1. Summary

Resale homes · 22 sales · November 9, 2025 – November 8, 2026

This study looks at the **22 resale homes** sold in Saxony in the **365 days** to November 8, 2026. A full year is used because only 13 resale homes sold in the last 180 days. New construction is left out and shown on its own in section 7. The homes are compared four ways: **by price**, **by living area**, **by year built** and **with or without a view**. The first three are split into four equal groups (quartiles), each named by its range.

Each comparison has its own section (3–6) with everything about it in one place: the key differences, a table of every measure at a glance, the charts and the numbers.

© 2026 Alexander Tiffany Southwest, LLC

2. Where the resale homes sold

22 resale homes · colored by price range

Each dot is one resale home, colored by its price range.

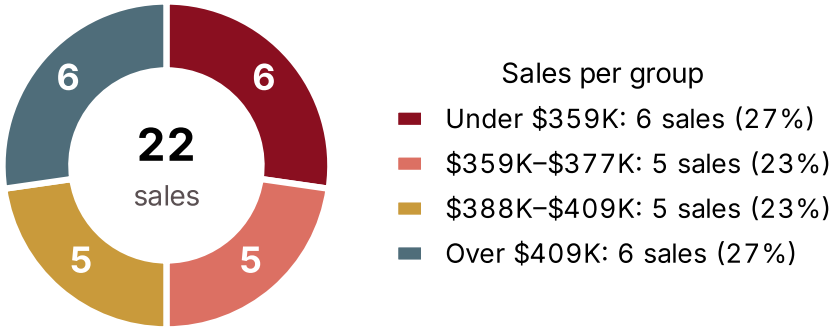

● Under $359K · 6 sales ● $359K–$377K · 5 sales ● $388K–$409K · 5 sales ● Over $409K · 6 sales

© 2026 Alexander Tiffany Southwest, LLC

3. Quartiles by net sale price

Resale homes · 22 sales · November 9, 2025 – November 8, 2026

Sales ranked by net sale price and cut into four equal groups. This is the usual way to read a market by price.

Bottom line: no measure differs enough between the groups to rule out chance.

3.1 Key differences

The top group against the bottom group: no measure differs enough to rule out chance.

3.2 At a glance

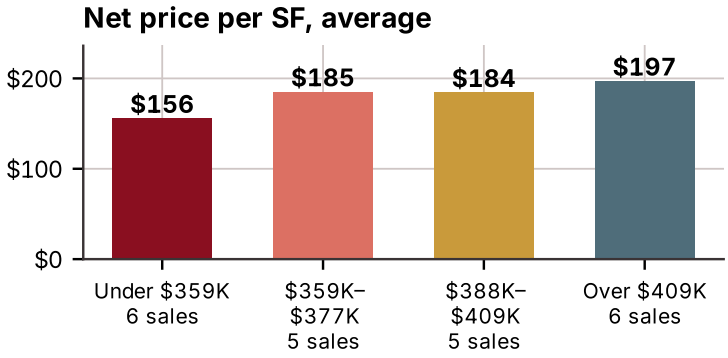

Shaded rows are real differences; the darkest cell is the highest. Gray rows show no clear difference. Prices are averages; days on market and year built are medians.

	Under $359K	$359K–$377K	$388K–$409K	Over $409K	Real difference?
Net price per SF	$156 per SF	$185 per SF	$184 per SF	$197 per SF	unclear
Living area	1,979 SF	2,018 SF	2,192 SF	2,304 SF	unclear
Year built	1992	1993	1992	1992	unclear
Days on market	14 days	34 days	70 days	24 days	unclear
Discount from original list	7.2%	4.3%	4.1%	4.6%	unclear
Price cut before sale	33%	40%	60%	50%	unclear
Seller paid closing costs or repairs	33%	80%	80%	100%	unclear
Has a view	0%	20%	0%	33%	unclear

How to read this section. Each heading gives the finding. The gold box says whether the gap is real (✓, with its size) or could be chance (–). The section ends with its numbers; the tests are in section 8.3.

© 2026 Alexander Tiffany Southwest, LLC

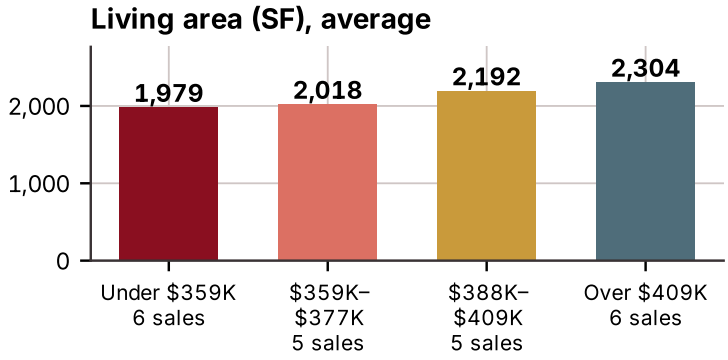

3.3 Net price per SF: no clear difference

The average is **$197 per SF** for homes over $409K and **$156 per SF** for homes under $359K. It does not move in a straight line; homes over $409K are highest. Defined in 8.1.2.

– No clear difference · could be chance

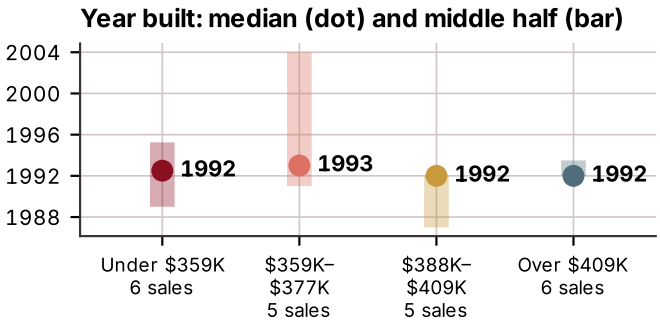

3.4 Living area: no clear difference

The average is **2,304 SF** for homes over $409K and **1,979 SF** for homes under $359K. It rises step by step from the lowest range to the highest. Defined in 8.1.3.

