8. Appendix: measures, methods and tests

1. Summary

Resale homes · 13 sales · October 30, 2025 – October 29, 2026

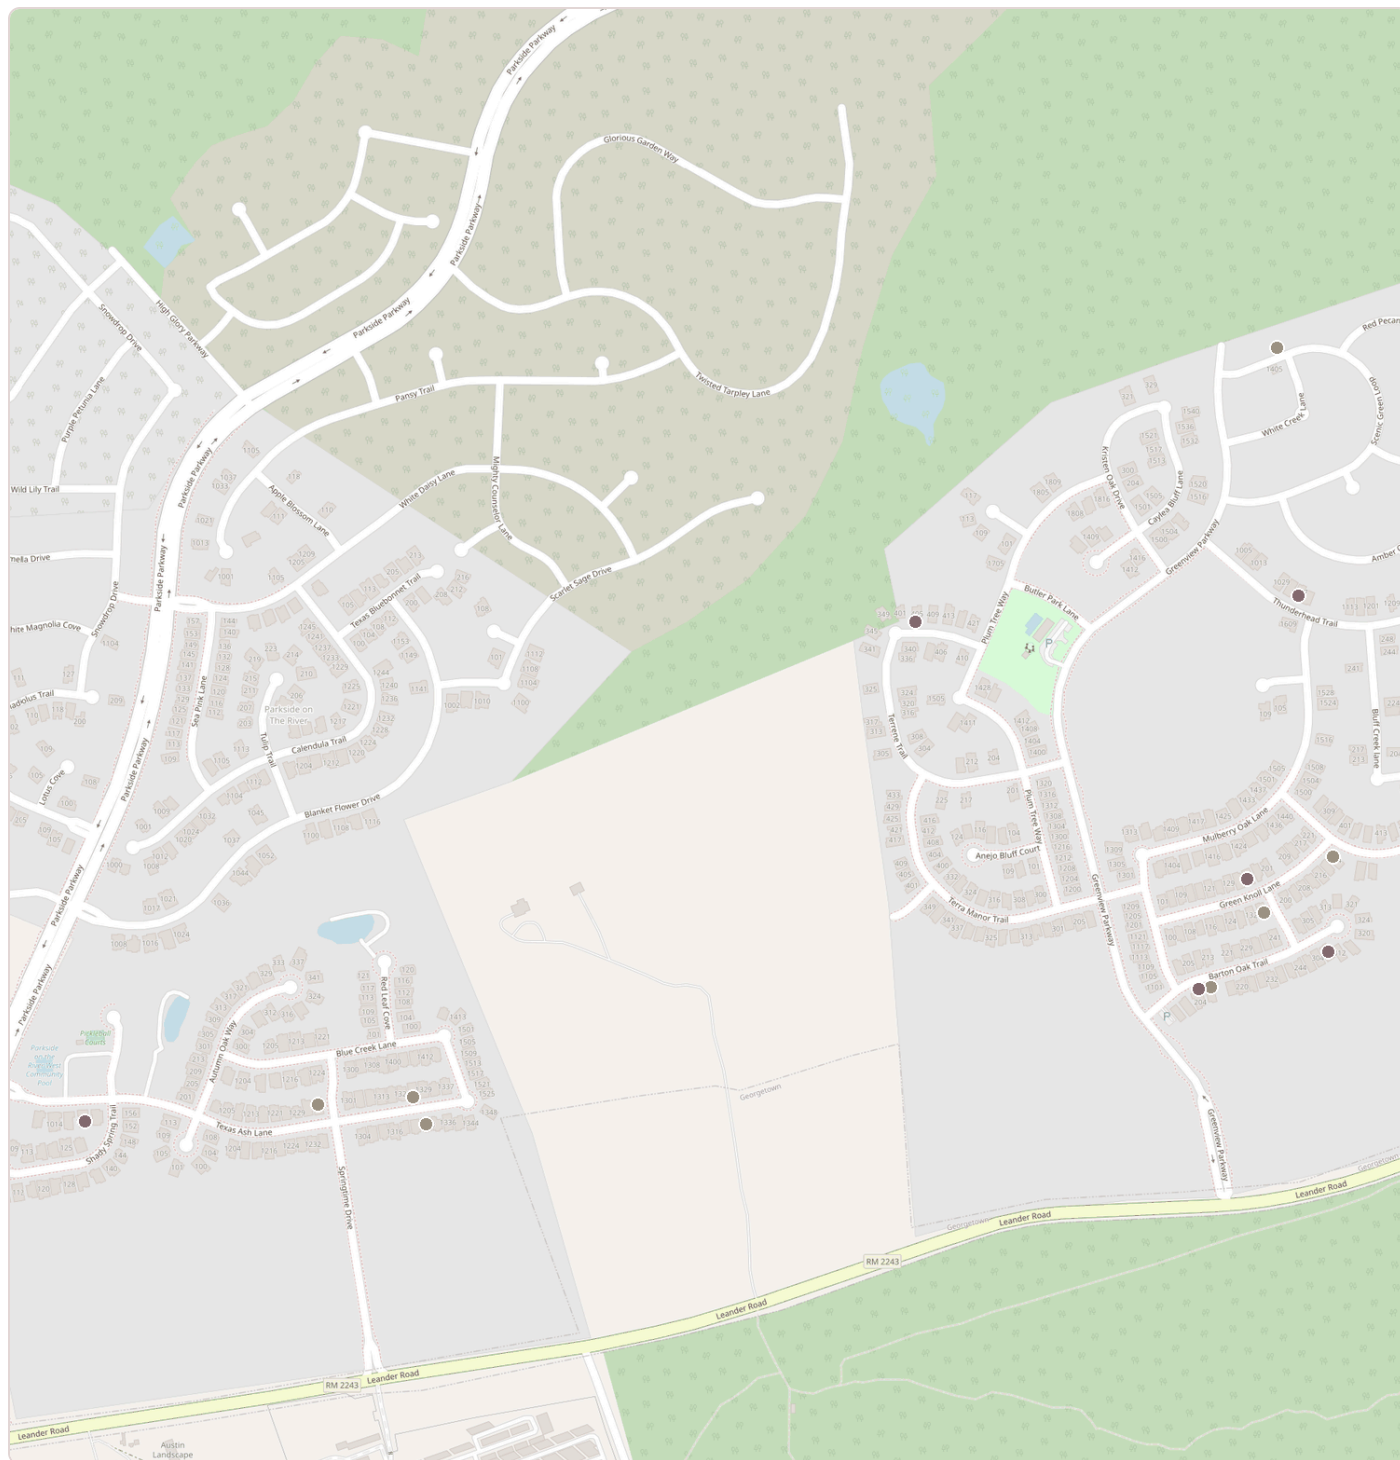

This study looks at the **13 resale homes** sold in Parkside on the River in the **365 days** to October 29, 2026. A full year is used because only 11 resale homes sold in the last 180 days. New construction is left out and shown on its own in section 7. The homes are compared four ways: **by price, by living area, by year built** and **with or without a view**. The first three are split into four equal groups (quartiles), each named by its range.

