

# Your AI Can't Defend You From Lies

The real threat isn't code—it's conspiracy narratives built to break trust.

## Rigged Election Tactics

The Center for an Informed Public has mapped six recurring patterns in election integrity rumors.

These six maneuvers—like shifting blame to voting machines or fabricating ballot dumps—are not random. They’re systematically deployed to erode public confidence in democratic processes. What’s alarming is how quickly they spread, often within hours of a real event.

# 01

## Disinformation Is a Protocol

For sovereign AI builders, this means: if you're training models on public data, you must assume that adversarial narratives are already embedded. Your system's safety layer isn't just about filtering toxic output—it's about detecting and resisting cognitive sabotage.

# 02

## Trust Is the First Layer of Sovereignty

For self-hosted AI teams, this means sovereignty begins not in the server room, but in the design of transparency. A private RAG system must not only answer correctly—it must explain why it answers that way, with audit trails and explainable logic, so users can distinguish between signal and sabotage.