– No clear difference · could be chance

3.5 Year built: no clear difference

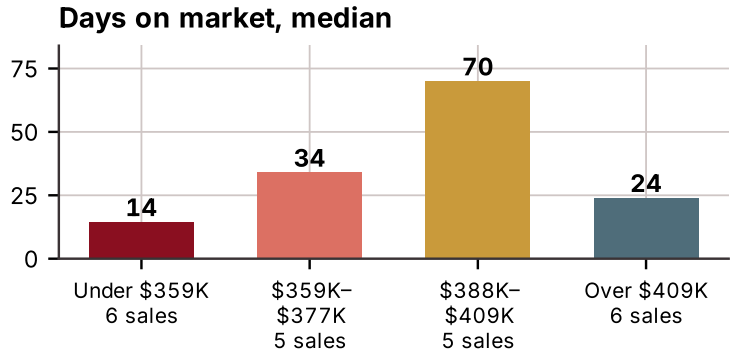

The median is **1992** for homes over $409K and **1992** for homes under $359K. It does not move in a straight line; homes $359K–$377K are highest. Defined in 8.1.4.

– No clear difference · could be chance

 © 2026 Alexander Tiffany Southwest, LLC

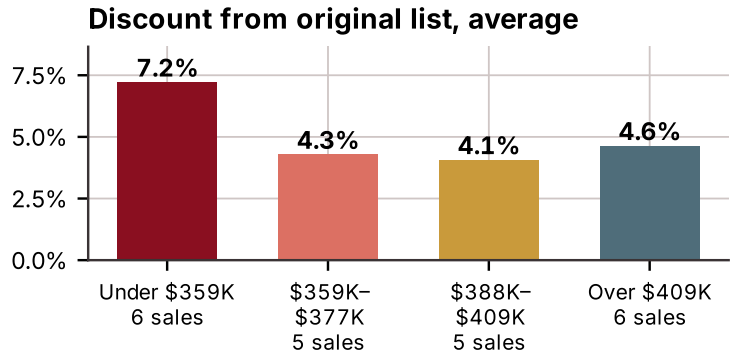

3.6 Days on market: no clear difference

The median is **24 days** for homes over $409K and **14 days** for homes under $359K. It does not move in a straight line; homes $388K–$409K are highest. Defined in 8.1.5.

– No clear difference · could be chance

3.7 Discount from original list: no clear difference

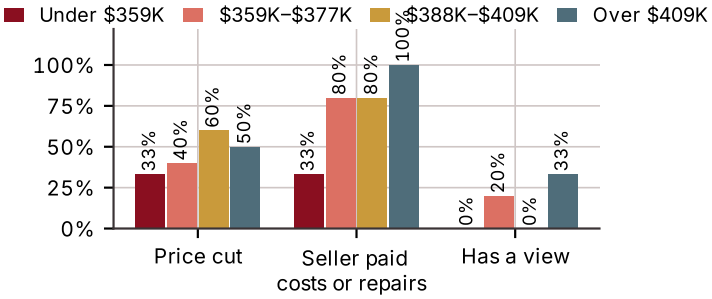

The average is **4.6%** for homes over $409K and **7.2%** for homes under $359K. It does not move in a straight line; homes under $359K are highest. Defined in 8.1.6.

– No clear difference · could be chance

 © 2026 Alexander Tiffany Southwest, LLC

3.8 How often: price cut before sale, seller paid closing costs or repairs, has a view

Each bar is the share of homes in the group, in percent.

- 50% of homes over $409K had a price cut before sale, against 33% of homes under $359K. Defined in 8.1.7.
- 100% of homes over $409K had the seller pay closing costs or repairs, against 33% of homes under $359K. Defined in 8.1.8.
- 33% of homes over $409K have a view, against 0% of homes under $359K. Defined in 8.1.9.

Price cut before sale: **– No clear difference** · could be chance
Seller paid closing costs or repairs: **– No clear difference** · could be chance
Has a view: **– No clear difference** · could be chance

3.9 The numbers: price and size

	Under $359K 6 sales	$359K–$377K 5 sales	$388K–$409K 5 sales	Over $409K 6 sales	All 22 sales	Real difference?
Net sale price average	$303,500	$370,005	$398,500	$449,427	$380,004	by design
Net price per SF average	$156	$185	$184	$197	$180	unclear
Living area average	1,979	2,018	2,192	2,304	2,125	unclear
Year built median	1992	1993	1992	1992	1992	unclear

3.10 The numbers: selling

	Under $359K 6 sales	$359K–$377K 5 sales	$388K–$409K 5 sales	Over $409K 6 sales	All 22 sales	Real difference?
Days on market median	14	34	70	24	27	unclear
Discount from original list average	7.2%	4.3%	4.1%	4.6%	5.1%	unclear
Price cut before sale	33%	40%	60%	50%	45%	unclear
Seller paid closing costs or repairs	33%	80%	80%	100%	73%	unclear
Has a view	0%	20%	0%	33%	14%	unclear

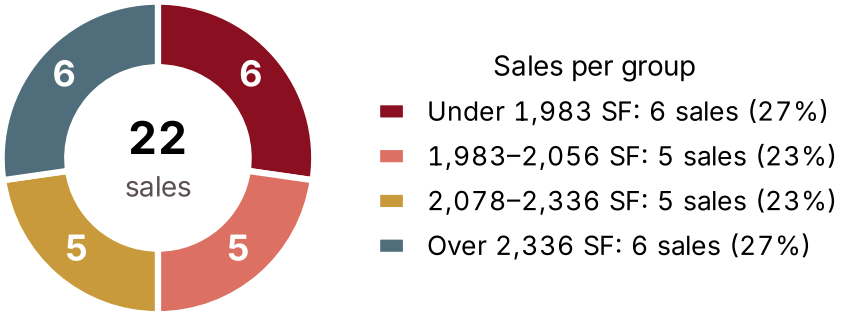

Prices, price per SF, living area and discount are averages; days on market and year built are medians. The test behind each verdict is in 8.3.1.

4. Quartiles by living area

Resale homes · 22 sales · November 9, 2025 – November 8, 2026

Sales ranked by living area and cut into four equal groups, from the smallest homes to the largest.

Bottom line: no measure differs enough between the groups to rule out chance.

4.1 Key differences

The top group against the bottom group: no measure differs enough to rule out chance.