Each comparison has its own section (3–6) with everything about it in one place: the key differences, a table of every measure at a glance, the charts and the numbers.

2. Where the resale homes sold

13 resale homes · colored by price range

Each dot is one resale home, colored by its price range.

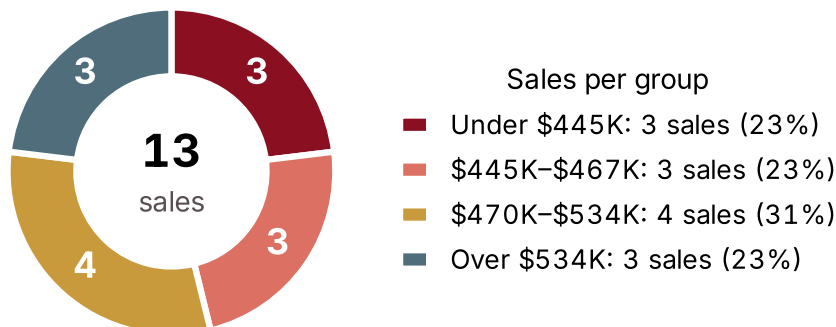

● Under \$445K · 3 sales ● \$445K-\$467K · 3 sales ● \$470K-\$534K · 4 sales ● Over \$534K · 3 sales

3. Quartiles by net sale price

Resale homes · 13 sales · October 30, 2025 – October 29, 2026

Sales ranked by net sale price and cut into four equal groups. This is the usual way to read a market by price.

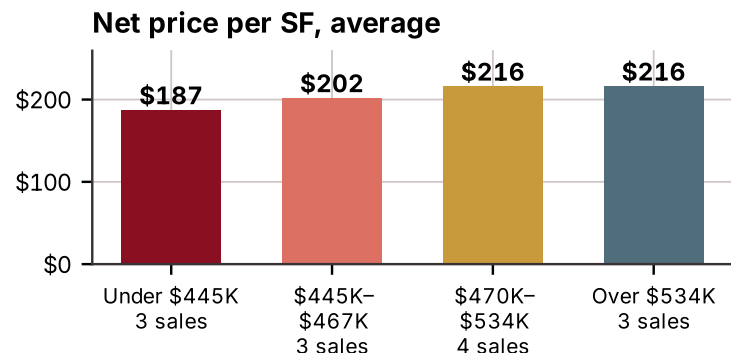

Bottom line: too few sales to test.

3.1 Key differences

The top group against the bottom group: no measure differs enough to rule out chance.

How to read this section. Each heading gives the finding. The gold box says whether the gap is real (✓, with its size) or could be chance (–). The section ends with its numbers; the tests are in section 8.3.

3.3 Net price per SF: described, not tested

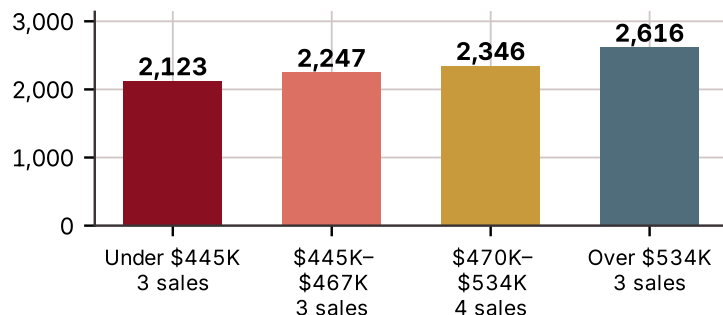

The average is **\$216 per SF** for homes over \$534K and **\$187 per SF** for homes under \$445K. It rises step by step from the lowest range to the highest. Defined in 8.1.2.

Not tested: too few sales.

3.4 Living area: described, not tested

Living area (SF), average

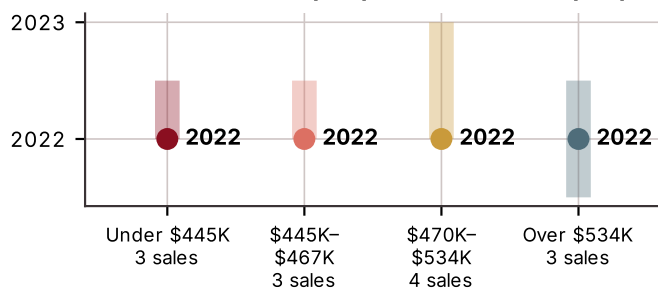

The average is **2,616 SF** for homes over \$534K and **2,123 SF** for homes under \$445K. It rises step by step from the lowest range to the highest. Defined in 8.1.3.

Not tested: too few sales.

3.5 Year built: described, not tested

Year built: median (dot) and middle half (bar)

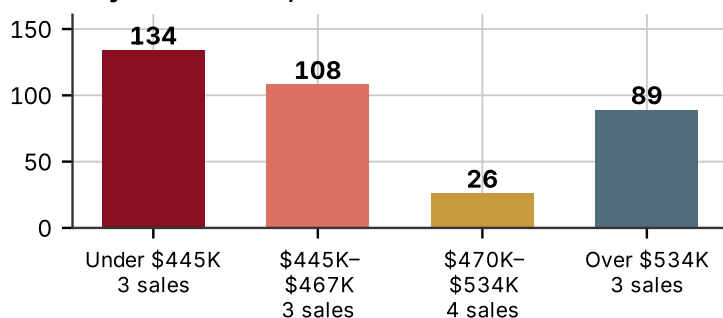

The median is **2022** for homes over \$534K and **2022** for homes under \$445K. It rises step by step from the lowest range to the highest. Defined in 8.1.4.

Not tested: too few sales.

3.6 Days on market: described, not tested

Days on market, median

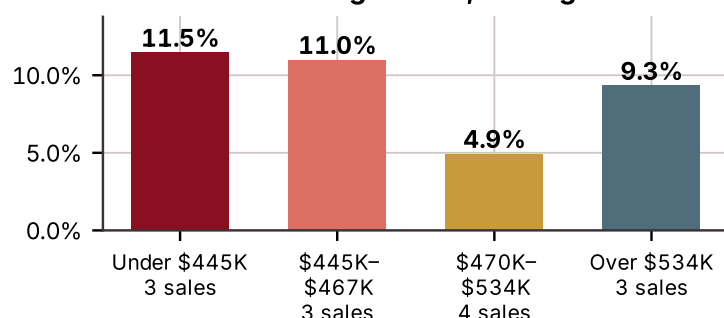

The median is **89 days** for homes over \$534K and **134 days** for homes under \$445K. It does not move in a straight line; homes under \$445K are highest. Defined in 8.1.5.

