01

Empowering Local AI Communities

By focusing on open-source, open-weight, self-hosted tools, the initiative aims to foster local AI communities where participants can learn, share, and collaborate on local large language models, on-premises inference, and private retrieval-augmented generation (RAG) systems.

02

Promoting Self-Reliance in AI

This democratization effort emphasizes self-reliance and control over AI infrastructure, enabling individuals and startups to build their own sovereign AI stacks without relying on centralized platforms.