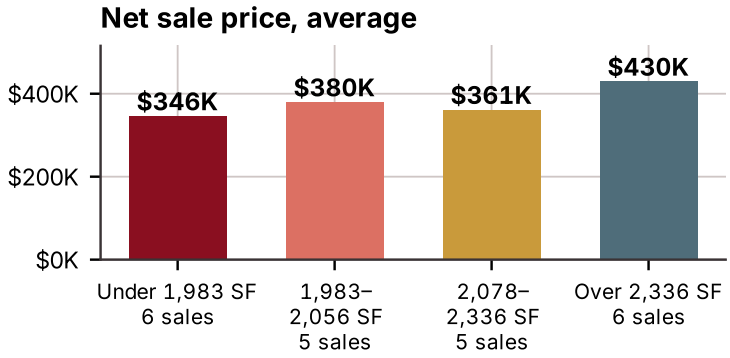

4.2 At a glance

Shaded rows are real differences; the darkest cell is the highest. Gray rows show no clear difference. Prices are averages; days on market and year built are medians.

	Under 1,983 SF	1,983–2,056 SF	2,078–2,336 SF	Over 2,336 SF	Real difference?
Net sale price	$346K	$380K	$361K	$430K	unclear
Net price per SF	$190 per SF	$189 per SF	$168 per SF	$173 per SF	unclear
Year built	1992	1992	1988	1993	unclear
Days on market	20 days	13 days	16 days	55 days	unclear

4.3 Net sale price: no clear difference

The average is **$430K** for homes over 2,336 SF and **$346K** for homes under 1,983 SF. It does not move in a straight line; homes over 2,336 SF are highest. Defined in 8.1.1.

– No clear difference · could be chance

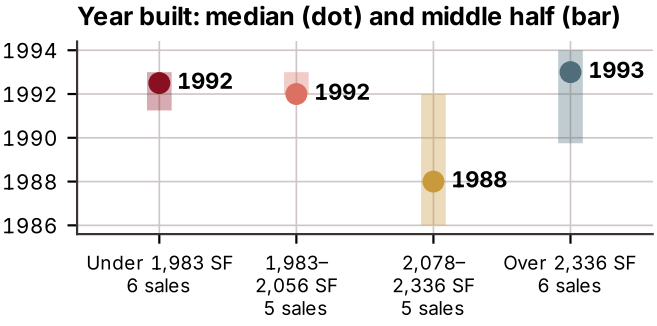

4.4 Net price per SF: no clear difference

The average is **$173 per SF** for homes over 2,336 SF and **$190 per SF** for homes under 1,983 SF. It does not move in a straight line; homes under 1,983 SF are highest.
Defined in 8.1.2.

– No clear difference · could be chance

4.5 Year built: no clear difference

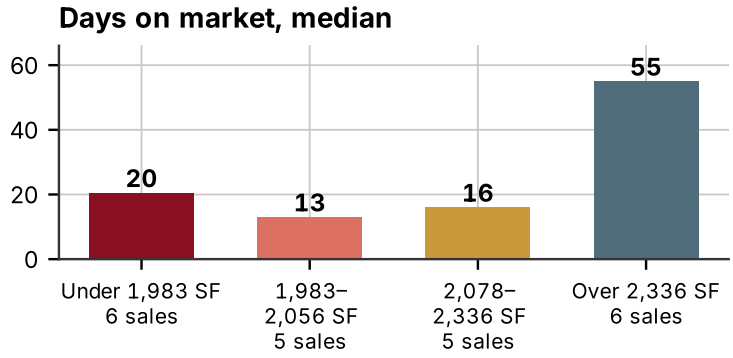

The median is **1993** for homes over 2,336 SF and **1992** for homes under 1,983 SF. It does not move in a straight line; homes over 2,336 SF are highest. Defined in 8.1.4.

– No clear difference · could be chance

 © 2026 Alexander Tiffany Southwest, LLC

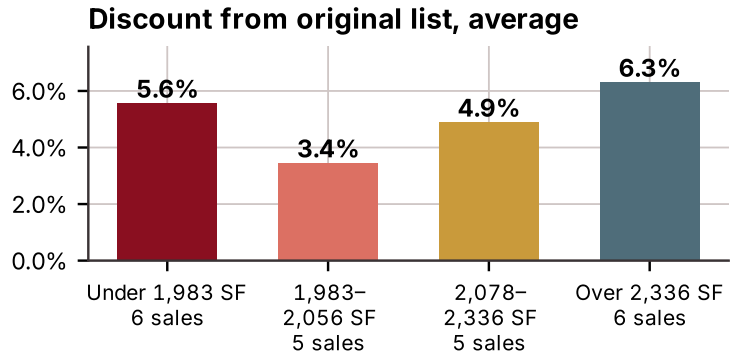

4.6 Days on market: no clear difference

The median is **55 days** for homes over 2,336 SF and **20 days** for homes under 1,983 SF. It does not move in a straight line; homes over 2,336 SF are highest. Defined in 8.1.5.

– No clear difference · could be chance

4.7 Discount from original list: no clear difference

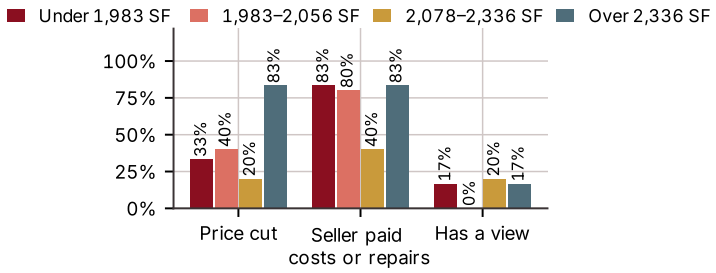

The average is **6.3%** for homes over 2,336 SF and **5.6%** for homes under 1,983 SF. It does not move in a straight line; homes over 2,336 SF are highest. Defined in 8.1.6.

– No clear difference · could be chance

 © 2026 Alexander Tiffany Southwest, LLC

4.8 How often: price cut before sale, seller paid closing costs or repairs, has a view

Each bar is the share of homes in the group, in percent.

- 83% of homes over 2,336 SF had a price cut before sale, against 33% of homes under 1,983 SF. Defined in 8.1.7.
- 83% of homes over 2,336 SF had the seller pay closing costs or repairs, against 83% of homes under 1,983 SF. Defined in 8.1.8.
- 17% of homes over 2,336 SF have a view, against 17% of homes under 1,983 SF. Defined in 8.1.9.