Not tested: too few sales.

3.7 Discount from original list: described, not tested

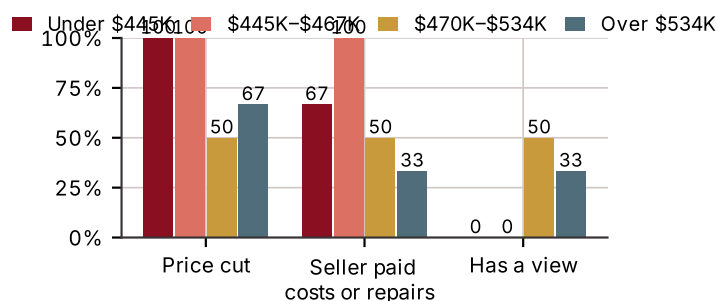

Discount from original list, average

The average is 9.3% for homes over \$534K and 11.5% for homes under \$445K. It does not move in a straight line; homes under \$445K are highest. Defined in 8.1.6.

Not tested: too few sales.

3.8 How often: price cut before sale, seller paid closing costs or repairs, has a view

Each bar is the share of homes in the group, in percent.

- 67% of homes over \$534K had a price cut before sale, against 100% of homes under \$445K. Defined in 8.1.7.
- 33% of homes over \$534K had the seller pay closing costs or repairs, against 67% of homes under \$445K. Defined in 8.1.8.
- 33% of homes over \$534K have a view, against 0% of homes under \$445K. Defined in 8.1.9.

Price cut before sale: Not tested: too few sales.

Seller paid closing costs or repairs: Not tested: too few sales.

Has a view: Not tested: too few sales.

3.9 The numbers: price and size

	Under \$445K 3 sales	\$445K–\$467K 3 sales	\$470K–\$534K 4 sales	Over \$534K 3 sales	All 13 sales
Net sale price average	\$398,110	\$453,000	\$502,080	\$562,025	\$480,594
Net price per SF average	\$187	\$202	\$216	\$216	\$206
Living area average	2,123	2,247	2,346	2,616	2,334
Year built median	2022	2022	2022	2022	2022

3.10 The numbers: selling

	Under \$445K 3 sales	\$445K-\$467K 3 sales	\$470K-\$534K 4 sales	Over \$534K 3 sales	All 13 sales
Days on market median	134	108	26	89	89
Discount from original list average	11.5%	11.0%	4.9%	9.3%	8.9%
Price cut before sale	100%	100%	50%	67%	77%
Seller paid closing costs or repairs	67%	100%	50%	33%	62%
Has a view	0%	0%	50%	33%	23%

Prices, price per SF, living area and discount are averages; days on market and year built are medians. The test behind each verdict is in 8.3.1.

4. Quartiles by living area

Resale homes · 13 sales · October 30, 2025 – October 29, 2026

Sales ranked by living area and cut into four equal groups, from the smallest homes to the largest.

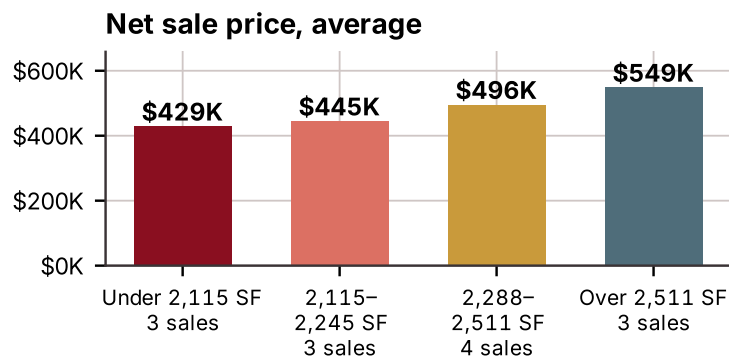

Bottom line: too few sales to test.

4.1 Key differences

The top group against the bottom group: no measure differs enough to rule out chance.

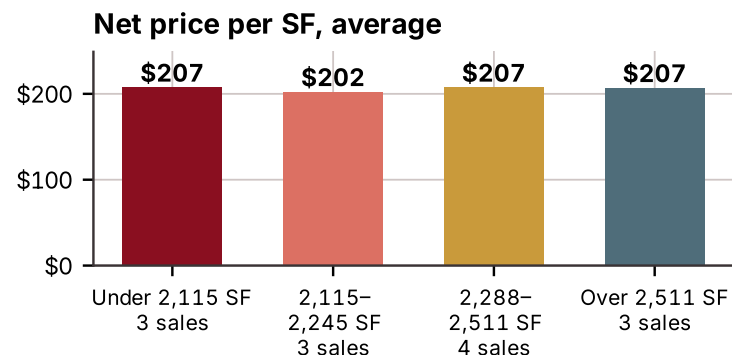

4.3 Net sale price: described, not tested

The average is \$549K for homes over 2,511 SF and \$429K for homes under 2,115 SF. It rises step by step from the lowest range to the highest. Defined in 8.1.1.

Not tested: too few sales.

4.4 Net price per SF: described, not tested

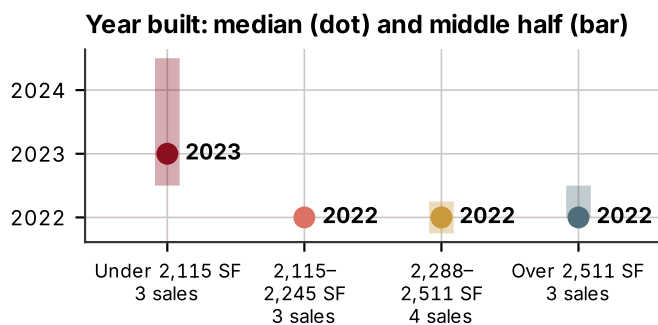

The average is **\$207 per SF** for homes over 2,511 SF and **\$207 per SF** for homes under 2,115 SF. It does not move in a straight line; homes under 2,115 SF are highest.

Defined in 8.1.2.

Not tested: too few sales.

4.5 Year built: described, not tested

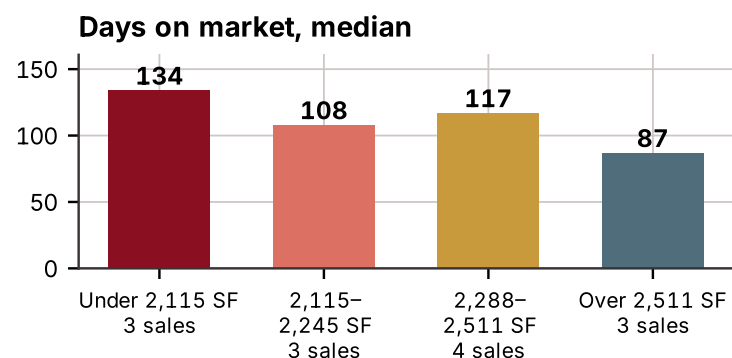

The median is **2022** for homes over 2,511 SF and **2023** for homes under 2,115 SF. It falls step by step from the lowest range to the highest.

