–Whitney U | U = 133.00 | — | 0.3941 | p < 0.0063 | **Unclear** | rank-biserial r = 0.188 | small |
| Year built | Mann–Whitney U | U = 79.50 | — | 0.1815 | p < 0.0063 | **Unclear** | rank-biserial r = 0.290 | small |
| Days on market | Mann–Whitney U | U = 145.50 | — | 0.1701 | p < 0.0063 | **Unclear** | rank-biserial r = 0.299 | small |
| Discount from original list | Mann–Whitney U | U = 133.00 | — | 0.3941 | p < 0.0063 | **Unclear** | rank-biserial r = 0.188 | small |
| Price cut before sale | Chi-square | $\chi^2$ = 2.14 | 1 | 0.1432 | p < 0.0063 | **Unclear** | Cramér's V = 0.267 | small |
| Seller paid closing costs or repairs | Chi-square | $\chi^2$ = 1.07 | 1 | 0.3006 | p < 0.0063 | **Unclear** | Cramér's V = 0.189 | small |

## 8.4 Data notes

Left out of the analysis: 0 new-construction sales (basic statistics only, section 7); 1 sale(s) other than single-family homes (condo, townhome and similar). Statistics: Python, NumPy 2.5.3, SciPy 1.18.1.
