THE DATA

# 40%

## Employees Violate AI Policies

A survey revealed this percentage of employees would bypass AI rules for speed.

A 2025 survey cited by IOSG Ventures found that nearly half of employees are willing to circumvent company AI usage policies to complete tasks faster. This widespread shadow AI usage creates significant security vulnerabilities and reinforces the urgent need for controlled, in-house AI infrastructure.

# Empowering Teams with Secure, Customizable AI.

The drive for efficiency often clashes with strict IT policies regarding external AI tools. By implementing sovereign AI solutions, organizations can provide their teams with powerful, customized AI capabilities that are both secure and compliant. This fosters innovation without compromising data integrity or intellectual property.

## Build Your Own: The Rise of On-Premise Inference.

The trend of employees using unauthorized AI highlights the demand for readily accessible AI. Sovereign AI enables the deployment of local LLMs and on-premise inference, offering rapid access to AI processing without sending sensitive data to external servers. This supports greater autonomy and reduces external dependencies.