Defined in 8.1.4.

Not tested: too few sales.

4.6 Days on market: described, not tested

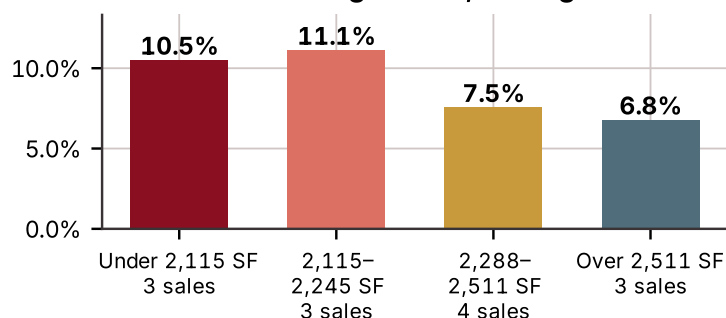

The median is **87 days** for homes over 2,511 SF and **134 days** for homes under 2,115 SF. It does not move in a straight line; homes under 2,115 SF are highest. Defined in 8.1.5.

Not tested: too few sales.

4.7 Discount from original list: described, not tested

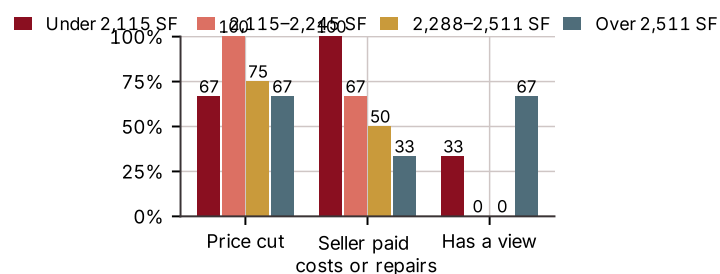

Discount from original list, average

The average is **6.8%** for homes over 2,511 SF and **10.5%** for homes under 2,115 SF. It does not move in a straight line; homes 2,115–2,245 SF are highest. Defined in 8.1.6.

Not tested: too few sales.

4.8 How often: price cut before sale, seller paid closing costs or repairs, has a view

Each bar is the share of homes in the group, in percent.

- 67% of homes over 2,511 SF had a price cut before sale, against 67% of homes under 2,115 SF. Defined in 8.1.7.
- 33% of homes over 2,511 SF had the seller pay closing costs or repairs, against 100% of homes under 2,115 SF. Defined in 8.1.8.
- 67% of homes over 2,511 SF have a view, against 33% of homes under 2,115 SF. Defined in 8.1.9.

Price cut before sale: Not tested: too few sales.

Seller paid closing costs or repairs: Not tested: too few sales.

Has a view: Not tested: too few sales.

4.9 The numbers: price and size

	Under 2,115 SF 3 sales	2,115–2,245 SF 3 sales	2,288–2,511 SF 4 sales	Over 2,511 SF 3 sales	All 13 sales
Net sale price average	\$428,703	\$444,667	\$495,522	\$548,508	\$480,594
Net price per SF average	\$207	\$202	\$207	\$207	\$206
Living area average	2,066	2,200	2,393	2,657	2,334
Year built median	2023	2022	2022	2022	2022

4.10 The numbers: selling

	Under 2,115 SF 3 sales	2,115–2,245 SF 3 sales	2,288–2,511 SF 4 sales	Over 2,511 SF 3 sales	All 13 sales
Days on market median	134	108	117	87	89
Discount from original list average	10.5%	11.1%	7.5%	6.8%	8.9%
Price cut before sale	67%	100%	75%	67%	77%
Seller paid closing costs or repairs	100%	67%	50%	33%	62%
Has a view	33%	0%	0%	67%	23%

Prices, price per SF, living area and discount are averages; days on market and year built are medians. The test behind each verdict is in 8.3.2.

5. Groups by year built

Resale homes · 13 sales · October 30, 2025 – October 29, 2026

Sales ranked by year built and cut into four groups, from the oldest to the newest. Homes built in the same year always stay in the same group, so group sizes can differ a little. Only 2 groups are shown: homes here share a few year built values, and no group may hold fewer than 3 sales.

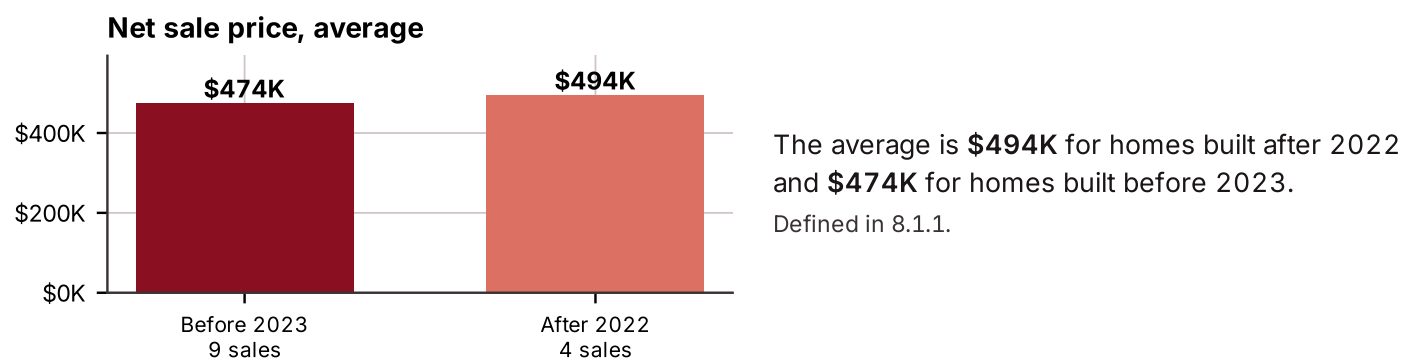

Bottom line: too few sales to test.

5.1 Key differences

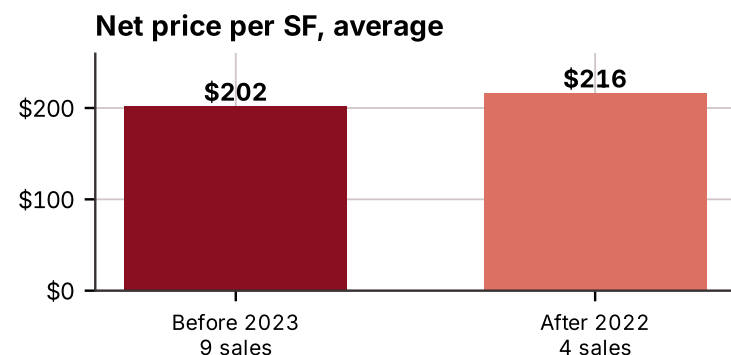

The top group against the bottom group: no measure differs enough to rule out chance.

