THE DATA

28.2

Mean Commute to Work by City, in Minutes (2024)

Georgetown's average commute time is the second-fastest among Williamson County cities.

This ranking places Georgetown just behind Brushy Creek, with a mean commute of 28.2 minutes—significantly faster than neighboring Hutto, Taylor, and Liberty Hill. The data reflects a city that balances urban access with suburban efficiency, a rare advantage in rapidly growing Texas counties.

01

Commute efficiency drives retention

In an era of remote work and hybrid models, a sub-30-minute average commute is a competitive differentiator. Georgetown's position as the second-fastest in Williamson County suggests that the city's infrastructure and employment density are effectively supporting workforce mobility—especially for those working in nearby Austin or Round Rock.

This efficiency is not incidental; it reflects intentional planning in zoning, transit access, and employment clustering, particularly in Sun City Georgetown's age-qualified communities where commute time directly impacts quality of life and long-term retention.

02

Low commute cost = high lifestyle value

A 28.2-minute average commute is not just a number—it's a proxy for affordability of time, which is increasingly recognized as a premium asset in real estate. In a region where housing costs are rising, a shorter commute reduces the psychological and economic burden of daily travel, making Georgetown a more attractive location for both retirees and young professionals.

This creates a feedback loop: better commute times attract more residents, which in turn increases demand for housing and supports sustained price growth—particularly in maintenance-free, low-turnover communities like Sun City Georgetown.
