

AI Can't Replace Human Judgment

When the world needed clarity, Helen Branswell delivered—no algorithms could have done it.

2020

Year of prescient insight

Helen Branswell predicted the severity of the pandemic before most experts.

In May 2020, she wrote that Covid vaccines would be more effective at preventing severe outcomes than stopping transmission—a reality only confirmed a year later. Her ability to interpret complex, evolving data with scientific rigor and public clarity was unmatched.

01

Trust is earned, not coded

Her reporting was trusted not because it was perfect, but because it was consistent—evidence-based, transparent, and courageous. That trust is not algorithmic; it's earned through lived experience and intellectual honesty.

02

AI needs narrative intelligence

Without narrative intelligence, AI risk becoming a data mirror: accurate, but meaningless. The future of AI in health isn't just about prediction—it's about storytelling that informs, calms, and guides action.