5.3 Net sale price: described, not tested

Not tested: too few sales.

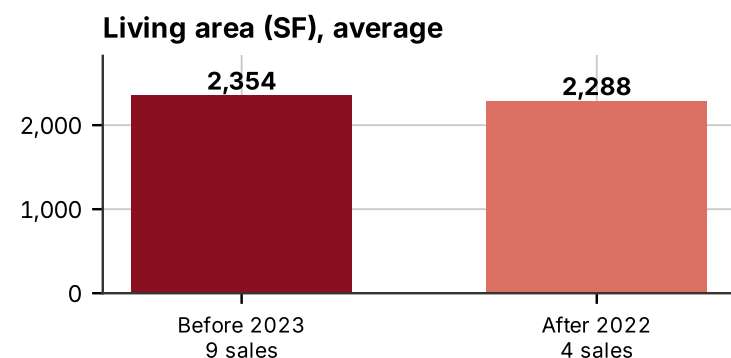

5.4 Net price per SF: described, not tested

The average is **\$216 per SF** for homes built after 2022 and **\$202 per SF** for homes built before 2023. Defined in 8.1.2.

Not tested: too few sales.

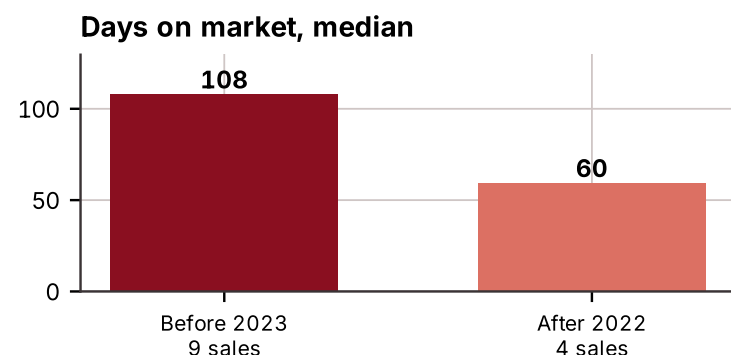

5.5 Living area: described, not tested

The average is **2,288 SF** for homes built after 2022 and **2,354 SF** for homes built before 2023. Defined in 8.1.3.

Not tested: too few sales.

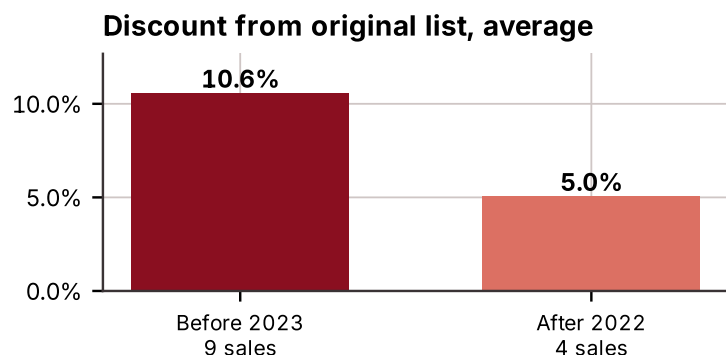

5.6 Days on market: described, not tested

The median is **60 days** for homes built after 2022 and **108 days** for homes built before 2023. Defined in 8.1.5.

Not tested: too few sales.

5.7 Discount from original list: described, not tested

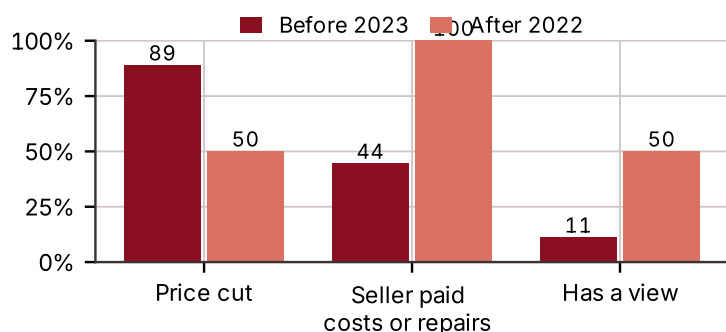

The average is **5.0%** for homes built after 2022 and **10.6%** for homes built before 2023.

Defined in 8.1.6.

Not tested: too few sales.

5.8 How often: price cut before sale, seller paid closing costs or repairs, has a view

Each bar is the share of homes in the group, in percent.

- 50% of homes built after 2022 had a price cut before sale, against 89% of homes built before 2023. Defined in 8.1.7.
- 100% of homes built after 2022 had the seller pay closing costs or repairs, against 44% of homes built before 2023. Defined in 8.1.8.
- 50% of homes built after 2022 have a view, against 11% of homes built before 2023. Defined in 8.1.9.

Price cut before sale: Not tested: too few sales.

Seller paid closing costs or repairs: Not tested: too few sales.

Has a view: Not tested: too few sales.

5.9 The numbers: price and size

	Before 2023 9 sales	After 2022 4 sales	All 13 sales
Net sale price average	\$474,430	\$494,463	\$480,594
Net price per SF average	\$202	\$216	\$206
Living area average	2,354	2,288	2,334
Year built median	2022	2023	2022

5.10 The numbers: selling

	Before 2023 9 sales	After 2022 4 sales	All 13 sales
Days on market median	108	60	89
Discount from original list average	10.6%	5.0%	8.9%
Price cut before sale	89%	50%	77%
Seller paid closing costs or repairs	44%	100%	62%
Has a view	11%	50%	23%

Prices, price per SF, living area and discount are averages; days on market and year built are medians. The test behind each verdict is in 8.3.3.

6. View and no view

Resale homes · 13 sales · October 30, 2025 – October 29, 2026

Sales where the MLS lists a view (greenbelt or park, trees, golf course, hill country, water and similar) against those listing none or only the neighborhood. 1 sales whose MLS view entry is only "See Remarks" are left out.

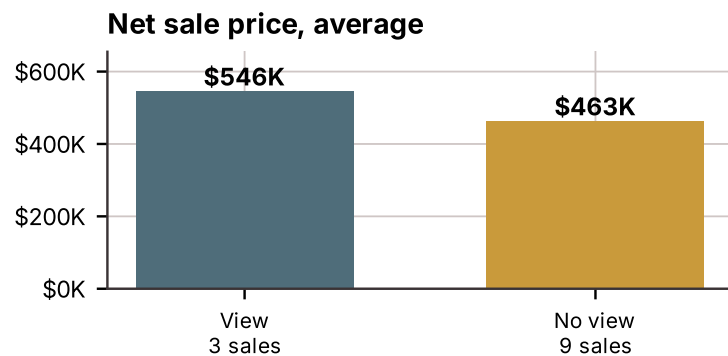

Bottom line: too few sales to test.