Price cut before sale: **– No clear difference** · could be chance
Seller paid closing costs or repairs: **– No clear difference** · could be chance
Has a view: **– No clear difference** · could be chance

4.9 The numbers: price and size

	Under 1,983 SF 6 sales	1,983–2,056 SF 5 sales	2,078–2,336 SF 5 sales	Over 2,336 SF 6 sales	All 22 sales	Real difference?
Net sale price average	$346,121	$379,758	$361,500	$429,512	$380,004	unclear
Net price per SF average	$190	$189	$168	$173	$180	unclear
Living area average	1,828	2,014	2,155	2,488	2,125	by design
Year built median	1992	1992	1988	1993	1992	unclear

4.10 The numbers: selling

	Under 1,983 SF 6 sales	1,983–2,056 SF 5 sales	2,078–2,336 SF 5 sales	Over 2,336 SF 6 sales	All 22 sales	Real difference?

5. Quartiles by year built

Resale homes · 22 sales · November 9, 2025 – November 8, 2026

Sales ranked by year built and cut into four groups, from the oldest to the newest. Homes built in the same year always stay in the same group, so group sizes can differ a little.

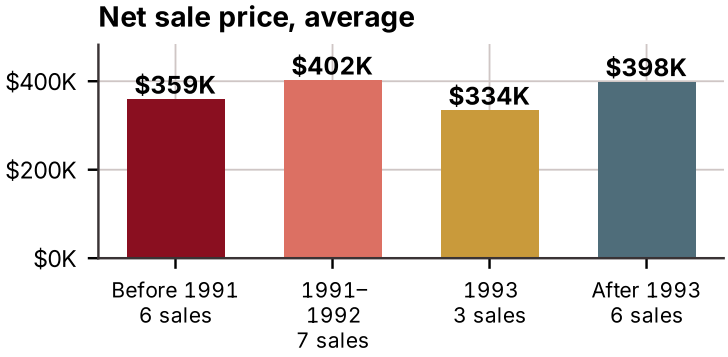

Bottom line: too few sales to test.

5.1 Key differences

The top group against the bottom group: no measure differs enough to rule out chance.

5.3 Net sale price: described, not tested

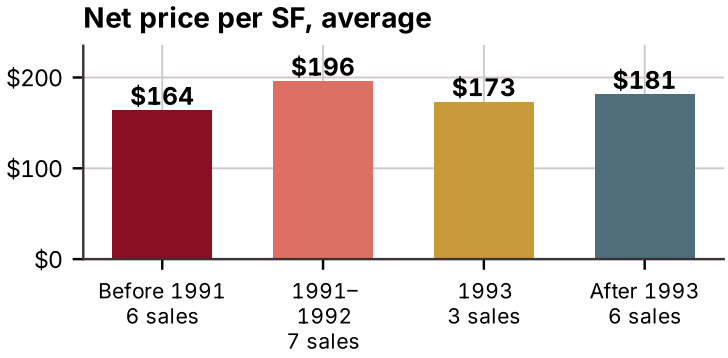

The average is **$398K** for homes built after 1993 and **$359K** for homes built before 1991. It does not move in a straight line; homes built 1991–1992 are highest. Defined in 8.1.1.

Not tested: too few sales.

 © 2026 Alexander Tiffany Southwest, LLC

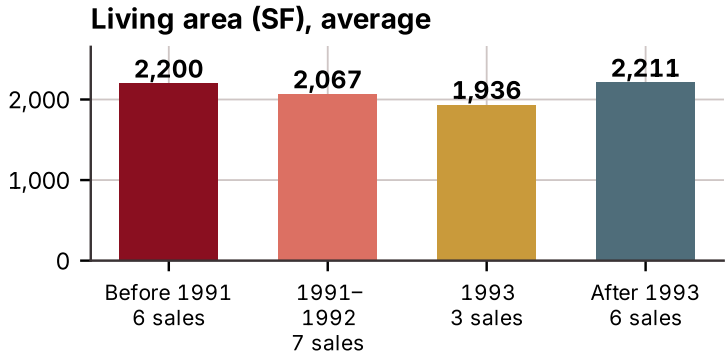

5.4 Net price per SF: described, not tested

The average is **$181 per SF** for homes built after 1993 and **$164 per SF** for homes built before 1991. It does not move in a straight line; homes built 1991–1992 are highest. Defined in 8.1.2.

Not tested: too few sales.

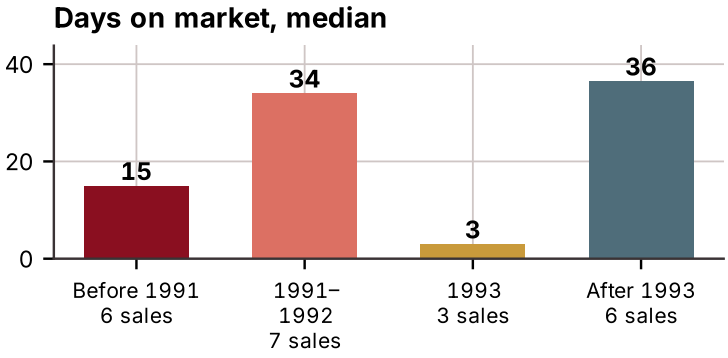

5.5 Living area: described, not tested

The average is **2,211 SF** for homes built after 1993 and **2,200 SF** for homes built before 1991. It does not move in a straight line; homes built after 1993 are highest. Defined in 8.1.3.

Not tested: too few sales.

5.6 Days on market: described, not tested

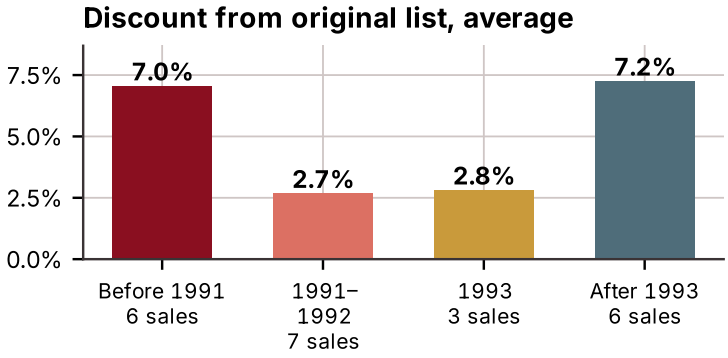

The median is **36 days** for homes built after 1993 and **15 days** for homes built before 1991. It does not move in a straight line; homes built after 1993 are highest. Defined in 8.1.5.

Not tested: too few sales.

