THE DATA

100%

Governance Focus

AI integration is now a top-tier strategic concern for university trustees globally.

Discussions like "Boards and Bots" highlight that institutions are actively developing policies for AI use, addressing ethical considerations, and planning for its broad societal impact. This proactive engagement is crucial for navigating AI's transformative potential.

01

Crafting Policy: Navigating AI's Ethical and Operational Landscape

Governance bodies are tasked with establishing robust frameworks for AI. This includes developing institutional policies for its use in research and teaching, addressing data privacy, and ensuring academic integrity in an AI-augmented environment.

02

Strategic Evolution: Redefining Education for an AI-Augmented World

Beyond policy, boards are considering how AI can optimize administrative functions and enhance student experiences. The goal is to drive innovative educational models that prepare graduates for AI-augmented careers and uphold the institution's relevance.