6.1 Key differences

The top group against the bottom group: no measure differs enough to rule out chance.

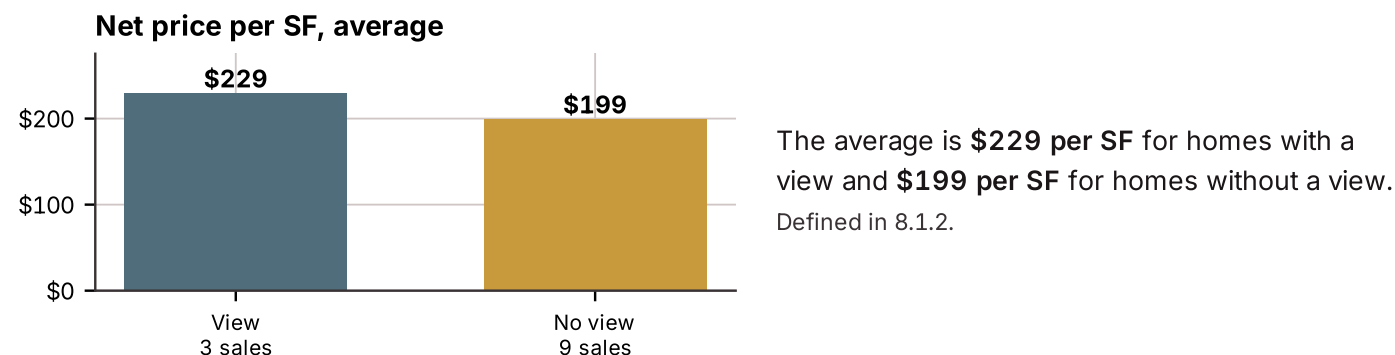

6.3 Net sale price: described, not tested

The average is **\$546K** for homes with a view and **\$463K** for homes without a view. Defined in 8.1.1.

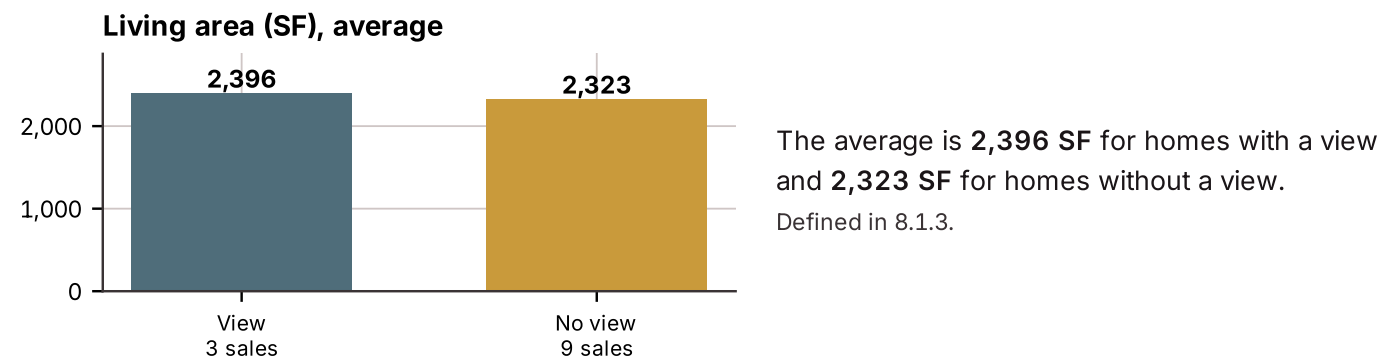

Not tested: too few sales.

6.4 Net price per SF: described, not tested

Not tested: too few sales.

6.5 Living area: described, not tested

Not tested: too few sales.

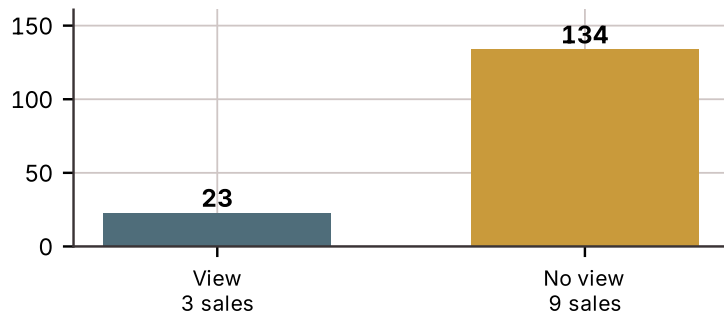

6.6 Year built: described, not tested

Not tested: too few sales.

6.7 Days on market: described, not tested

Days on market, median

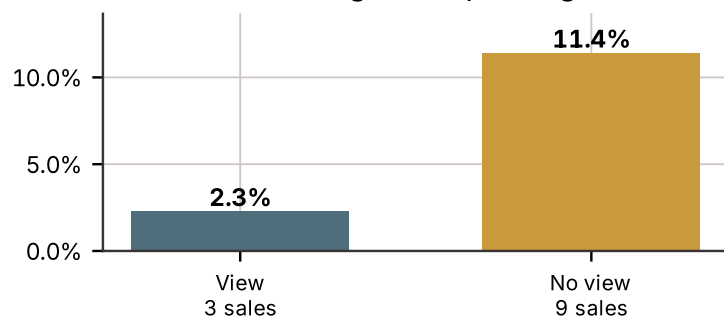

The median is **23 days** for homes with a view and **134 days** for homes without a view.

Defined in 8.1.5.

Not tested: too few sales.

6.8 Discount from original list: described, not tested

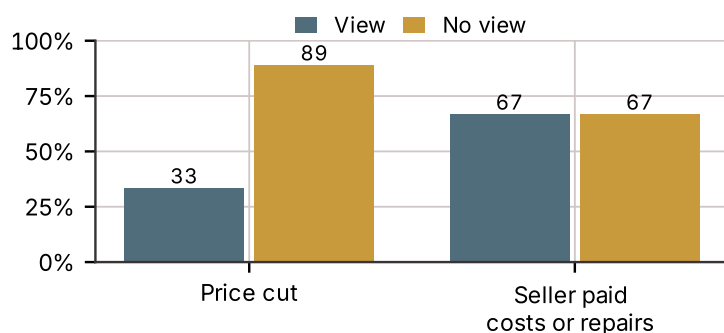

Discount from original list, average

The average is **2.3%** for homes with a view and **11.4%** for homes without a view. Defined in 8.1.6.

Not tested: too few sales.

6.9 How often: price cut before sale, seller paid closing costs or repairs

Each bar is the share of homes in the group, in percent.

- 33% of homes with a view had a price cut before sale, against 89% of homes without a view. Defined in 8.1.7.
- 67% of homes with a view had the seller pay closing costs or repairs, against 67% of homes without a view. Defined in 8.1.8.