 © 2026 Alexander Tiffany Southwest, LLC

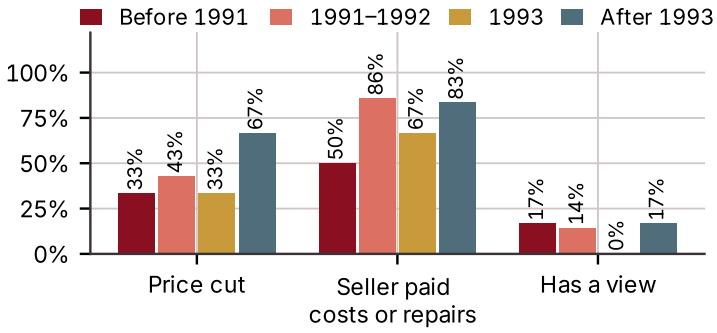

5.7 Discount from original list: described, not tested

The average is **7.2%** for homes built after 1993 and **7.0%** for homes built before 1991. It does not move in a straight line; homes built after 1993 are highest. Defined in 8.1.6.

Not tested: too few sales.

5.8 How often: price cut before sale, seller paid closing costs or repairs, has a view

Each bar is the share of homes in the group, in percent.

- 67% of homes built after 1993 had a price cut before sale, against 33% of homes built before 1991. Defined in 8.1.7.
- 83% of homes built after 1993 had the seller pay closing costs or repairs, against 50% of homes built before 1991. Defined in 8.1.8.
- 17% of homes built after 1993 have a view, against 17% of homes built before 1991. Defined in 8.1.9.

Price cut before sale: Not tested: too few sales.
Seller paid closing costs or repairs: Not tested: too few sales.
Has a view: Not tested: too few sales.

5.9 The numbers: price and size

	Before 1991 6 sales	1991–1992 7 sales	1993 3 sales	After 1993 6 sales	All 22 sales
Net sale price average	$358,916	$402,031	$334,000	$398,396	$380,004
Net price per SF average	$164	$196	$173	$181	$180
Living area average	2,200	2,067	1,936	2,211	2,125

6. View and no view

Resale homes · 22 sales · November 9, 2025 – November 8, 2026

Sales where the MLS lists a view (greenbelt or park, trees, golf course, hill country, water and similar) against those listing none or only the neighborhood. 1 sales whose MLS view entry is only “See Remarks” are left out.

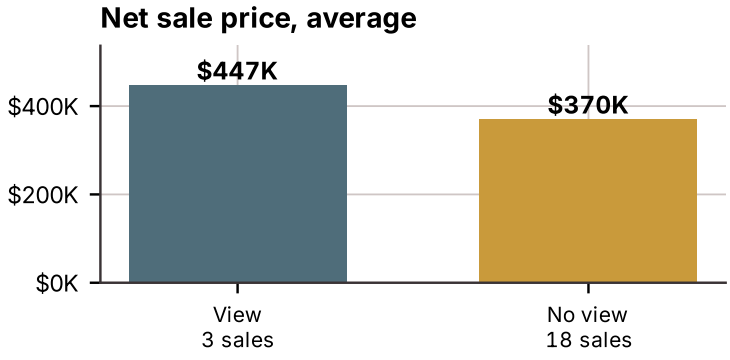

Bottom line: too few sales to test.

6.1 Key differences

The top group against the bottom group: no measure differs enough to rule out chance.

6.3 Net sale price: described, not tested

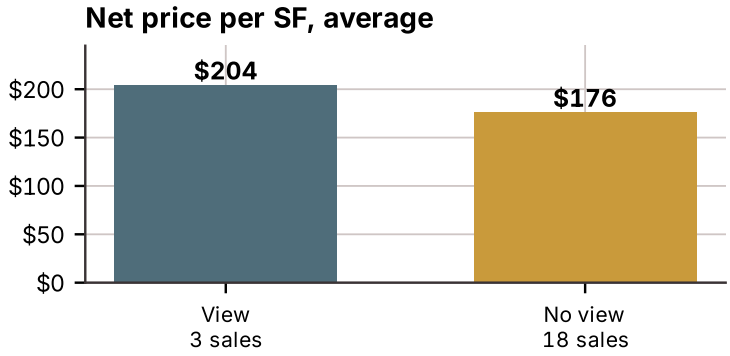

The average is **$447K** for homes with a view and **$370K** for homes without a view. Defined in 8.1.1.

Not tested: too few sales.

 © 2026 Alexander Tiffany Southwest, LLC

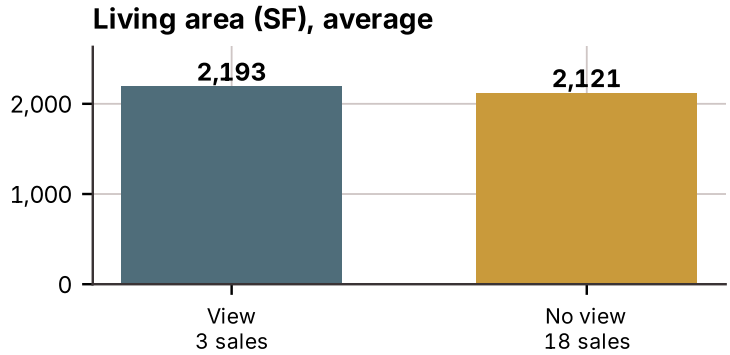

6.4 Net price per SF: described, not tested

The average is **$204 per SF** for homes with a view and **$176 per SF** for homes without a view. Defined in 8.1.2.

Not tested: too few sales.

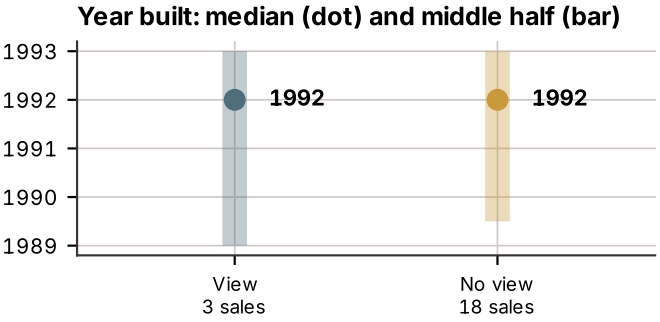

6.5 Living area: described, not tested

The average is **2,193 SF** for homes with a view and **2,121 SF** for homes without a view. Defined in 8.1.3.

Not tested: too few sales.

