THE DATA

96 days

Days on Market

Housing market stability indicated by longer days on market.

The San Antonio MSA's housing market remains relatively stable, with homes staying on the market for an average of 96 days. This suggests a balanced supply and demand scenario, but it also means limited opportunities for real estate technology innovation in the short term.

01

Market Stability Indicators

The extended days on market indicate a stable market environment, where both buyers and sellers have time to negotiate. This stability can lead to more rational pricing and fewer price fluctuations, benefiting long-term investors.

02

Quiet Tech Sector, Potential for Innovation

While the tech sector remains quiet, this lull could present opportunities for innovation. As market conditions stabilize, developers and tech companies may explore new solutions that enhance the real estate experience, such as improved AI-driven analytics or smart home technologies.