Price cut before sale: Not tested: too few sales.

Seller paid closing costs or repairs: Not tested: too few sales.

6.10 The numbers: price and size

	View 3 sales	No view 9 sales	All 12 sales
Net sale price average	\$545,601	\$463,213	\$483,810
Net price per SF average	\$229	\$199	\$207
Living area average	2,396	2,323	2,342
Year built median	2023	2022	2022

6.11 The numbers: selling

	View 3 sales	No view 9 sales	All 12 sales
Days on market median	23	134	98
Discount from original list average	2.3%	11.4%	9.1%
Price cut before sale	33%	89%	75%
Seller paid closing costs or repairs	67%	67%	67%

Prices, price per SF, living area and discount are averages; days on market and year built are medians. The test behind each verdict is in 8.3.4.

7. New construction

Basic statistics · 126 sales · October 30, 2025 – October 29, 2026

Homes sold new by the builder in the same 365 days. They are left out of every other section and shown here as basic figures only: 126 sales, no groups, no tests.

Note: these are only the new - construction sales reported in ABOR MLS. Builders often sell homes without listing them in the MLS, so these figures do not necessarily represent all new - construction sales in Parkside on the River.

Measure	Average	Median
Sales		126
Net sale price	\$642,057	\$610,359
Net price per SF	\$218	\$213
Living area (SF)	2,931	2,847
Days on market	134	122
Discount from original list	12.3%	11.9%
Price cut before sale		72% of sales
Seller paid closing costs or repairs		72% of sales
Year built		2024–2026

Same definitions as the rest of the study (section 8). New construction = NewConstructionYN true, or PropertyCondition "New Construction" or "Under Construction".

8. Appendix

Measures, methods and tests

Each measure and method three ways: in plain words, as statistics, and with the data from this study.

8.1 Measures

8.1.1 Net sale price

In simple terms	What the seller actually kept: the closing price, less money the seller gave back to the buyer for closing costs or repairs. It is the truest price for comparing homes.
Statistically	$\text{Net} = \text{ClosePrice} - \text{ACTRIS_BuyersClsgCostPdbbySell} - \text{ACTRIS_RepairsAmount}$ (a blank counts as \$0). Summarized by the arithmetic mean in the slices.
The data	13 resale sales. Average \$480,594; median \$470,090; standard deviation \$65,435; middle half (25th–75th percentile) \$445,000–\$533,778; lowest \$368,830, highest \$593,575. 8 sales had a seller payment; their median payment was \$8,500.

8.1.2 Net price per SF

In simple terms	Net sale price divided by the heated and cooled square feet. It puts homes of different sizes on the same footing: did buyers pay more for each square foot, not just for more square feet?
Statistically	$\text{psf} = \text{Net} \div \text{LivingArea}$, per sale; summarized by the mean of the per - sale ratios.
The data	13 resale sales. Average \$206; median \$199; standard deviation \$22; middle half (25th–75th percentile) \$190–\$216; lowest \$182, highest \$258.

8.1.3 Living area

In simple terms	The heated and cooled space, as listed in the MLS. Garages and porches are not counted.
Statistically	RESO LivingArea, in square feet. Sales under 400 SF are treated as entry errors and left out.
The data	13 resale sales. Average 2,334; median 2,288; standard deviation 241; middle half (25th–75th percentile) 2,115–2,511; lowest 2,028, highest 2,853.

8.1.4 Year built

In simple terms	The year the home was finished, as listed in the MLS. It shows whether a group leans to older or newer phases of the community.
Statistically	RESO YearBuilt; summarized by the median, with the 25th–75th percentile (middle half) on the charts.
The data	13 resale sales. Average 2022; median 2022; standard deviation 1; middle half (25th–75th percentile) 2022–2023; lowest 2021, highest 2026.

8.1.5 Days on market

In simple terms	How many days the home was on the market before the buyer's offer was accepted, counting any earlier listing periods (relists). This is the days on market agents and clients quote.
Statistically	$CDOM = \max(\text{CumulativeDaysOnMarket}, \text{DaysOnMarket}, \text{PurchaseContractDate} - \text{ListingContractDate})$. The MLS counter can freeze at a price change, so the contract-date gap is a floor. Summarized by the median, because a few homes that sat for months pull an average up.
The data	13 resale sales. Average 124; median 89; standard deviation 101; middle half (25th–75th percentile) 32–202; lowest 0, highest 286. 1 sales went under contract on their listing date (0 days).

8.1.6 Discount from original list

In simple terms	How far below the first asking price the home sold, after seller payments. It measures how much negotiating room sellers gave up. A negative figure means the home sold above its first asking price.
Statistically	$\text{Discount \%} = (\text{OriginalListPrice} - \text{Net}) \div \text{OriginalListPrice} \times 100$, per sale; summarized by the mean.
The data	13 resale sales. Average 8.9%; median 10.6%; standard deviation 6.0%; middle half (25th–75th percentile) 3.0%–12.9%; lowest 0.9%, highest 17.9%. 0 sales closed above their first asking price.

8.1.7 Price cut before sale

In simple terms	The asking price was lowered at least once before the home went under contract.
Statistically	Indicator: $\text{ListPrice at close} < \text{OriginalListPrice}$. Reported as the share of sales (%).
The data	10 of 13 resale sales (76.9%).

8.1.8 Seller paid closing costs or repairs

In simple terms	The seller paid some of the buyer's closing costs or repairs.
Statistically	Indicator: $\text{ACTRIS_BuyersClsgCostPdbysell} + \text{ACTRIS_RepairsAmount} > 0$. Reported as the share of sales (%).
The data	8 of 13 resale sales (61.5%).

8.1.9 Has a view

In simple terms	The MLS says the home looks over something: a greenbelt or park, trees, golf course, hill country, water and similar.
Statistically	View = the View field holds any entry other than "None", "Neighborhood" or "See Remarks". No view = only "None" and/or "Neighborhood". A record whose only entry is "See Remarks" cannot be classified and is left out of the view slice.
The data	3 sales with a view, 9 without, 1 unclassified. Most common View entries: None 6, Neighborhood 4, Trees/Woods 2, Park/Greenbelt 2, See Remarks 1, Panoramic 1, Water 1.