6.6 Year built: described, not tested

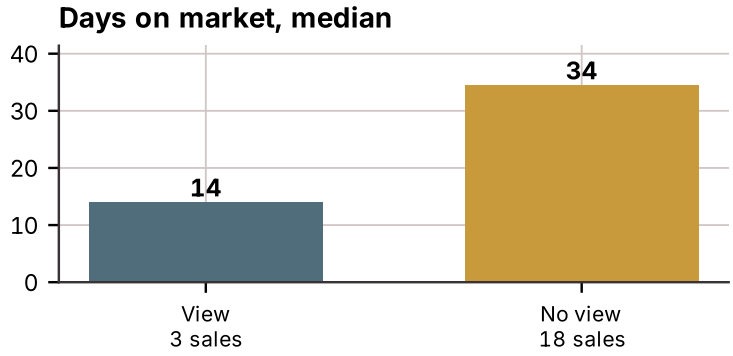

The median is **1992** for homes with a view and **1992** for homes without a view. Defined in 8.1.4.

Not tested: too few sales.

 © 2026 Alexander Tiffany Southwest, LLC

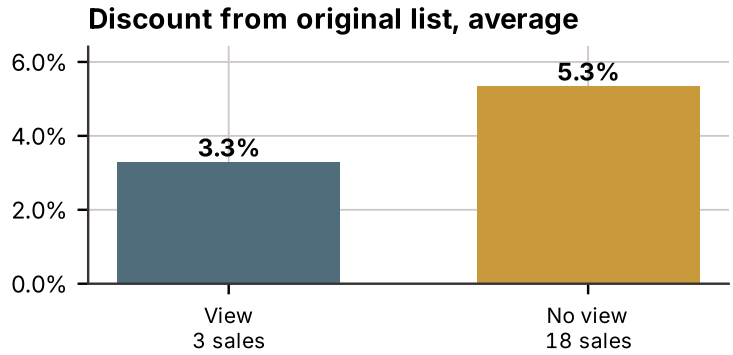

6.7 Days on market: described, not tested

The median is **14 days** for homes with a view and **34 days** for homes without a view. Defined in 8.1.5.

Not tested: too few sales.

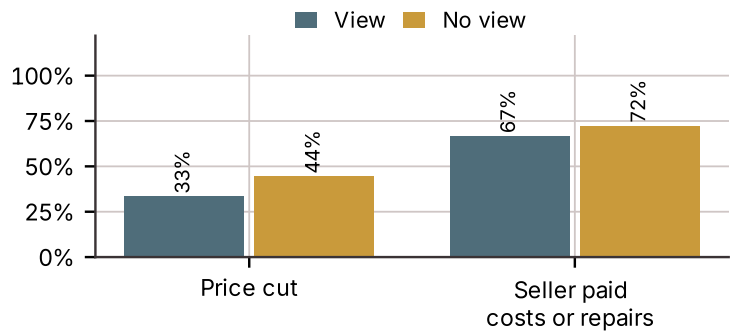

6.8 Discount from original list: described, not tested

The average is **3.3%** for homes with a view and **5.3%** for homes without a view. Defined in 8.1.6.

Not tested: too few sales.

6.9 How often: price cut before sale, seller paid closing costs or repairs

Each bar is the share of homes in the group, in percent.

- 33% of homes with a view had a price cut before sale, against 44% of homes without a view. Defined in 8.1.7.
- 67% of homes with a view had the seller pay closing costs or repairs, against 72% of homes without a view. Defined in 8.1.8.

Price cut before sale: Not tested: too few sales.

Seller paid closing costs or repairs: Not tested: too few sales.

6.10 The numbers: price and size

	View 3 sales	No view 18 sales	All 21 sales
Net sale price average	$447,167	$369,988	$381,014
Net price per SF average	$204	$176	$180
Living area average	2,193	2,121	2,131
Year built median	1992	1992	1992

6.11 The numbers: selling

	View 3 sales	No view 18 sales	All 21 sales
Days on market median	14	34	34
Discount from original list average	3.3%	5.3%	5.0%
Price cut before sale	33%	44%	43%
Seller paid closing costs or repairs	67%	72%	71%

Prices, price per SF, living area and discount are averages; days on market and year built are medians. The test behind each verdict is in 8.3.4.

© 2026 Alexander Tiffany Southwest, LLC

7. New construction

Basic statistics · 0 sales · November 9, 2025 – November 8, 2026

Homes sold new by the builder in the same 365 days. They are left out of every other section and shown here as basic figures only: 0 sales, no groups, no tests.

> **Note**: these are only the new-construction sales reported in ABOR MLS. Builders often sell homes without listing them in the MLS, so these figures do not necessarily represent all new-construction sales in Saxony.

No new-construction sales were reported in ABOR MLS in this window.

Same definitions as the rest of the study (section 8). New construction = NewConstructionYN true, or PropertyCondition “New Construction” or “Under Construction”.

© 2026 Alexander Tiffany Southwest, LLC

8. Appendix

Measures, methods and tests

Each measure and method three ways: in plain words, as statistics, and with the data from this study.

8.1 Measures

8.1.1 Net sale price

In simple terms What the seller actually kept: the closing price, less money the seller gave back to the buyer for closing costs or repairs. It is the truest price for comparing homes.

Statistically Net = ClosePrice − ACTRIS_BuyersClsgCostPdbySell − ACTRIS_RepairsAmount (a blank counts as $0). Summarized by the arithmetic mean in the slices.

The data 22 resale sales. Average $380,004; median $382,500; standard deviation $63,988; middle half (25th–75th percentile) $355,950–$415,428; lowest $250,000, highest $530,000. 16 sales had a seller payment; their median payment was $6,600.

8.1.2 Net price per SF

In simple terms Net sale price divided by the heated and cooled square feet. It puts homes of different sizes on the same footing: did buyers pay more for each square foot, not just for more square feet?

Statistically psf = Net ÷ LivingArea, per sale; summarized by the mean of the per-sale ratios.

The data 22 resale sales. Average $180; median $180; standard deviation $28; middle half (25th–75th percentile) $164–$199; lowest $120, highest $225.

8.1.3 Living area

In simple terms The heated and cooled space, as listed in the MLS. Garages and porches are not counted.

Statistically RESO LivingArea, in square feet. Sales under 400 SF are treated as entry errors and left out.