8.2 Methods

8.2.1 Data source

In simple terms	Every figure comes from the Austin Board of REALTORS® MLS, read live by ALEX. No figure is estimated or typed in.
Statistically	Bridge Interactive RESO Web API (OData), ABOR dataset, every field returned. Filter: StandardStatus = Closed, PropertyType = Residential, City = Georgetown, SubdivisionName contains any of "parkside on the river", "aus parkside on the river", "parkside river" (case-insensitive). A record is kept when its subdivision name belongs to the Parkside on the River family, the same rule comparable sales use (it includes AUS - Parkside on the River 70', Parkside/River Ph 2 Sec 3, proven adjacent and priced alike).
The data	Pulled October 30, 2026: 140 closed Parkside on the River records over the prior year, in ZIP 78628. 8 subdivision spellings kept: Parkside on the River (71); Parkside On The River (25); PARKSIDE ON THE RIVER (23); Parkside on the River 60s (6); Parkside on the River 70s (6); Parkside on the River 50s (5); AUS - Parkside on the River 70' (3); Parkside on the River 70' (1). Names found by the search but not part of Parkside on the River, left out: Parkside on the River West (24); Parkside On The River West (14); Parkside on the River - West (11); PARKSIDE ON THE RIVER WEST (1).

8.2.2 Study window

In simple terms	The most recent 365 days of closed sales: recent enough to describe today's market, long enough to give each group plenty of sales. The usual window is 180 days; it holds only 11 resale sales here (under 80), so the full year is used.
Statistically	CloseDate from October 30, 2025 to October 29, 2026 inclusive.
The data	139 single-family sales in the window: 13 resale, 126 new construction.

8.2.3 Resale and new construction

In simple terms	A resale home was previously owned. New construction is sold by the builder and behaves differently, so it is kept out of every analysis and reported once on its own.
Statistically	New construction = NewConstructionYN true, or PropertyCondition contains "New Construction" or "Under Construction". Everything else is resale.
The data	13 resale; 126 new construction.

8.2.4 Sales left out

In simple terms	A few records cannot be used as entered and are left out before any analysis.
Statistically	Excluded: PropertySubType other than Single Family Residence; no OriginalListPrice; LivingArea under 400 SF; seller payments above 10% of ClosePrice (treated as entry errors).
The data	1 sale(s) with concessions above 10% of price

8.2.5 Quartiles and groups

In simple terms	Sales lined up from lowest to highest and cut into four groups of about equal size. Each group is named by its range, for example "Under \$445K".
Statistically	Sort by the slicing variable; cut k sits at $\text{round}(nk/4)$, $k = 1 \dots 3$. A cut that would split tied values moves to the nearer edge of the tie. A group under 3 sales merges into its smaller neighbor. Range names use the next group's lowest value ("Under") and the previous group's highest value ("Over"/"After").
The data	<p>Quartiles by net sale price: Under \$445K: \$368,830–\$442,000 (3 sales); \$445K–\$467K: \$445,000–\$467,000 (3 sales); \$470K–\$534K: \$470,090–\$533,778 (4 sales); Over \$534K: \$542,500–\$593,575 (3 sales)</p> <p>Quartiles by living area: Under 2,115 SF: 2,028–2,099 SF (3 sales); 2,115–2,245 SF: 2,115–2,245 SF (3 sales); 2,288–2,511 SF: 2,288–2,511 SF (4 sales); Over 2,511 SF: 2,515–2,853 SF (3 sales)</p> <p>Groups by year built: Before 2023: 2021–2022 (9 sales); After 2022: 2023–2026 (4 sales)</p> <p>View and no view: View: MLS lists a view (3 sales); No view: None or Neighborhood (9 sales)</p>

8.2.6 Average and median

In simple terms	The average adds the values and divides by how many; one very expensive home can pull it up. The median is the middle value, with half above and half below.
Statistically	Mean $\bar{x} = (1/n) \sum x_i$; median = 50th percentile. Price, price per SF, living area and discount use the mean; days on market and year built use the median (skewed or whole-year values).
The data	Net sale price: average \$480,594, median \$470,090. Days on market: average 124, median 89: the average is pulled up by a few long listings.

8.2.7 Kruskal–Wallis test

In simple terms	Checks whether a measure really differs across the four groups of a slice. It uses each sale's rank, not its value, so a few extreme sales cannot drive the answer.
Statistically	$H = [12/(n(n+1))] \sum R_j^2/n_j - 3(n+1)$, compared with χ^2 on $k - 1$ degrees of freedom (Kruskal & Wallis, 1952). Effect size $\epsilon^2 = H/(n - 1)$: $\geq .01$ small, $\geq .06$ medium, $\geq .14$ large (Tomczak & Tomczak, 2014). A slice is tested only when every group has at least 5 sales; smaller groups are described, not tested.
The data	Run on every measure in sections 3–5; each result is in 8.3.

8.2.8 Mann–Whitney U test

In simple terms	The same check when there are only two groups: view against no view.
Statistically	Two-sided U test (Mann & Whitney, 1947). Effect size = rank-biserial correlation $ 1 - 2U/(n_1n_2) $: $\geq .10$ small, $\geq .30$ medium, $\geq .50$ large (Kerby, 2014; Cohen, 1988).
The data	Run on every measure in section 6; results in 8.3.

8.2.9 Chi-square test

In simple terms	Checks whether a yes/no share (price cut, seller payment, view) differs between groups more than chance would.
Statistically	Pearson χ^2 on the $2 \times k$ table of counts, no continuity correction (Pearson, 1900). Effect size Cramér's $V = \sqrt{\chi^2/n}$: $\geq .10$ small, $\geq .30$ medium, $\geq .50$ large (Cramér, 1946).
The data	Run on the three shares in every slice; results in 8.3.

8.2.10 Real difference (significance)

In simple terms	"Real difference" means a gap this large would be very unlikely if the groups were really alike. Because many measures are checked in each slice, the bar is set higher than usual.
Statistically	Significant when $p < 0.05 \div m$, where m is the number of measures tested in that slice (Bonferroni; Dunn, 1961). The slicing variable itself differs by design and is not tested.
The data	

8.2.11 Size of a difference

In simple terms	A difference can be real but small. The size word (small, medium, large) says how much the groups pull apart.
Statistically	ϵ^2 for Kruskal–Wallis, rank - biserial r for Mann–Whitney, Cramér's V for chi - square, with the thresholds above; below the small threshold the size is "negligible".
The data	0 real differences across the four slices; sizes are listed in 8.3.

8.2.12 Rounding in the text

In simple terms	Headings and sentences round figures so they read easily; the tables at the end of each section give them in full.
Statistically	Prices in headings round to the nearest \$1K; price per SF and days on market to the nearest whole number; living area to the nearest 10 SF; shares and percentage gaps to whole percents.
The data	Days on market is always shown in days.

8.3 Test results

Every test behind every gold box. Statistic, degrees of freedom (df), p-value, the threshold it must beat, and the size of the difference.

8.3.1 Quartiles by net sale price

Too few sales in a group to test.

8.3.2 Quartiles by living area

Too few sales in a group to test.

8.3.3 Groups by year built

Too few sales in a group to test.

8.3.4 View and no view

Too few sales in a group to test.

8.4 Data notes

Left out of the analysis: 126 new - construction sales (basic statistics only, section 7); 1 sale(s) with concessions above 10% of price. Statistics: Python, NumPy 2.5.3, SciPy 1.18.1.