The data 22 resale sales. Average 2,125; median 2,067; standard deviation 274; middle half (25th–75th percentile) 1,981–2,346; lowest 1,678, highest 2,682.

8.1.4 Year built

In simple terms The year the home was finished, as listed in the MLS. It shows whether a group leans to older or newer phases of the community.

Statistically RESO YearBuilt; summarized by the median, with the 25th–75th percentile (middle half) on the charts.

The data 22 resale sales. Average 1992; median 1992; standard deviation 5; middle half (25th–75th percentile) 1990–1994; lowest 1984, highest 2004.

© 2026 Alexander Tiffany Southwest, LLC

8.1.5 Days on market

In simple terms How many days the home was on the market before the buyer's offer was accepted, counting any earlier listing periods (relists). This is the days on market agents and clients quote.

Statistically CDOM = max(CumulativeDaysOnMarket, DaysOnMarket, PurchaseContractDate − ListingContractDate). The MLS counter can freeze at a price change, so the contract-date gap is a floor. Summarized by the median, because a few homes that sat for months pull an average up.

The data 22 resale sales. Average 38; median 27; standard deviation 39; middle half (25th–75th percentile) 8–56; lowest 1, highest 152. 0 sales went under contract on their listing date (0 days).

8.1.6 Discount from original list

In simple terms How far below the first asking price the home sold, after seller payments. It measures how much negotiating room sellers gave up. A negative figure means the home sold above its first asking price.

Statistically Discount % = (OriginalListPrice − Net) ÷ OriginalListPrice × 100, per sale; summarized by the mean.

The data 22 resale sales. Average 5.1%; median 5.8%; standard deviation 4.8%; middle half (25th–75th percentile) 1.8%–7.0%; lowest −2.8%, highest 20.3%. 1 sales closed above their first asking price.

8.1.7 Price cut before sale

In simple terms The asking price was lowered at least once before the home went under contract.

Statistically Indicator: ListPrice at close < OriginalListPrice. Reported as the share of sales (%).

The data 10 of 22 resale sales (45.5%).

8.1.8 Seller paid closing costs or repairs

In simple terms The seller paid some of the buyer's closing costs or repairs.

Statistically Indicator: ACTRIS_BuyersClsgCostPdbySell + ACTRIS_RepairsAmount > 0. Reported as the share of sales (%).

The data 16 of 22 resale sales (72.7%).

8.1.9 Has a view

In simple terms The MLS says the home looks over something: a greenbelt or park, trees, golf course, hill country, water and similar.

Statistically View = the View field holds any entry other than “None”, “Neighborhood” or “See Remarks”. No view = only “None” and/or “Neighborhood”. A record whose only entry is “See Remarks” cannot be classified and is left out of the view slice.

The data 3 sales with a view, 18 without, 1 unclassified. Most common View entries: Neighborhood 10, None 9, Pool 2, Garden 1, See Remarks 1, Park/Greenbelt 1, Trees/Woods 1.

 © 2026 Alexander Tiffany Southwest, LLC

8.2 Methods

8.2.1 Data source

In simple terms Every figure comes from the Austin Board of REALTORS® MLS, read live by ALEX. No figure is estimated or typed in.

Statistically ABOR MLS via secure APIs, read from ALEX's copy of the MLS (refreshed every 15 minutes; this pull as of 2026-11-09 11:15 UTC), every field. Filter: StandardStatus = Closed, PropertyType = Residential, City = Pflugerville, SubdivisionName contains any of “saxony”, “brookhollow” (case-insensitive). A record is kept when its subdivision name belongs to the Saxony family, the same rule comparable sales use (it includes Brookhollow, proven adjacent and priced alike).

The data Pulled November 9, 2026: 22 closed Saxony records over the prior year, in ZIP 78660. 2 subdivision spellings kept: Saxony (19); Brookhollow Sec 01 (3). No other names were found by the search.

8.2.2 Study window

In simple terms The most recent 365 days of closed sales: recent enough to describe today's market, long enough to give each group plenty of sales. The usual window is 180 days; it holds only 13 resale sales here (under 80), so the full year is used.

Statistically CloseDate from November 9, 2025 to November 8, 2026 inclusive.

The data 22 single-family sales in the window: 22 resale, 0 new construction.

8.2.3 Resale and new construction

In simple terms A resale home was previously owned. New construction is sold by the builder and behaves differently, so it is kept out of every analysis and reported once on its own.

Statistically New construction = NewConstructionYN true, or PropertyCondition contains “New Construction” or “Under Construction”. Everything else is resale.

The data 22 resale; 0 new construction.

8.2.4 Sales left out

In simple terms A few records cannot be used as entered and are left out before any analysis.

Statistically Excluded: PropertySubType other than Single Family Residence; no OriginalListPrice; LivingArea under 400 SF; seller payments above 10% of ClosePrice (treated as entry errors).

The data None in this window.

8.2.5 Quartiles and groups

In simple terms Sales lined up from lowest to highest and cut into four groups of about equal size. Each group is named by its range, for example “Under $359K”.

Statistically Sort by the slicing variable; cut k sits at round(nk/4), k = 1…3. A cut that would split tied values moves to the nearer edge of the tie. A group under 3 sales merges into its smaller neighbor. Range names use the next group's lowest value (“Under”) and the previous group's highest value (“Over”/“After”).

The data **Quartiles by net sale price:** Under $359K: $250,000–$355,000 (6 sales); $359K–$377K: $358,800–$377,000 (5 sales); $388K–$409K: $388,000–$409,000 (5 sales); Over $409K: $417,570–$530,000 (6 sales)
Quartiles by living area: Under 1,983 SF: 1,678–1,980 SF (6 sales); 1,983–2,056 SF: 1,983–2,056 SF (5 sales); 2,078–2,336 SF: 2,078–2,336 SF (5 sales); Over 2,336 SF: 2,349–2,682 SF (6 sales)
Quartiles by year built: Before 1991: 1984–1989 (6 sales); 1991–1992: 1991–1992 (7 sales); 1993: 1993–1993 (3 sales); After 1993: 1994–2004 (6 sales)
View and no view: View: MLS lists a view (3 sales); No view: None or Neighborhood (18 sales)

8.2.6 Average and median

In simple terms The average adds the values and divides by how many; one very expensive home can pull it up. The median is the middle value, with half above and half below.

Statistically Mean $\bar{x} = (1/n)\ \Sigma\ x_i$; median = 50th percentile. Price, price per SF, living area and discount use the mean; days on market and year built use the median (skewed or whole-year values).

The data Net sale price: average $380,004, median $382,500. Days on market: average 38, median 27: the average is pulled up by a few long listings.

8.2.7 Kruskal–Wallis test

In simple terms Checks whether a measure really differs across the four groups of a slice. It uses each sale's rank, not its value, so a few extreme sales cannot drive the answer.

Statistically $H = [12/(n(n+1))]\ \Sigma\ R_j^2/n_j - 3(n+1)$, compared with χ^2 on k − 1 degrees of freedom (Kruskal & Wallis, 1952). Effect size $\varepsilon^2 = H/(n-1)$: ≥ .01 small, ≥ .06 medium, ≥ .14 large (Tomczak & Tomczak, 2014). A slice is tested only when every group has at least 5 sales; smaller groups are described, not tested.

The data Run on every measure in sections 3–5; each result is in 8.3.

8.2.8 Mann–Whitney U test

In simple terms The same check when there are only two groups: view against no view.

Statistically Two-sided U test (Mann & Whitney, 1947). Effect size = rank-biserial correlation $|1 - 2U/(n_1 n_2)|$: ≥ .10 small, ≥ .30 medium, ≥ .50 large (Kerby, 2014; Cohen, 1988).

The data Run on every measure in section 6; results in 8.3.

8.2.9 Chi-square test

In simple terms Checks whether a yes/no share (price cut, seller payment, view) differs between groups more than chance would.

Statistically Pearson χ^2 on the 2 × k table of counts, no continuity correction (Pearson, 1900). Effect size Cramér's V = $\sqrt{(\chi^2/n)}$: ≥ .10 small, ≥ .30 medium, ≥ .50 large (Cramér, 1946).

The data Run on the three shares in every slice; results in 8.3.

8.2.10 Real difference (significance)

In simple terms "Real difference" means a gap this large would be very unlikely if the groups were really alike. Because many measures are checked in each slice, the bar is set higher than usual.

Statistically Significant when $p < 0.05 \div m$, where m is the number of measures tested in that slice (Bonferroni; Dunn, 1961). The slicing variable itself differs by design and is not tested.

The data Quartiles by net sale price: m = 8, threshold $p < 0.0063$; Quartiles by living area: m = 8, threshold $p < 0.0063$

8.2.11 Size of a difference

In simple terms A difference can be real but small. The size word (small, medium, large) says how much the groups pull apart.

Statistically ε^2 for Kruskal–Wallis, rank-biserial r for Mann–Whitney, Cramér's V for chi-square, with the thresholds above; below the small threshold the size is "negligible".

The data 0 real differences across the four slices; sizes are listed in 8.3.

8.2.12 Rounding in the text

In simple terms Headings and sentences round figures so they read easily; the tables at the end of each section give them in full.

Statistically Prices in headings round to the nearest $1K; price per SF and days on market to the nearest whole number; living area to the nearest 10 SF; shares and percentage gaps to whole percents.

The data Days on market is always shown in days.

8.3 Test results

Every test behind every gold box. Statistic, degrees of freedom (df), p-value, the threshold it must beat, and the size of the difference.

8.3.1 Quartiles by net sale price

Measure	Test	Statistic	df	p-value	Threshold	Real difference?	Effect size	Size
Net price per SF	Kruskal–Wallis	$H = 5.90$	3	0.1164	$p < 0.0063$	**Unclear**	$\varepsilon^2 = 0.281$	large
Living area	Kruskal–Wallis	$H = 4.77$	3	0.1891	$p < 0.0063$	**Unclear**	$\varepsilon^2 = 0.227$	large
Year built	Kruskal–Wallis	$H = 1.64$	3	0.6509	$p < 0.0063$	**Unclear**	$\varepsilon^2 = 0.078$	medium
Days on market	Kruskal–Wallis	$H = 0.39$	3	0.9418	$p < 0.0063$	**Unclear**	$\varepsilon^2 = 0.019$	small
Discount from original list	Kruskal–Wallis	$H = 0.60$	3	0.8954	$p < 0.0063$	**Unclear**	$\varepsilon^2 = 0.029$	small
Price cut before sale	Chi-square	$\chi^2 = 0.89$	3	0.8273	$p < 0.0063$	**Unclear**	Cramér's V = 0.201	small
Seller paid closing costs or repairs	Chi-square	$\chi^2 = 7.21$	3	0.0655	$p < 0.0063$	**Unclear**	Cramér's V = 0.573	large
Has a view	Chi-square	$\chi^2 = 3.89$	3	0.2741	$p < 0.0063$	**Unclear**	Cramér's V = 0.420	medium

8.3.2 Quartiles by living area

Measure	Test	Statistic	df	p-value	Threshold	Real difference?	Effect size	Size
Net sale price	Kruskal–Wallis	H = 5.80	3	0.1220	p < 0.0063	**Unclear**	$\varepsilon^2 = 0.276$	large
Net price per SF	Kruskal–Wallis	H = 3.27	3	0.3519	p < 0.0063	**Unclear**	$\varepsilon^2 = 0.156$	large
Year built	Kruskal–Wallis	H = 1.83	3	0.6092	p < 0.0063	**Unclear**	$\varepsilon^2 = 0.087$	medium
Days on market	Kruskal–Wallis	H = 2.27	3	0.5183	p < 0.0063	**Unclear**	$\varepsilon^2 = 0.108$	medium
Discount from original list	Kruskal–Wallis	H = 1.39	3	0.7076	p < 0.0063	**Unclear**	$\varepsilon^2 = 0.066$	medium
Price cut before sale	Chi-square	$\chi^2 = 5.19$	3	0.1581	p < 0.0063	**Unclear**	Cramér's V = 0.486	medium
Seller paid closing costs or repairs	Chi-square	$\chi^2 = 3.51$	3	0.3190	p < 0.0063	**Unclear**	Cramér's V = 0.400	medium
Has a view	Chi-square	$\chi^2 = 1.05$	3	0.7880	p < 0.0063	**Unclear**	Cramér's V = 0.219	small

8.3.3 Quartiles by year built

Too few sales in a group to test.

8.3.4 View and no view

Too few sales in a group to test.

8.4 Data notes

Left out of the analysis: 0 new-construction sales (basic statistics only, section 7); nothing else. Statistics: Python, NumPy 2.5.3, SciPy 1.18.1.
